The Faber Book of Art Anecdotes Edward Lucie-Smith, 1992-01 The Artist as Murderer Norman E. Land. 2022-11-18 The 4th century BC Greek painter Parrhasius murdered his model an old man who was his slave to achieve so the story goes a more lifelike depiction of nature The tale has inspired similar more elaborate stories about both well known and obscure artists including Leonardo da Vinci Michelangelo and Rubens Elements of the tale have appeared in theater literature and film as well as in comments by painters historians critics and anatomists Challenging the archetype of the artist as a sympathetic lover of nature this book examines the artist as cruel and murderous in service of art and ambition and indirectly addresses a different understanding of the relationship between art and life A Brief History of the Artist from God to Picasso Paul Barolsky, 2015-08-26 In A Brief History of the Artist from God to Picasso Paul Barolsky explores the ways in which fiction shapes history and history informs fiction It is a playful book about artistic obsession about art history as both tragedy and farce and about the heroic and the mock heroic The book demonstrates that the modern idea of the artist has deep roots in the image of the epic poet from Homer to Ovid to Dante Barolsky's major claim is that the history of the artist is inseparable from historical fiction about the artist and that fiction is essential to the reality of the artist s imagination The Methodologies of Art Laurie Schneider Adams, 2018-03-09 Since the nineteenth century when art history became an established academic discipline works of art have been read in a variety of ways These different ways of describing and interpreting art are the methodologies of artistic analysis the divining rods of meaning Regardless of a work s perceived difficulty an art object is in theory complex Every work of art is an expression of its culture time and place and its maker the artist and is dependent on its media what it s made of The methodologies discussed here formal analysis iconology and iconography Marxism feminism biography and autobiography psychoanalysis structuralism race and gender reflect the multiplicity of meanings in an artistic image The second edition includes nineteen new images new sections on race gender orientalism and colonialism and a new epilogue that analyzes a single painting to illustrate the different methodological viewpoints *International Who's Who in Poetry 2004* Europa Publications, 2003 Provides up to date profiles on the careers of leading and emerging poets **Dictionary of Artists' Models** Jill Berk Jiminez, 2013-10-15 The first reference work devoted to their lives and roles this book provides information on some 200 artists models from the Renaissance to the present day Most entries are illustrated and consist of a brief biography selected works in which the model appears with location a list of further reading This will prove an invaluable reference work for art historians librarians museum and gallery curators as well as students and researchers Hello Goodbye Hello Craig Brown, 2012-08-07 Delivers 101 fascinating true encounters between the rich and famous <u>Idolatry and Infinity</u> David R. Topper,2014-07-24 Some unwritten stories only exist in fragments In this book for the first time the histories of the injunction against idolatry and the dread of infinity are uniquely woven into one The spectre of idolatry has haunted the three Western religions since the biblical prohibition The

