Eating the Earth Justyn Walsh, 2023-09-12 Fossil fuelled capitalism although generating riches for billions is underwritten by a planetary pyramid scheme one in which withdrawals from the natural world are not supported by underlying capital replenishment resulting in global impacts such as climate change and biodiversity loss Former investment banker Justyn Walsh argues that the failure to properly value nature is more than just a glitch in the system but in many ways is the system one enabling a cowboy economy that relentlessly rolls forward to new frontiers of exploitation and gives the appearance of wealth being created when in fact much of it is being destroyed Stark in its warnings but hopeful in its prescriptions Eating the Earth argues that we need to embrace a new story one acknowledging that humankind is a part of nature rather than apart from nature that measures how life is enriched rather than destroyed and that lives off nature's dividends rather than eating into its capital The World's Fastest, Spookiest, Smelliest, Strongest Book Editors of Portable Press, 2020-04-07 Discover the most extreme things in the world on the pages of this kid friendly collection of entertaining and educational articles Kids will have a blast learning about the most extreme things in the world The World's Fastest Spookiest Smelliest Strongest Book is full of weird wild and wonderful facts about the world Readers will learn about the most amazing waterfalls the fastest animals and more while being entertained by quirky drawings throughout the book *Planetary Eating* Gidon Eshel, 2025-06-24 A scientifically rigorous guide to making the best dietary choices for both our personal health and our environmental footprint Many of us try our best to eat foods that are healthy and environmentally sustainable But are we getting it right Which foods amount to wise choices and which ones are best avoided Common views often range widely and are sometimes even contradictory It's most unfortunate when conscientious individuals who go to great lengths in their quest to minimize environmental impacts follow the wrong advice In *Planetary Eating* Gidon Eshel aims to minimize such misuse of good will by providing scientifically untrained readers with the tools needed to make the best choices for themselves and for our planet Eshel writes that dietary choices and the corresponding agricultural patterns are for most of us our principal form of planetary agency the main ways by which we impact our overburdened and undernourished host planet Agriculture and diet are therefore most productively examined through the planetary science perspective Starting from rather basic but not quite first principles *Planetary Eating* offers impartial fact based analysis with firm foundations in earth and planetary sciences on how to make the right dietary choices *The World's Best Book* Jan Payne, 2010-06-29 With all of the books in

Sex, Drugs, and Sea Slime Ellen Prager, 2024-05-31 When viewed from a quiet beach the ocean with its rolling waves and vast expanse can seem calm even serene But hidden beneath the sea's waves are a staggering abundance and variety of active creatures engaged in the never ending struggles of life to reproduce to eat and to avoid being eaten With Sex Drugs and Sea Slime marine scientist Ellen Prager takes us deep into the sea to introduce an astonishing cast of fascinating and bizarre creatures that make the salty depths their home From the tiny but voracious arrow worms whose rapacious ways may lead to death by overeating to the lobsters that battle rivals or seduce mates with their urine to the sea's masters of disguise the octopuses Prager not only brings to life the ocean's strange creatures but also reveals the ways they interact as predators prey or potential mates And while these animals make for some jaw dropping stories witness the sea cucumber which ejects its own intestines to confuse predators or the hagfish that ties itself into a knot to keep from suffocating in its own slime there's far more to Prager's account than her ever entertaining anecdotes again and again she illustrates the crucial connections between life in the ocean and humankind in everything from our food supply to our economy and in drug discovery biomedical research and popular culture Written with a diver's love of the ocean a

novelist's skill at storytelling and a scientist's deep knowledge Sex Drugs and Sea Slime enchants as it educates enthralling us with the wealth of life in the sea and reminding us of the need to protect it **Get Well, Stay Well** Gemma

Pfeiffer, 2006-10-01 The miracle of the Green Revolution was made possible by cheap fossil fuels to supply crops with artificial fertilizer pesticides and irrigation Estimates of the net energy balance of agriculture in the United States show that ten calories of hydrocarbon energy are required to produce one calorie of food Such an imbalance cannot continue in a world of diminishing hydrocarbon resources Eating Fossil Fuels examines the interlinked crises of energy and agriculture and highlights some startling findings The worldwide expansion of agriculture has appropriated fully 40 percent of the photosynthetic capability of this planet The Green Revolution provided abundant food sources for many resulting in a population explosion well in excess of the planet's carrying capacity Studies suggest that without fossil fuel based agriculture the United States could only sustain about two thirds of its present population For the planet as a whole the sustainable number is estimated to be about two billion Concluding that the effect of energy depletion will be disastrous without a transition to a sustainable re localized agriculture the book draws on the experiences of North Korea and Cuba to demonstrate stories of failure and success in the transition to non hydrocarbon based agriculture It urges strong grassroots activism for sustainable localized agriculture and a natural shrinking of the world's population
