Eyeball To Eyeball The Inside Story Of The Cuban Missile Crisis:

Eyeball to Eyeball Dino A. Brugioni, 1991 From high altitude overflights by U 2 spy planes to tense briefings with a grim faced President Kennedy here is the definitive behind the scenes account of the Cuban missile crisis in 1962 **An International History of the Cuban Missile Crisis** David Gioe, Len Scott, Christopher Andrew, 2014-06-05 This edited volume addresses the main lessons and legacies of the 1962 Cuban Missile Crisis from a global perspective Despite the discoveries of recent research there is still much more to be revealed about the handling of nuclear weapons before and during the Cuban Missile Crisis CMC Featuring contributions from a number of eminent international scholars of nuclear history intelligence espionage political science and Cold War studies An International History of the Cuban Missile Crisis reviews and reflects on one of the critical moments of the Cold War focussing on three key areas First the volume highlights the importance of memory as an essential foundation of historical understanding and demonstrates how events that rely only on historical records can provide misleading accounts This focus on memory extends the scope of the existing literature by exploring hitherto neglected aspects of the CMC including an analysis of the operational aspects of Bomber Command activity explored through recollections of the aircrews that challenge accounts based on official records The editors then go on to explore aspects of intelligence whose achievements and failings have increasingly been recognised to be of central importance to the origins dynamics and outcomes of the missile crisis Studies of hitherto neglected organisations such as the US Defense Intelligence Agency DIA and the British Joint Intelligence Committee JIC both extend our understanding of British and American intelligence machinery in this period and enrich our understanding of key episodes and assessments in the missile crisis Finally the book explores the risk of nuclear war and looks at how close we came to nuclear conflict The risk of inadvertent use of nuclear weapons is evaluated and a new proposed framework for the analysis of nuclear risk put forward This volume will be of much interest to students of intelligence studies international history foreign policy security studies and IR in general *The Cuban Missile Crisis* Len Scott, 2023-11-23 It is sixty years since the events of October 1962 brought the world close to nuclear catastrophe The Cuban missile crisis has long been recognized as the moment of greatest danger in the life and near death of humanity In those sixty years our knowledge and understanding of events have undergone significant change There are some reasons to be encouraged inasmuch as we have learned how both President John F Kennedy and Premier Nikita Khrushchev sought to avoid nuclear war More ominously we have learned of incidents and events that suggest nuclear weapons might have been used by subordinate military commanders in circumstances frequently unknown to their political leaders Decisions whether to use nuclear weapons lay in the hands of often junior military commanders some of whom were perilously close to crossing the nuclear threshold This does not mean as often assumed that if some nuclear weapons were used escalation to all out war was inevitable Yet the undoubted risk of thermonuclear war in these circumstances threatened the very survival of civilization Hundreds if not thousands of millions

of people would have died from immediate and short term effects while the longer term prospect of a Nuclear Winter portended the virtual extinction of humanity Drawing lessons from sixty years ago faces significant challenges If we draw lessons only to discover our understanding was mistaken we might well have drawn the wrong lessons Many received wisdoms about the crisis have been shown to be misleading What is striking is how after forty or fifty or even sixty years new evidence has emerged to challenge previously accepted explanations It is for the reader to reach their own verdicts on the history of the crisis and how much we owe to political leaders who averted catastrophe as well as how their words and deeds helped create the crisis in the first place It is for the reader to conclude how close we came to nuclear war Whatever conclusions are reached one overriding lesson looms large However we judge the actions of political and military leaders one factor was crucial in why we avoided nuclear war in 1962 It was luck In October 1962 humanity was very lucky Will we be so lucky next time

Cuban Missile Crisis Jonathan Colman, 2016-02-15 October 1962 The Cuban Missile Crisis the confrontation that brought the world closer to nuclear catastrophe than ever before or since Both John F Kennedy and Nikita Khrushchev were determined to avoid nuclear war but events could easily have spiraled out of control with cataclysmic results Drawing on an extensive body of research including primary sources released only in the last few years this work places the crisis in a broader international and chronological context than previously possible Discover how America was responsible for causing the conflict and Cuba's role as an important actor rather than a superpower pawn

predictions regarding the future of counterproliferation The Silent Guns of Two Octobers Theodore Voorhees,2021-09-27
