A Genius for Deception Nicholas Rankin, 2009-11-10 In February 1942 intelligence officer Victor Jones erected 150 tents behind British lines in North Africa Hiding tanks in Bedouin tents was an old British trick writes Nicholas Rankin German general Erwin Rommel not only knew of the ploy but had copied it himself Jones knew that Rommel knew In fact he counted on it for these tents were empty With the deception that he was carrying out a deception Jones made a weak point look like a trap In **A Genius for Deception** Nicholas Rankin offers a lively and comprehensive history of how Britain bluffed tricked and spied its way to victory in two world wars As Rankin shows a coherent program of strategic deception emerged in World War I resting on the pillars of camouflage propaganda secret intelligence and special forces All forms of deception found an avid sponsor in Winston Churchill who carried his enthusiasm for deceiving the enemy into World War II Rankin vividly recounts such little known episodes as the invention of camouflage by two French artist soldiers the creation of dummy airfields for the Germans to bomb during the Blitz and the fabrication of an army that would supposedly invade Greece Strategic deception would be key to a number of WWII battles culminating in the massive misdirection that proved critical to the success of the D Day invasion in 1944 Deeply researched and written with an eye for telling detail **A Genius for Deception** shows how the British used craft and cunning to help win the most devastating wars in human history

The Mosquito in the USAAF Tony Fairbairn, 2021-12-22 This history of the US s

British aircraft acquisition examines the role the USSAF played in reconnaissance special operations and night fighting Air Space Power History On 20 April 1941 a group of distinguished Americans visited the de Havilland Aircraft Company's airfield at Hatfield England The party was there ostensibly to gain an insight into how various US aircraft supplied to Britain were performing as well as to observe some of the latest British products being put through their paces The eighteen types on display included both US and British bombers and fighters But the star of the day was undoubtedly the de Havilland Mosquito Having first flown only a few months earlier the aircraft was demonstrated by none other than Geoffrey de Havilland Striving to impress the trans Atlantic visitors de Havilland provided an outstanding display of speed and manoeuvrability It was a routine that left the Americans in no doubt as to the Mosquito's abilities Following America's entry into WWII formal requests for Mosquitoes began in earnest A steady flow of the photographic reconnaissance version were provided to what would become the USAF's 25th Bomb Group at Watton England There they served with distinction in a variety of specialist roles A number of these Mosquitoes served with the 492nd Bomb Group at Harrington and were involved in the so called Joan Eleanor project Finally in 1945 the USAF received much anticipated night fighter Mosquitoes which enjoyed combat success with the 416th Night Fighter Squadron in Italy In this highly illustrated work the author explores the full story of why the Americans wanted Mosquitoes how they went about obtaining them and their noted success and popularity with USAF units

Images of Conflict Jean Bourgeois, Nicholas Saunders, Birger Stichelbaut, 2008-12-18 Striking aerial views of war and of the scarred landscapes of its aftermath are the focus of this unique and multidisciplinary book For the first time the history significance and technology of military aerial photography are brought together and explored by military historians archaeologists and anthropologists This new approach opens the door to a modern reassessment of military aerial imagery reveals the concepts and philosophies that guided their production and interpretation and illustrates the complex interaction between humans and technology in creating and understanding the landscapes of conflict

Camera Aloft, **Understanding Contemporary Air Power** Viktoriya Fedorchak, 2020-04-06 This book aims to explain air power to both military and civilian audiences in an accessible manner approaching the topic in a balanced and systematic way The past 100 years illustrates that air power is an inevitable feature of any type of modern warfare It has a key role to play in any of the three main operational environments conventional inter state wars peace support operations and counterinsurgencies This book examines the strengths and challenges of using air power in these situations and each type of operation is explained using modern and historical examples with an emphasis on the relevant lessons for the contemporary and future use of air power The book also looks into the complexity of media coverage of air warfare and changes in the public perception of air power in recent years The specifics of structuring national air forces is also discussed along with the future of air power based on current trends One of the enduring themes in the book is the necessity of inter service and cross domain integration emphasizing the increasingly important role of cyber and space domains in the future of

