Moral Collectives Stefan Joller, Marija Stanisavljević, 2023-11-29 Whether terrorist attacks refugee or financial crises the challenges of globalized modernity expose those areas that Durkheim described as anomic and whose processing still illustrates the central position of moral communication There is some evidence to suggest that progressive functional differentiation does not erode morality but actually promotes a remoralization of society through increasing communicative networking Wherever grievances come to light and it is not foreseeable how they could be satisfactorily resolved in the modus operandi morality provides a promising instrument which in the form of moral collectives is able to permeate everyday life and shape society In this sense the anthology is dedicated to a theoretical as well as empirical analysis of morality which takes shape as a genuinely social quantity via moral collectives This book is a translation of an original German edition The translation was done with the help of artificial intelligence machine translation by the service DeepL.com A subsequent human revision was done primarily in terms of content so that the book will read stylistically differently from a conventional translation

Matters of Revolution Dominik Bartmanski, 2022-03-30 Symbols matter and especially those present in public spaces but how do they exert influence and maintain a hold over us Why do such materialities count even in the intensely digitalized culture This book

considers the importance of urban symbols to political revolutions examining manifold reasons for which social movements necessitate the affirmation or destruction of various material icons and public monuments What explains variability of life cycles of certain classes of symbols Why do some of them seem more potent than others Why do people exhibit nostalgic attachments to some symbols of the controversial past and vehemently oppose others What nourishes and threatens the social life of icons Through comparative analyses of major iconic processes following the epochal revolution of 1989 in Berlin and Warsaw the book argues that revolutionary action needs objects and sites which concretize the transformative redrawing of the symbolic boundaries between the sacred and profane good and evil before and after and progressive and reactionary the symbolic shifts that every revolution implies in theory and formalizes in practice Public symbols ensconced within actual urban spaces provide indispensable visibility to human values and social changes As affective topographies that externalize collective feelings their very presence and durability is meaningful and so are the revolutionary rituals of preservation and destruction directed at those spaces Far from being mere gestures or token signifiers they have their own gravity with profound cultural ramifications This volume will appeal to sociologists anthropologists geographers and social theorists with interests in urban studies public heritage material culture political revolution and social movements
