Emotion And Insanity:

Emotion and Insanity Sophus Thalbitzer, 1926 *Emotion and Insanity* Sophus Thalbitzer, 1926 **Metaphor and Emotion** Zoltán Kövecses, 2003-09 Are human emotions best characterized as biological psychological or cultural entities Many researchers claim that emotions arise either from human biology i e biological reductionism or as products of culture i e social constructionism This book challenges this simplistic division between the body and culture by showing how human emotions are to a large extent constructed from individuals embodied experiences in different cultural settings The view proposed here demonstrates how cultural aspects of emotions metaphorical language about the emotions and human physiology in emotion are all part of an intergrated system and shows how this system points to the reconciliation of the seemingly contradictory views of biological reductionism and social constructionism in contemporary debates about human emotion **Emotion and insanity** S. Thalbitzer, 1999 Meaning and Cognition Liliana Albertazzi, 2000-01-01 The aim of this book is to present significant aspects of cognitive grammar by adopting an interdisciplinary approach The book provides an interplay of contributions by some exponents of cognitive grammar Langacker Croft Wood Geeraerts Kövecses Wildgen and philosophers of language Albertazzi Marconi Peruzzi Violi who in most cases share a phenomenological and Gestalt approach to the problem of semantics The topics covered include themes that are central to the debate in cognitive grammar such as metaphor construal operations prototypicality Gestalt schemes and field semantics The book offers evidence to support the cognitive hypothesis in semantics and the existence of a close connection between the structures of perception and the categories of natural language Because of the approach employed with its consideration of borderline aspects among semantics linguistics theoretical reflection and historical analysis the book marks out a route for a philosophical inquiry complementary to a cognitive approach to the semantics of natural language Emotion and Insanity S. Thalbitzer, Harald Hoffding, 2013-10 This is a new release of the original 1926 edition **Medicine, Emotion and Disease, 1700-1950** Fay Bound Alberti, 2006-07-31 Using interdisciplinary techniques and original research findings this volume explores the shift from humoral to nervous interpretations of emotion the emotional nature of the medical professional patient relationship and the extent to which gender might influence the diagnosis treatment and prognosis of pathological emotional conditions *The Psychology of Emotion, Morbid and Normal* John Thompson MacCurdy, 1925 *Not Quite Hope and Other Political Emotions in the Gilded Age* Nathan Wolff, 2019 Not Quite Hope and Other Political Emotions in the Gilded Age argues that late nineteenth century US fiction grapples with and helps to conceptualize the disagreeable feelings that are both a threat to citizens agency and an inescapable part of the emotional life of democracy then as now In detailing the corruption and venality for which the period remains known authors including Mark Twain Harriet Beecher Stowe Henry Adams and Helen Hunt Jackson evoked the depressing inefficacy of reform the lunatic passions of the mob and the revolting appetites of lobbyists and office seekers Readers and critics of these Washington novels historical romances and satiric romances a clef

have denounced these books fiercely negative tone seeing it as a sign of cynicism and elitism Not Quite Hope argues in contrast that their distrust of politics is coupled with an intense investment in it not quite apathy but not quite hope Chapters examine both common and idiosyncratic forms of political emotion including crazy love disgust cynicism election fatigue and the myriad feelings of hatred and suspicion provoked by the figure of the hypocrite In so doing the book corrects critics too narrow focus on sympathy as the American novel's model political emotion We think of reform novels as fostering feeling for fellow citizens or for specific causes This volume argues that Gilded Age fiction refocuses attention on the unstable emotions that continue to shape our relation to politics as such

The Routledge History of Emotions in the Modern World Katie Barclay, Peter N. Stearns, 2022-08-09 The Routledge History of Emotions in the Modern World brings together a diverse array of scholars to offer an overview of the current and emerging scholarship of emotions in the modern world Across thirty six chapters this work enters the field of emotion from a range of angles Named emotions love anger fear highlight how particular categories have been deployed to make sense of feeling and their evolution over time Geographical perspectives provide access to the historiographies of regions that are less well covered by English language sources opening up global perspectives and new literatures Key thematic sections are

designed to intersect with critical historiographies demonstrating the value of an emotions perspective to a range of areas. Topical sections direct attention to the role of emotions in relations of power to intimate lives and histories of place as products of exchanges across groups and as deployed by new technologies and medias. The concepts of globalisation and modernity run through the volume acting as foils for comparison and analytical tools. The Routledge History of Emotions in the Modern World is the perfect resource for all students and scholars interested in the history of emotions across the world from 1700.

From Passions to Emotions Thomas Dixon, 2003-06-05. Today there is a thriving emotions industry to which philosophers, psychologists and neuroscientists are contributing. Yet until two centuries ago the emotions did not exist. In this path-breaking study, Thomas Dixon shows how during the nineteenth century the emotions came into being as a distinct psychological category replacing existing categories such as appetites, passions, sentiments and affections. By examining medieval and eighteenth-century theological psychologies and placing Charles Darwin and William James within a broader and more complex nineteenth-century setting, Thomas Dixon argues that this domination by one single descriptive category is not healthy. Overinclusivity of the emotions hampers attempts to argue with any subtlety about the enormous range of mental states and stances of which humans are capable. This book is an important contribution to the debate about emotion and rationality, which has preoccupied western thinkers throughout the eighteenth and nineteenth centuries and has implications for contemporary debates.

A Cultural Approach to Emotional Disorders E. Deidre Pribram, 2016-01-13. In her latest contribution to the growing field of emotion studies, Deidre Pribram makes a compelling argument for why culturalist approaches to the study of emotional disorders continue to be eschewed even as the sociocultural and historical study of mental illness flourishes. The author ties this phenomenon to a tension between two fundamentally different approaches to emotion: an individualist approach which regards emotions as the property of the individual, whether biologically or psychologically; and a culturalist approach which regards emotions as collective social processes with distinctive histories and meanings that work to produce particularized subjects. While she links a strong preference for the individualist construct in Western culture to the rise of the psychological and psychiatric disciplines at the turn of the twentieth century, Pribram also engages with a diverse set of case studies tied to psychological and aesthetic discourses on emotions. These range from Van Gogh's status as emotionally disordered to the public emotional aesthetics of 19th-century melodrama to the diagnostic categories of the DSMs and the fear of globalizing emotional disorders in the 21st century. This genuinely interdisciplinary approach makes for a text with potential application in a wide range of disciplines within cultural studies, including

sociocultural and historical analysis of psychiatry and psychology gender theory subject and identity theory popular culture studies and history and theory of the arts