network centric warfare This book will be essential reading for students of air power and air warfare and recommended reading for students of international security strategic studies defence studies and foreign policy No Ordinary Pilot Suzanne Campbell-Jones, 2018-03-09 After a lifetime in the RAF Group Captain Bob Allen finally allowed his children and grandchildren to see his official flying log It contained the line KILLED WHILST ON OPERATIONS He refused to answer any further questions leaving instead a memoir of his life during World War II Joining up aged 19 within six months he was in No 1 Squadron flying a Hurricane in a dog fight over the Channel For almost two years he lived in West Africa fighting Germany's Vichy French allies as well as protecting the Southern Atlantic supply routes Returning home at Christmas 1942 he retrained as a fighter bomber pilot flying Typhoons and was one of the first over the Normandy beaches on D Day On 25 July 1944 Bob was shot down spending the rest of the war in a POW camp where he was held in solitary confinement interrogated by the Gestapo and imprisoned in the infamous Stalag Luft 3 and suffered the winter march of 1945 before being liberated by the Russians Fleshing out Bob's careful third person memoir with detailed research his daughter Suzanne Campbell Jones tells the gripping story of a more or less ordinary man who came home with extraordinary memories which he kept to himself for more than 50 years *Targeting the Third Reich* Robert S. Ehlers, Jr., 2015-04-15 When large formations of Allied four engine bombers finally flew over Europe it marked the beginning of the end for the Third Reich Their relentless hammering of Germany totaling more than 14 million missions took out oil refineries industries and transportation infrastructures vital to the Reich's war effort While other accounts have focused on operational details this is the first book to reveal the crucial role of air intelligence in these dramatic campaigns Robert Ehlers reexamines these bombings through the lens of both air intelligence and operations a dual approach that shows how the former was so vital to the latter's success Air intelligence was essential to both targeting and damage assessment and by demonstrating its contributions to the Combined Bomber Offensive of 1943-1945 Ehlers provides a wealth of new insight into the war Ehlers describes the close ties that developed between the Royal Air Force's precision intelligence arm and the U.S. Army Air Force's precision bombardment forces telling how the RAF's photographic reconnaissance and signals intelligence steered both British and American bombers to the right targets at the right intervals with the right munitions He shows that the greatest strength of this partnership was its ability to orchestrate all aspects of damage assessment within an effective organizational structure so that by 1944 senior air commanders like the RAF's Arthur Bomber Harris and the AAF's Carl Tooey Spaatz could gauge the accuracy of bombing with a high degree of precision analyze its effects on the German war effort and determine its effectiveness in helping the Allies achieve strategic objectives Ehlers focuses on three key offensives in 1944 against French and Belgian rail supply lines delivering German troops and supplies to Normandy against German oil refineries and against railroads and waterways inside the Reich that had a disastrous effect on the Nazi war effort In the process he underscores the degree to which bombers constituted part of a highly effective combined arms force giving Allied armies crucial advantages on the battlefield

Drawing on a huge collection of bomb damage assessment photographs and a wealth of other archival sources he shows that the success of these and other efforts can be traced directly to the success of air intelligence Providing a deeper and more accurate understanding of the bomber campaigns role in the Allied victory Ehlers s study testifies to the strategic importance of these efforts in that war and provides a tool for understanding the importance of intelligence operations in future conflicts

Suffolk's Defended Shore Cain Hegarty, Sarah Newsome, 2014-06-30 Suffolk s Defended Shore presents an illustrated history of the development of military defences on the Suffolk coast using data collected as part of the English Heritage national survey The survey involved the examination of both modern and historic aerial photographs which led to the creation of a detailed map of the archaeological remains on the county s coast The results of the survey are dominated by evidence for the military defence of the coast reflecting the importance of the Suffolk coast in national defence strategies over many years Extensively illustrated this book highlights the particular importance of historic aerial photographs which provide a different and unique perspective on the coastal defences constructed in World War II Photographs taken during and immediately after this war sometimes provide the only visual record of the rapidly evolving defences from this period

Haig's Intelligence Jim Beach, 2013-10-24 Haig s Intelligence confronts a perennial question about the British on the Western Front why did they think they were winning Shades of Gray L. Parker Temple, 2005 In this work Temple tracks the evolution of space reconnaissance systems from their seeds in the painful lessons of Pearl Harbor through the challenges of today book cover **Espionage, Security, and Intelligence in Britain, 1945-1970** Richard James Aldrich, 1998 This book takes the concept of postmemory developed in Holocaust studies and applies it for the first time to novels by contemporary British writers Focusing on war fiction Alden builds upon current scholarship on historical fiction and memory studies and extends the field by exploring how the use of historical research within fiction illuminates the ways in which we remember and recreate the past Using postmemory to unlock both the transgenerational aspects of the novels discussed and the development of historiographic metafiction Alden provides a ground breaking analysis of the nature and potential of contemporary historical fiction By examining the patterns and motivations behind authors translations of material from the historical record into fiction Alden also asks to what extent such writing is necessarily metafictional Ultimately this study offers an updated answer to the question that historical fiction has always posed what can fiction do with history that history cannot
