Doherty, 2000-06-08 This book represents a critical yet constructive reappraisal of the role and the limits of the boundaries that define and separate disciplines and subfields in the social sciences as well as the boundaries that divide distinct research traditions or paradigms in the analysis of international life It provides an integrative and eclectic examination of the virtues of a more flexible division of labor a division that facilitates more meaningful communication among scholars of different methodological persuasions investigating similar problems in international life Part One addresses concrete issues in international studies ranging from international bargaining and interdependence to conceptions of collective identity The essays therein serve as creative models for integrating concepts and analytic logics from different theoretical frameworks rooted in different disciplines Part Two shifts the focus to more wide ranging questions in the philosophy of the social sciences and the organization of social science research in order to shed new light on the value and validity of boundaries currently drawn between different schools sects disciplines and subfields Contributors include Tadashi Anno Jean Marc F Blanchard Anne L Clunan Eileen M Doherty Wade L Huntley Timothy W Luke Norrin M Ripsman and Rudra Sil     **Globalization, Security, and the Nation State** Ersel Aydinli, James N. **When Leaders Learn and When They Don't** Akan Malici,2009-01-01 When Leaders Learn and When They Don't investigates two extraordinary leaders Mikhail Gorbachev and Kim Il Sung by employing sophisticated methodologies and advancing a new theory of foreign policy decision making Both leaders redefined the theory and practice of international relations and left a heritage that we face today a unipolar world in which security threats no longer emanate from the rivalry of two superpowers but rather from the existence of rogue states such as North Korea Akan Malici demonstrates how Gorbachev moved the antagonistic superpower relationship toward a Kantian world of friends while Kim reified a Hobbesian world of enemies at the end of the Cold War The book carries implications about declining and newly emerging threats as the configuration of the international system changes

**Who Gets What?** Aslaug Asgeirsdottir,2009-07-01 Examines the domestic constraints negotiators operate under when nations seek to cooperate

**The Arab-Israeli Conflict Transformed** Hemda Ben-Yehuda,Shmuel Sandler,2012-02-01 The Middle East conflict be it between the state of Israel and Arab states or between Jews and Palestinians is a staple of international news Utilizing both theoretical approaches and empirical evidence Hemda Ben Yehuda and Shmuel Sandler argue that despite the recent upswing in violence particularly over the Palestinian issue conflict has gradually been giving way since the 1970s to a more orderly regime of conflict management By integrating ethnonational theoretical literature into their analysis the authors move beyond the current International Relations debate over the relative merits of realist neo realist approaches versus neo liberal institutional approaches Ethnic state disputes are the primary source for failing to terminate the Arab Israeli conflict

**Life After the Soviet Union** Nozar Alaolmolki,2001-10-19 Examines the political social and economic issues confronted by each of the newly independent republics in the Transcaucasus and Central Asian regions

**United We Stand?** Aaron Belkin,2012-02-01 It has long been assumed that leaders engage in international conflict to unify their followers what is often called the rally round the flag hypothesis Despite its intuitive appeal however this hypothesis does not always provide a compelling explanation of the relationship between domestic politics and international conflict In United We Stand Aaron Belkin shows that in one important realm civil military relations leaders often prefer divisiveness over cohesion When they feel domestically vulnerable leaders use international conflict in order to create and exacerbate rivalries among their own military forces to lower the risk of a coup and to contribute to the consolidation and stability of the political order Case studies include post Soviet Georgia and Syria

**Crisis Theory and World Order** Norman K. Swazo,2002-09-26 Uses Heidegger's philosophy to critique and remedy world order thinking in international politics

**The Multi-Governance of Water** Matthias Finger,Ludivine Tamiotti,Jeremy Allouche,2012-02-01

As the governance of transboundary rivers becomes a subject of growing importance due to the increasing pressure on freshwater resources this timely collection examines water scarcity and efforts to better manage rivers and river basins Most specialists agree that states face many institutional inadequacies when dealing with shared resources and that new governance mechanisms are needed to improve water management Using case studies of the Aral Sea basin and the Danube Euphrates and Mekong river basins the contributors develop a new approach to water governance the concept of multi governance an effort to collectively solve public problems by involving a series of relevant actors from the local to the global level such as institutions states civil society and business      **Counter-Hegemony and Foreign Policy** Randolph B.

    **Imperialism and Internationalism in the Discipline of International Relations** David Long,Brian C.

Schmidt,2006-01-01 What were the guiding themes of the discipline of International Relations before World War II The traditional disciplinary history has long viewed this time period as one guided by idealism and then challenged by realism This book reconstructs in detail some of the formative episodes of the field s early development and arrives at the conclusion that in actuality the early years of International Relations were preoccupied not with idealism and realism but with the dual themes of imperialism and internationalism Thus the beginnings of the discipline have resonance with the recently revived discourse of empire and the global status and policies of the United States as the world s sole superpower

**Social Construction and the Logic of Money** J. Samuel Barkin,2012-02-01 While other studies of international leadership have looked at a variety of measures to predict behavior this book demonstrates that the key factor is international finance J Samuel Barkin uses an innovative blend of rationalist and constructivist methodologies approaches to international political economy that normally exist in isolation from one another Barkin argues that the level of a country s involvement in international finance specifically motivates it to lead This is particularly relevant today given the on going discussions on how to respond to local and global financial crises Barkin illustrates his theory with an episodic history of international monetary leadership over the last four centuries Dutch leadership in the seventeenth century British leadership in the nineteenth the failure of leadership in the interwar era and Great Depression and the role of the U S in the construction of an international economic infrastructure since World War II
