**BITS of Belonging** Simanti Dasgupta, 2015-10-12 India's global success in the Information Technology industry has also prompted the growth of neoliberalism and the re emergence of the middle class in contemporary urban areas such as Bangalore In her significant study *BITS of Belonging* Simanti Dasgupta shows that this economic shift produces new forms of social inequality while reinforcing older ones She investigates this economic disparity by looking at IT and water privatization to explain how these otherwise unrelated domains correspond to our thinking about citizenship governance and belonging Dasgupta's ethnographic study shows how work and human processes in the IT industry intertwine to meet the market stipulations of the global economy Meanwhile in the recasting of water from a public good to a commodity the middle class insists on a governance and citizenship model based upon market participation Dasgupta provides a critical analysis of the grassroots activism involved in a contested water project where different classes lay their divergent claims to the city

**Circuits of Culture** Jeffrey D. Himpele, 2008 Set against the background of Bolivia's prominent urban festival parades and the country's recent appearance on the front lines of antiglobalization movements *Circuits of Culture* is the first social analysis of Bolivian film and television their circulation through the social and national landscape and the emergence of the country's indigenous video movement At the heart of Jeff Himpele's examination is an ethnography of the

popular television program The Open Tribunal of the People The indigenous and underrepresented majorities in La Paz have used the talk show to publicize their social problems and seek medical and legal assistance from the show's hosts and the political party they launched Himpele studies the program in order to identify the possibilities of the mass media as a site for political discourse and as a means of social action Charting as well the history of Bolivia's media culture Himpele perceptively investigates cinematic media as sites for understanding the modernization of Bolivia its social movements and the formation of indigenous identities and in doing so provides a new framework for exploring the circulation of culture as a way of creating public political movements and producing media Jeff D Himpele is associate director for the McGraw Center for Teaching and Learning at Princeton University He is an anthropologist and documentary filmmaker his films include the award winning Incidents of Travel in Chichen Itza and Taypi Kala Six Visions of Tiwanaku Language and Social Justice Kathleen C. Riley, Bernard C. Perley, Inmaculada M. García-Sánchez, 2024-02-22 Language whether spoken written or signed is a powerful resource that is used to facilitate social justice or undermine it The first reference resource to use an explicitly global lens to explore the interface between language and social justice this volume expands our understanding of how language symbolizes frames and expresses political economic and psychic problems in society thus contributing to visions for social justice Investigating specific case studies in which language is used to instantiate and or challenge social injustices each chapter provides a unique perspective on how language carries value and enacts power by presenting the historical contexts and ethnographic background for understanding how language engenders and or negotiates specific social justice issues Case studies are drawn from Africa Asia Europe North and South America and the Pacific Islands with leading experts tackling a broad range of themes such as equality sovereignty communal well being and the recognition of complex intersectional identities and relationships within and beyond the human world Putting issues of language and social justice on a global stage and casting light on these processes in communities increasingly impacted by ongoing colonial neoliberal and neofascist forms of globalization Language and Social Justice is an essential resource for anyone interested in this area of research The Ground Between Veena Das, Michael Jackson, Arthur Kleinman, Bhargupati Singh, 2014-04-21 The guiding inspiration of this book is the attraction and distance that mark the relation between anthropology and philosophy This theme is explored through encounters between individual anthropologists and particular regions of philosophy Several of the most basic concepts of the discipline including notions of ethics politics temporality self and other and the nature of human life are products of a dialogue both implicit and explicit between anthropology and philosophy These philosophical undercurrents in anthropology also speak to the question of what it is to experience our being in a world marked by radical difference and otherness In The Ground Between twelve leading anthropologists offer intimate reflections on the influence of particular philosophers on their way of seeing the world and on what ethnography has taught them about philosophy Ethnographies of the mundane and the everyday raise fundamental issues that the contributors grapple with in both their lives and their

thinking With directness and honesty they relate particular philosophers to matters such as how to respond to the suffering of the other how concepts arise in the give and take of everyday life and how to be attuned to the world through the senses Their essays challenge the idea that philosophy is solely the province of professional philosophers and suggest that certain modalities of being in the world might be construed as ways of doing philosophy Contributors Jo o Biehl Steven C Caton Vincent Crapanzano Veena Das Didier Fassin Michael M J Fischer Ghassan Hage Clara Han Michael Jackson Arthur Kleinman Michael Puett Bhri Gupta Singh

**Life on Ice** Joanna Radin, 2017-03-27 After the atomic bombing at the end of World War II anxieties about survival in the nuclear age led scientists to begin stockpiling and freezing hundreds of thousands of blood samples from indigenous communities around the world These samples were believed to embody potentially invaluable biological information about genetic ancestry evolution microbes and much more Today they persist in freezers as part of a global tissue based infrastructure In *Life on Ice* Joanna Radin examines how and why these frozen blood samples shaped the practice known as biobanking The Cold War projects Radin tracks were meant to form an enduring total archive of indigenous blood before it was altered by the polluting forces of modernity Freezing allowed that blood to act as a time traveling resource Radin explores the unique cultural and technical circumstances that created and gave momentum to the phenomenon of life on ice and shows how these preserved blood samples served as the building blocks for biomedicine at the dawn of the genomic age In an era of vigorous ethical legal and cultural debates about genetic privacy and identity *Life on Ice* reveals the larger picture how we got here and the promises and problems involved with finding new uses for cold human blood samples

*Ungovernable Life* Omar Dewachi, 2017-08-01 Iraq's healthcare has been on the edge of collapse since the 1990s Once the leading hub of scientific and medical training in the Middle East Iraq's political and medical infrastructure has been undermined by decades of U S led sanctions and invasions Since the British Mandate Iraqi governments had invested in cultivating Iraq's medical doctors as agents of statecraft and fostered connections to scientists abroad In recent years this has been reversed as thousands of Iraqi doctors have left the country in search of security and careers abroad *Ungovernable Life* presents the untold story of the rise and fall of Iraqi mandatory medicine and of the destruction of Iraq itself Trained as a doctor in Baghdad Omar Dewachi writes a medical history of Iraq offering readers a compelling exploration of state making and dissolution in the Middle East His work illustrates how imperial modes of governance from the British Mandate to the U S interventions have been contested maintained and unraveled through medicine and healthcare In tracing the role of doctors as agents of state making he challenges common accounts of Iraq's alleged political unruliness and ungovernability bringing forth a deeper understanding of how medicine and power shape life and how decades of war and sanctions dismember projects of state making

*Emerging Evangelicals* James S. Bielo, 2011-10-01 The Emerging Church movement developed in the mid 1990s among primarily white urban middle class pastors and laity who were disenchanted with America's conservative Evangelical sub culture It is a response to the

increasing divide between conservative Evangelicals and concerned critics who strongly oppose what they consider overly slick corporate and consumerist versions of faith A core feature of their response is a challenge to traditional congregational models often focusing on new church plants and creating networks of related house churches Drawing on three years of ethnographic fieldwork James S Bielo explores the impact of the Emerging Church movement on American Evangelicals He combines ethnographic analysis with discussions of the movement s history discursive contours defining practices cultural logics and contentious interactions with conservative Evangelical critics to rethink the boundaries of Evangelical as a category Ultimately Bielo makes a novel contribution to our understanding of the important changes at work among American Protestants and illuminates how Emerging Evangelicals interact with the cultural conditions of modernity late modernity and visions of postmodern Christianity
