Charles and Emma Darwin: The Option to Believe Chris Dunford, 2022-05-05 Many people look at the world through a scientific lens that seems to forbid religious conviction but then find themselves drawn by curiosity if not longing to the religious worldview Is this tension inevitable or unnecessary The famously successful marriage of Charles and Emma Darwin illustrates the problem Charles and Emma were very close to each other in social background and knowledge of the world yet they found it difficult to agree on the Question of God Were their religious beliefs driven apart more by his science or by their society Were these potentially compatible or inherently irreconcilable Charles and Emma Darwin *The Option to Believe* searches for answers in the family s history and individual personalities as well as in the cultural social and intellectual history of that family s society The book also looks

back on the Darwins predicament from the perspective of modern science and theology and suggests it is society not science that creates the modern tension between science and religion There is an intellectual option to believe in God that seemed unavailable to Victorians like Charles Darwin yet is certainly available to us today [The Aliveness of Plants](#) Peter Ayres,2015-10-06 The Darwin family was instrumental in the history of botany Their experiences illustrate the growing specialization and professionalization of science in the nineteenth century The author shows how botany escaped the burdens of medicine feminization and the sterility of classification and nomenclature to become a rigorous laboratory science

Children, Spaces and Identity Margarita Sánchez Romero,Eva Alarcón García,Gonzalo Aranda Jiménez,2015-10-31 How do children construct negotiate and organize space The study of social space in any human group is fraught with limitations and to these we must add the further limits involved in the study of childhood Here specialists from archaeology history literature architecture didactics museology and anthropology build a body of theoretical and methodological approaches about how space is articulated and organized around children and how this disposition affects the creation and maintenance of social identities Children are considered as the main actors in historic dynamics of social change from prehistory to the present day Notions on space childhood and the construction of both the individual and the group identity of children are considered as a prelude to papers that focus on analyzing and identifying the spaces which contribute to the construction of children s identity during their lives the places they live learn socialize and play A final section deals with these same aspects but focuses on funerary contexts in which children may lose their capacity to influence events as it is adults who establish burial strategies and practices In each case authors ask questions such as how do adults construct spaces for children How do children manage their own spaces How do people adults and children build invisible and or physical boundaries and spaces [The SAGE Handbook of Evolutionary Psychology](#) Todd K. the world's first language. It describes the history of English within the British Isles, its changing roles in different places and its rise to global pre-eminence.

Singled Out Virginia Nicholson, 2008-10-29 Almost three quarters of a million British soldiers lost their lives during the First World War and many more were incapacitated by their wounds leaving behind a generation of women who raised to see marriage as the crown and joy of woman's life suddenly discovered that they were left without an escort to life's great feast. Drawing upon a wealth of moving memoirs, *Singled Out* tells the inspiring stories of these women: the student weeping for a lost world as the Armistice bells pealed; the socialite who dedicated her life to resurrecting the ancient past after her soldier love was killed; the Bradford mill girl whose campaign to better the lot of the War spinsters was to make her a public figure; and many others who, deprived of their traditional roles, reinvented themselves into something better. Tracing their fates, Nicholson shows that these women did indeed harbor secret sadness and many of them yearned for the comforts forever denied them: physical intimacy, the closeness of a loving relationship and children. Some just endured but others challenged the conventions, fought the system and found fulfillment outside of marriage. From the mill girl turned activist to the debutante turned archaeologist, from the first woman stockbroker to the business girls and the Miss Jean Brodies, this book memorializes a generation of young women who were forced by four of the bloodiest years in human history to stop depending on men for their income, their identity and their future happiness. Indeed, *Singled Out* pays homage to this remarkable generation of women who, changed by war in turn, would change society.

History of Geoscience W. Mayer, R.M. Clary, L.F. Azuela, T.S. Mota, S. Wolkowicz, 2017-06-06 The study of the Earth's origin, its composition, the processes that changed and shaped it over time, and the fossils preserved in rocks have occupied enquiring minds from ancient times. The contributions in this volume trace the history of ideas and the research of scholars in a wide range of geological disciplines that have paved the way to our present-day understanding and knowledge of the physical nature of our planet and the diversity of life that inhabited it. To mark the 50th anniversary of the founding of the International Commission on the History of Geology (INHIGEO), the book features contributions that give insights into its establishment and progress. In other sections, authors reflect on the value of studying the history of the geosciences and provide accounts of early investigations in fields as diverse as tectonics, volcanology, geomorphology, vertebrate palaeontology and petroleum geology. Other papers discuss the establishment of geological surveys, the contribution of women to geology, and biographical sketches of noted scholars in various fields of geoscience.

enquiry based pedagogy that takes the professional practice of Charles Darwin as its source Without seeking to idealise the man Darwin inspired learning places importance on active learning hands on enquiry critical thinking creativity argumentation interdisciplinarity In an increasingly urbanised world first hand observations of living plants and animals are becoming rarer Indeed some commentators suggest that such encounters are under threat and children are living in a time of nature deficit Darwin inspired learning with its focus on close observation and hands on enquiry seeks to re engage children and young people with the living world through critical and creative thinking modeled on Darwin s life and science
