Colour Forecasting for Fashion Debra Johnston Cobb, Debra Johnston Cobb, Kate Scully, 2012-02-12 Colour is a powerful selling tool It is the first thing to catch the consumer's eye in the shop window Get the colour choice wrong and an entire range can stay on the racks So how do colours arrive on the catwalk or the sales floor and why do different companies all seem to choose similar colours each season The answer lies in the work of the huge colour forecasting industry With case studies that show the industry at work this book breaks down the forecasting process from how to put together a colour palette to colour theory and the way that colours behave and helps you to build the combination of research and intuitive skills that a successful designer or forecaster needs *Threads Magazine*, 2002 **Forthcoming Books** Rose

Arny, 2001-06 **The Dyer's Handbook** Dominique Cardon, 2016-06-01 A translation and facsimile reproduction of a unique 18th century French manuscript that provides colour recipes and samples for producing dyes for the textiles of the day With analysis and essays setting it in context **Vegetable Dyes: Being a Book of Recipes and Other Information Useful to the Dyer** Ethel Mairet, 2022-08-15 In *Vegetable Dyes: Being a Book of Recipes and Other Information Useful to the Dyer* Ethel Mairet presents a comprehensive exploration of natural dyeing techniques delving into the rich tapestry of colors derived from plants Mairet's literary style is both instructional and reflective intertwining practical recipes with historical context and cultural insights showcasing her dedication to preserving traditional dyeing methods The book serves as a vital resource for artisans and enthusiasts alike fitting seamlessly within the Arts and Crafts movement of the early 20th century which emphasized skilled craftsmanship and natural materials in response to industrialization Ethel Mairet a pioneer in textile arts was deeply influenced by her experiences in India and her exposure to indigenous crafts Her passion for color and texture combined with her desire to connect contemporary practices with historical techniques led her to write this essential guide Mairet's expertise as a dyer and her teachings reflect a commitment to sustainability and authenticity making her work

a significant contribution to the field of textile arts For anyone interested in the art of dyeing whether a novice or an expert Mairé's Vegetable Dyes is an invaluable addition to their library This book not only serves as a practical guide filled with recipes but also as an inspiring journey into the principles of natural dyeing encouraging readers to embrace environmental consciousness in their creative practices *Fabric Dyer's Dictionary* Linda Johansen, 2010-11-05 Eliminate the guesswork out of creating the color you want and dye happy with formulas for over 900 colors in this handy reference guide A simple and straightforward approach to fabric dyeing makes playing with color fun and exciting Learn the basics and try a variety of specialty techniques such as twisting pleating layering and painting Dye in lots from 1/4 yard to 1 yard or use multipliers for more Now you have Linda's personal recipe book to mix any colors you can imagine Learn special techniques like how to make rainbows subtle gradations and unique patterns using common brands of dye and then use your hand dyed fabric for any project from quilt making to wearables to fiber art *Colours from Nature* Jenny Dean, 2009 The comprehensive recipe section gives instructions for over 100 colours using both traditional dyes such as cochineal indigo madder and weld and dyes from more common plants such as blackberry rhubarb oak and walnut Wild Colour Robert Murray-Smith, 2013 Natural dyes have been used for centuries Archaeologists have found evidence of textile dyeing dating back to the Neolithic period In China dyeing with plants barks and insects has been traced back more than 5 000 years The essential process of dyeing changed little over time Typically the dye material is put in a pot of water and then the textiles to be dyed are added to the pot which is heated and stirred until the colour is transferred Textile fibre may be dyed before spinning dyed in the wool but most textiles are yarn dyed or piece dyed after weaving Many natural dyes require the use of chemicals called mordants to bind the dye to the textile fibers tannin from oak galls salt natural alum vinegar and ammonia from stale urine if you are brave enough why not were used by early dyers Many mordants and some dyes themselves produce strong odours and large scale dye works were often isolated in their own districts Throughout history people have dyed their textiles using common locally available materials but scarce dyestuffs that produced brilliant and permanent colours such as the natural invertebrate dyes Tyrian purple and crimson kermes became highly prized luxury items in the ancient and medieval world Plant based dyes such as woad *Isatis tinctoria* indigo saffron and madder were raised commercially and were important trade goods in the economies of Asia and Europe Across Asia and Africa patterned fabrics were produced using resist dyeing techniques to control the absorption of colour in piece dyed cloth Materials such as cochineal and logwood *Haematoxylum campechianum* were brought to Europe by the Spanish treasure fleets and the dyestuffs of Europe were carried by colonists to America The discovery of man made synthetic dyes in the mid 19th century triggered a long decline in the large scale market for natural dyes Synthetic dyes which could be produced in large quantities and they quickly superseded natural dyes for the commercial textile production enabled by the industrial revolution and unlike natural dyes were suitable for the synthetic fibers that followed Artists of the Arts and Crafts Movement preferred the pure shades and subtle variability of

natural dyes which mellow with age but preserve their true colors unlike early synthetic dyes and helped ensure that the old European techniques for dyeing and printing with natural dyestuffs were preserved for use by home and craft dyers Natural dyeing techniques are also preserved by artisans in traditional cultures around the world Now the natural dyes are coming back We have become more concerned about the health and environmental impact of synthetic dyes in manufacturing and there is a growing demand for products that use natural dyes This little book is all about helping with that
