Ecology And Economics Of The Great Plains:

Ecology and Economics of the Great Plains Daniel S. Licht, 1997-01-01 The Great Plains were once characterized by vast expanses of grass complex interdependence among species and dynamic annual changes due to weather waterways and fire It is now generally accepted that less than one percent of the original tallgrass prairie remains Habitat fragmentation the loss of natural predator prey associations changes in species composition and various commercial practices continue to threaten grassland biodiversity Recently scholars and conservationists have discussed opportunities for large scale restoration projects in the Great Plains but they have provided few details Daniel Licht offers here a bold new approach to restoring and conserving the grassland ecosystem In describing hypothetical reserves he explains how they could help conserve grassland biodiversity reduce federal expenditures on agriculture increase recreational opportunities and sustain rural economies outside the reserves Conservation of Great Plains Ecosystems: Current Science, Future Options S.R. Johnson, Aziz Bouzaher, 2012-10-08 A multidisciplinary and multifaceted approach is employed to identify principal ecosystems and natural resources in the U S Great Plains that are at risk and that should receive priority for protection The authors are drawn from a variety of disciplines and approaches their ideas being presented as a pooling or harvest rather than as a consensus The 25 chapters provide background and in depth discussion of multiple issues problems related to Great Plains stewardship for future generations The status and trends of major resources of the Great Plains within an historical ecological and management framework are categorized according to common goals across the disciplines and can be used to make recommendations for public policy research and development and institutions The challenge for residents of the Great Plains is to merge multiple ecosystem concepts to improve the environment and to improve economic vitality
