Economic Geographies Circuits Flows And Spaces:

Economic Geographies Ray Hudson, 2004 **The Economic Geographies of Organized Crime** Tim Hall, 2018-02-26

Illicit and illegal markets play a substantial role in the global economy yet have received little attention from economic geographers. This incisive innovative book examines the spatial dimensions of hidden economic practices and asks how organized crime can be understood empirically and conceptually through a geographical lens. Going beyond stereotypes about gangsters, the book explores the role of spatially distant corporate state and criminal actors in such activities as trafficking and smuggling of drugs, people and goods, counterfeiting, cybercrime, corruption, money laundering, financing of terrorist groups and environmental crime. It suggests ways that a geographical analysis can contribute to improving policies and practices to curb organized crime at the regional, national and global levels.

The SAGE Handbook of Social Geographies Susan Smith, 2010. With clarity and confidence, this vibrant volume summons up the social in geography in ways that will excite students and scholars alike. Here, the social is populated not only by society but by culture, nature, economy and politics. Kay Anderson, University of Western Sydney. This is a remarkable collection full of intellectual gems. It not only summarises the field of social geography and restates its importance but also produces a manifesto for how the field should look in the future. Nigel Thrift, Vice Chancellor, University of Warwick. The book aims to be accessible to students and specialists alike. Its success lies in emphasizing the crossovers between geography and social studies. The good editorial work is evident and the participating contributors are well established scholars in their respective fields. Miron M. Denan, Geography Research Forum. An excellent handbook that will attract a diversity of readers. It will inspire undergraduate, postgraduate students and stimulate lecturers, researchers interested in the complexity and diversity of the social realm. As the first of its kind in the sub-discipline, it is a book that is enjoyable to read and will definitely add value to a personal or library collection. Michele Lobo, New Zealand Geographer. The social relations of difference, from race and class to gender and inequality, are at the heart of the concept of social geography. This handbook reconsiders and redirects research in the discipline while examining the changing ideas of individuals and their relationship with structures of power. Organised into five sections, the SAGE Handbook of Social Geographies maps out the connections anchored in social geography. Difference and Diversity builds on enduring ideas of the structuring of social relations and examines the ruptures and rifts and continuities and connections around social divisions. Geographies and Social Economies rethinks the sociality, subjectivity and placement of money, markets, price and value. Geographies of Wellbeing builds from a foundation of work on the spaces of fear, anxiety and disease towards newer concerns with geographies of health, resilience and contentment. Geographies of Social Justice connects ideas through an examination of the possibilities and practicalities of normative theory and frames the central notion of social geography that things always could and should be different. Doing Social Geography is not exploring the how to of research but rather the entanglement of it with practicalities, moralities and politics. This will be an essential

resource for academics researchers practitioners and postgraduates across human geography

Economic Geographies of Globalisation Martin Sokol, 2011 This introductory text is about economic geography and globalization in all their different stripes and colours It introduces clearly the subject matters in economic geography through a wide range of important conceptual lenses and theoretical perspectives It does so without a facts based rendition of what globalization actually is Instead Sokol offers a refreshingly light touch on the various approaches in understanding contemporary economic geographies and applies these conceptual insights in a helpful and straightforward manner to our appreciation of such key challenges of globalization as inequality instability and uneven development It is both wide in coverage and contemporary in relevance The text will be well adopted in courses on economic geography global studies development studies and international political economy Henry Yeung National University of Singapore Telling it like it is in a direct and engaging style this is a book without preconceptions It is a vital intervention that makes sense of the sorry state of the contemporary global economy and its formative geographies and shows what is involved in constructing an alternative Roger Lee Queen Mary University of London UK This well researched book provides a concise contribution to a large scale debate on economic globalisation Martin Sokol introduces key theoretical approaches that help us to understand how economies work why they suffer recessions and crises and why economic inequalities at various levels are growing in the context of globalisation He introduces key economic geography concepts and theories demonstrating their application to our contemporary globalising world The role that economic geography may play in informing policymaking is highlighted and debates surrounding the recent global financial and economic crisis are expounded This highly accessible book will prove an essential reference tool for academics students and researchers focusing on geography economics planning and regional development development studies international politics and international business Policymakers and practitioners in local regional and national authorities international bodies and non governmental organisations will also find this book to be an invaluable resource

Smith,2015-05-22 This book examines the illegal behaviour of entrepreneurs and discusses how criminal entrepreneurs acquire information learn from their entrepreneurial experiences and utilize acquired knowledge to develop their organizations **Entrepreneurship in the Informal Sector** Colin C. Williams,2017-09-22 How many businesses start ups conduct some or all of their trade off the books And how many enterprises continue to do some of their work off the books once they are more established What should be done about them Should governments adopt ever more punitive measures to eradicate them Or should we recognise this hidden enterprise culture and attempt to harness it If so how can this be done What measures can be taken to ensure that businesses start up in a proper manner And what can be done to help those

