Fabre Poet Of Science:

Fabre; Poet of Science Georges Victor Legros,1913 HERE I offer to the public the life of Jean Henri Fabre at once an admiring commentary upon his work and an act of pious homage such as ought to be offered while he lives to the great naturalist who is eventoday so little known Hitherto it was not easy to speak of Henri Fabre with exactitude An enemy to all advertisement he has so discreetly held himself withdrawn that one might almost say that he has encouraged by his silence many doubtful or unfounded rumours which in course of time would become even more incorrect For example although quite recently his material situation was presented in the gloomiest of lights while it had really for some time ceased to be precarious it is none the less true that during his whole life he has had to labour prodigiously in order to earn a little money to feed and rear his family to the great detriment of his scientific inquiries and we cannot but regret that he was not freed from all material cares at least twenty years earlier than was the case **Fabre, Poet of Science** C. V. Legros,1913

Legros,2015-07-17 Excerpt from Fabre Poet of Science In undertaking this task my devoted disciple has to some extent been able to replace those Memoirs which he suggested that I should write and which only my bad health has prevented me from undertaking for I feel that henceforth I am done with wide horizons and far reaching thoughts And yet on reading now the old letters which he has exhumed from a mass of old yellow papers and which He has presented and co ordinated with so pious a care it seems to me that in the depths of my being I can Still feel rising in me all the fever of my early years all the enthusiasm of long ago and that I should still be no less ardent a worker were not the weakness of my eyes and the failure of my strength to day an insurmountable obstacle About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works Fabre, Poet of Science Legros,Bernard
