**Ecology of Human Development** Urie Bronfenbrenner, 1979-06-04 Here is a book that challenges the very basis of the way psychologists have studied child development According to Urie Bronfenbrenner one of the world's foremost developmental psychologists laboratory studies of the child's behavior sacrifice too much in order to gain experimental control and analytic rigor Laboratory observations he argues too often lead to the science of the strange behavior of children in strange situations with strange adults for the briefest possible periods of time To understand the way children actually develop Bronfenbrenner believes that it will be necessary to observe their behavior in natural settings while they are interacting with familiar adults over prolonged periods of time This book offers an important blueprint for constructing such a new and ecologically valid psychology of development The blueprint includes a complete conceptual framework for analysing the layers of the environment that have a formative influence on the child This framework is applied to a variety of settings in which children commonly develop ranging from the pediatric ward to daycare school and various family configurations The result is a rich set of hypotheses about the developmental consequences of various types of environments Where current research bears on these hypotheses Bronfenbrenner marshals the data to show how an ecological theory can be tested Where no relevant data exist he suggests new and interesting ecological experiments that might be undertaken to resolve current unknowns

Bronfenbrenner's groundbreaking program for reform in developmental psychology is certain to be controversial. His argument flies in the face of standard psychological procedures and challenges psychology to become more relevant to the ways in which children actually develop. **Handbook of Parenting** Marc H. Bornstein, 2019-02-01 This highly anticipated third edition of the Handbook of Parenting brings together an array of field-leading experts who have worked in different ways toward understanding the many diverse aspects of parenting. Contributors to the Handbook look to the most recent research and thinking to shed light on topics every parent, professional, and policymaker wonders about. Parenting is a perennially hot topic. After all, everyone who has ever lived has been parented, and the vast majority of people become parents themselves. No wonder bookstores, house shelves, and how-to parenting books and magazine racks in pharmacies and airports overflow with periodicals that feature parenting advice. However, almost none of these is evidence-based. The Handbook of Parenting is Period. Each chapter has been written to be read and absorbed in a single sitting and includes historical considerations of the topic, a discussion of central issues and theory, a review of classical and modern research, and forecasts of future directions of theory and research. Together, the five volumes in the Handbook cover Children and Parenting, the Biology and Ecology of Parenting, Being and Becoming a Parent, Social Conditions and Applied Parenting, and the Practice of Parenting. Volume 4, Social Conditions and Applied Parenting, describes socially defined groups of parents and social conditions that promote variation in parenting. The chapters in Part I on Social and Cultural Conditions of Parenting start with a relational, developmental systems perspective on parenting and move to considerations of ethnic and minority parenting among Latino and Latin Americans, African Americans, Asians, and Asian Americans, Indigenous parents, and immigrant parents. The section concludes with considerations of disabilities, employment, and poverty on parenting. Parents are ordinarily the most consistent and caring people in children's lives. However, parenting does not always go right or well. Information, education, and support programs can remedy potential ills. The chapters in Part II on Applied Issues in Parenting begin with how parenting is measured and follow with examinations of maternal deprivation, attachment, and acceptance/rejection in parenting. Serious challenges to parenting, some common such as stress and depression, and some less common such as substance abuse, psychopathology, maltreatment, and incarceration are addressed, as are parenting interventions intended to redress these.
