In monitoring its implementation two key approaches are evident a qualitative bottom up participatory approach and an approach that uses quantitative indicators to monitor sustainable progress and policies. With the European Centre for Social Welfare Policy and Research playing a pivotal role in the monitoring of the implementation process one of its key tasks has been to develop a list of indicators of achievement. This book contains extended and revised versions of policy briefs and background papers that support the implementation monitoring process. The analyses included in these chapters make concrete suggestions towards quantitative indicators with the aim of assisting national governments in mainstreaming ageing in their policies. The contributors provide an overview of the current situation with respect to population ageing and its consequences and also provide projections for the future. The book also includes the final list of quantitative indicators that arose out of consultations with international experts related to the four main topics addressed demography income and wealth labour market participation and social protection and financial sustainability. *OECD Economic Surveys: Italy 2009* OECD,2009-06-17 OECD's periodic review of Italy's economy.