enterprises and entrepreneurs currently working off the books to legitimise their businesses The aim of this book is to advance a new way of answering these questions Drawing inspiration from institutional theory informal sector entrepreneurship is explained as resulting from the asymmetry between the codified laws and regulations of a society s formal institutions and the norms values and beliefs that comprise a society s informal institutions The argument is that if the norms values and beliefs of entrepreneurs i e their individual morality were wholly aligned with the codified laws and regulations i e state morality there would be no informal sector entrepreneurship However because the individual morality of entrepreneurs differs from state morality such as due to their lack of trust in government and the rule of law the result is the prevalence of informal sector entrepreneurship The greater the degree of institutional asymmetry the higher is the propensity to engage in informal sector entrepreneurship This book provides evidence to show that this is the case both at the individual and country level and then discusses how this can be overcome Routledge Handbook of Entrepreneurship in Developing Economies Colin C. Williams, Anjula Gurtoo, 2016-07-22 The Routledge Handbook of Entrepreneurship in Developing Economies is a landmark volume that offers a uniquely comprehensive overview of entrepreneurship in developing countries Addressing the multi faceted nature of entrepreneurship chapters explore a vast range of subject areas including education economic policy gender and the prevalence and nature of informal sector entrepreneurship In order to understand the process of new venture creation in developing economies what it means to be engaged in entrepreneurship in a developing world context must be addressed This handbook does so by exploring the difficulties risks and rewards associated with being an entrepreneur and evaluates the impacts of the environment relationships performance and policy dynamics on small and entrepreneurial firms in developing economies The handbook brings together a unique collection of over forty international researchers who are all actively engaged in studying entrepreneurship in a developing world context The chapters offer concise but detailed perspectives and explanations on key aspects of the subject across a diverse array of developing economies spanning Africa Asia Latin America and Eastern Europe In doing so the chapters highlight the heterogeneity of entrepreneurship in developed economies and contribute to the on going policy discourses for managing and promoting entrepreneurial growth in the developing world The book will be of great interest to scholars students and policymakers in the areas of development economics business and management public policy and development studies

Visitor Attractions and Events Adi Weidenfeld, Richard Butler, Allan M. Williams, 2016-04-28 Both visitor attractions and events play pivotal roles in the appeal of tourism destination regions to visitors by virtue of being the main motivator of tourist trips and determining consumers choices However more recently visitor attractions have become more multifaceted have proliferated and fragmented in terms of form location scale and style and their role is undergoing major changes in a post modern world as a result of consumer demands and competitive innovations Visitor Attractions and Events for the first time theoretically and empirically explores the relations between events and attractions to offer new thinking of the role of

space and place in shaping development management practices and strategies in the sector as well as future implications The book reveals how location is pivotal in the development planning and management of visitor attractions and events Whereas the location of natural attractions is relatively fixed in space and their locations cannot be predetermined or relocated human made or contrived attractions are more influenced by the planning process in the context of the locational decision making process Competition and cooperation between visitor attractions and the aspects which shape these relations including complementarities compatibility knowledge spill overs and diffusion of innovations product similarities and spatial proximity remain largely ignored in the visitor attraction sector and thus are major elements in the focus of this book Comparative examples ranging from small to major attractions in a wide variety of locations are included This significant volume will appeal widely to all those interested in the visitor sector such as tourism events leisure studies destination management and sociology

Measuring the Global Shadow Economy Colin C. Williams,Friedrich Schneider,2016-01-29 This book brings together two leading researchers in the field to provide a comprehensive overview of the shadow economy from a global perspective Reviewing the advantages and disadvantages of different ways of measuring the informal sector the authors evaluate its size and key determinants across the world Williams and Schneider clearly establish the persistence and prevalence of the shadow economy analysing the narrowness of existing policy approaches and explaining how these fail to address the key factors for its existence and may even exacerbate the problem Proposing an alternative way forward the authors argue that little headway will ever be made in reducing the shadow economy until there are changes not only to the character of formal institutions but also informal institutions the values beliefs and norms of citizens through the introduction of macro level structural changes This timely cutting edge review of the global shadow economy and how it can be measured and tackled is an invaluable resource for postgraduate students researchers and policy makers particularly those with a interest in tax evasion and informal labour

Informal Ethnic Entrepreneurship Veland Ramadani,Léo-Paul Dana,Vanessa Ratten,Abdylmenaf Bexheti,2018-10-03 This book presents a curated collection of research on ethnic entrepreneurship focusing on the informal sector The common theme of the expert contributions is that entrepreneurial motivation to start informal business is paramount to ethnic groups In particular the book explores the factors influencing ethnic groups to start informal businesses and how this creates innovative business activity It also charts the evolution of ethnic entrepreneurship and informal businesses in advanced and emerging economies the diversity of entrepreneurial strategies the economics of co ethnic employment and the issues surrounding immigrant entrepreneurship The book is a valuable resource for researchers in the field of informal ethnic entrepreneurship as well as for policy makers and entrepreneurs

Peripheralization Matthias Naumann,Andrea Fischer-Tahir,2013-01-12 Peripheries emerge as a result of shifts in economic and political decision making at various scales Therefore peripheral spaces are not a natural phenomenon but an outcome of the intrinsic logic of uneven geographical development in capitalist societies Discussing

examples from Germany Eastern Europe Turkey Iraqi Kurdistan Pakistan India and Brazil the volume describes the social production of peripheries from different theoretical and methodological perspectives In so doing it argues in favour of a re politicization of the recent debate on peripheralization