story of iconoclasm runs from ancient times where Jews largely ignored the ban on images through the iconoclastic episodes in Islam and Christianity and into modern times during the French Revolution A perhaps surprising thesis of this book is that a conceptual and secular form of iconoclasm continued as the revulsion of illusionism in Modern Art More recently it flared up in the dynamiting of two large statues of the Buddha by the Taliban in Afghanistan in 2001 The phobia of infinity arose from Pythagoras s discovery of irrational numbers and it runs through Zeno s paradoxes and Aristotle s philosophy with only rare cases of defiance such as Archimedes searching for pi The angst over infinity continued through the Middle Ages with the theological encounter of an infinite God as in the writings of Thomas Aguinas only to be confronted in the Renaissance philosophy of Cusa At the same time infinity arose unexpectedly in visual art with the discovery of linear perspective where God was identified with the vanishing point In the 17th and 18th centuries infinity further emerged not only in the very very large the cosmos itself but in the very very small within calculus This paved the way in the 19th and 20th centuries for the idea of different orders of infinity codified by Georg Cantor where the concept mingled again with theology Math and science buffs familiar with some aspects of infinity may first learn of its link with art as well as a long association with theology right up to the present With lucid visual aids for the uninitiated this book may likewise grant the Art lover access into a previously uncharted territory a math venture to stretch the mind Framing Pictures Steven Jacobs, 2012-08-27 Steven Jacobs book provides a unique critical intervention into a relatively new area of scholarship the multidisciplinary topic of film and the Empire of Texts in Motion Karen Laura Thornber, 2020-10-26 By the turn of the twentieth century Japan s visual arts military and economic successes made it the dominant power in East Asia drawing hundreds of thousands of Chinese Korean and Taiwanese students to the metropole and sending thousands of Japanese to other parts of East Asia The constant movement of peoples ideas and texts in the Japanese empire created numerous literary contact nebulae fluid spaces of diminished hierarchies where writers grapple with and transculturate one another s creative output Drawing extensively on vernacular sources in Japanese Chinese and Korean this book analyzes the most active of these contact nebulae semicolonial Chinese occupied Manchurian and colonial Korean and Taiwanese transculturations of Japanese literature It explores how colonial and semicolonial writers discussed adapted translated and recast thousands of Japanese creative works both affirming and challenging Japan's cultural authority Such efforts not only blurred distinctions among resistance acquiescence and collaboration but also shattered cultural and national barriers central to the discourse of empire In this context twentieth century East Asian literatures can no longer be understood in isolation from one another linked only by their encounters with the West but instead must be seen in constant interaction throughout the Japanese empire and beyond The Facts on File Companion to the British Short Story Andrew Maunder, 2007 A comprehensive reference to short fiction from Great Britain Ireland and the British Commonwealth With approximately 450 entries this A to Z guide explores the literary contributions of such writers as Joseph Conrad James Joyce D H Lawrence Rudyard Kipling Oscar Wilde Katherine Mansfield Martin Amis and

others The Map is Not the Territory Alan Woods, Ralph Rumney, 2000 This innovative book is an interaction based on a series of interviews between the artist Ralph Rumney and the writer Alan Woods Rumney s extraordinary life is chronicled here as well as his works over the last 45 years He is the only British founder member of Situationist International and the lone founder of the London Psychogeographical Society Complementing the open elements of play and discovery inherent in Rumney s psychogeography is an almost Duchamp esque interest in the applicability of games This volume contains over 100 illustrations many of which have not been previously reproduced Anecdotes of Modern Art Donald Hall, Pat Corrington Wykes, 1990 From the author of The Oxford Book of American Literary Anecdotes comes a fascinating collection of ribald sad and touching stories about the artists of the modern era Includes nearly 800 anecdotes covering almost 200 artists from Rousseau to Picasso to Warhol and offers a unique glimpse into the private lives of many of the world's best known artists

Storytelling: Exploring the Art and Science of Narrative Sara Shafer,2019-01-04 This volume was first published by Inter Disciplinary Press in 2013 The relationship between text aural oral and visual and human author and audience that is inherent in the act of storytelling reflects the fact that any story is a uniquely interactive and interdependent phenomenon This collection presents the reader with a truly interdisciplinary forum in which the art of storytelling is considered from the purview of rigorous academic inquiry To entirely ignore the aesthetics of storytelling however would be to devalue the profound and unspeakable connection to stories of all kinds that is a timeless aspect of the human experience The chapters within preserve the artistic grandeur of storytelling while strengthening and broadening the validity of the story as an area worth of rigorous academic pursuit The scope of inquiry represented by the chapters within demonstrates the fact that questions of architecture motive method and rhetoric have the power to enhance our experience of storytelling as an expression of the human spirit The New Oxford Book of Literary Anecdotes John Gross, 2008 An unrivalled collection of literary gossip and intimate sidelights on the lives of the authors This hugely entertaining anthology ranges from Chaucer to the present day with anecdotes that are hilarious touching outrageous sinister inspiring and downright weird
