Economic Horror:

The Economic Horror Viviane Forrester, 1999-08-10 The Economic Horror is an impassioned book addressed to the dominant political and economic elites in our society Those in power Forrester tells us continue to present employment as the norm and by doing so make the unemployed feel worthless

Handbook of the History of Economic Thought Jürgen Backhaus, 2011-11-12 This reader in the history of economic thought challenges the assumption that today's prevailing economic theories are always the most appropriate ones As Leland Yeager has pointed out unlike the scientists of the natural sciences economists provide their ideas largely to politicians and political appointees who have rather different incentives that might prevent them from choosing the best economic theory In this book the life and work of each of the founders of economics is examined by the best available expert on that founding figure These contributors present rather novel and certainly not mainstream interpretations of the founders of modern economics The primary theme concerns the development of economic thought as this emerged in the various continental traditions including the Islamic tradition These continental traditions differed substantially both substantively and methodologically from the Anglo Saxon orientation that has been dominant in the last century for example in the study of public finance or the very construct of the state itself This book maps the various channels of continental economics particularly from the late 18th through the early 20th centuries explaining and demonstrating the underlying unity amid the surface diversity In particular the book emphasizes the writings of John Stuart Mill his predecessor David Ricardo and his follower Jeremy Bentham the theory of Marginalism by von Thünen Cournot and Gossen the legacy of Karl Marx the innovations in developmental economics by Friedrich List the economic and monetary contributions and struggle of escape by John Maynard Keynes the formidable theory in public finance and economics by Joseph Schumpeter a reinterpretation of Alfred Marshall Léon Walras Heinrich von Stackelberg Knut Wicksell Werner Sombart and Friedrich August von Hayek are each dealt with in their own right

Economic Fables Ariel Rubinstein, 2012 I had the good fortune to grow up in a wonderful area of Jerusalem surrounded by a diverse range of people Rabbi Meizel the communist Sala Marcel my widowed Aunt Hannah and the intellectual Yaacovson As far as I'm concerned the opinion of such people is just as authoritative for making social and economic decisions as the opinion of an expert using a model Part memoir part crash course in economic theory this deeply engaging book by one of the world's foremost economists looks at economic ideas through a personal lens Together with an introduction to some of the central concepts in modern economic thought Ariel Rubinstein offers some powerful and entertaining reflections on his childhood family and career In doing so he challenges many of the central tenets of game theory and sheds light on the role economics can play in society at large Economic Fables is as thought provoking for seasoned economists as it is enlightening for newcomers to the field

approach to analyze the globalization of the world economy this provocative and topical new book presents economic globalization not as a recent development but rather as a familiar process that has occurred throughout history Michael McKinley argues that it is ultimately a self serving arbitrary and destructive imperial project that should be viewed as a religious war **The Great Recession in Fiction, Film, and Television** Kirk Boyle,Daniel Mrozowski,2013-10-17 The Great Recession in Fiction Film and Television Twenty First Century Bust Culture sheds light on how imaginary works of fiction film and television reflect refract and respond to the recessionary times specific to the twenty first century a sustained period of economic crisis that has earned the title the Great Recession This collection takes as its focus Bust Culture a concept that refers to post crash popular culture specifically the kind mass produced by multinational corporations in the age of media conglomeration which is inflected by diminishment influenced by scarcity and infused with anxiety The multidisciplinary contributors collected here examine mass culture not typically included in discussions of the financial meltdown from disaster films to reality TV hoarders the horror genre to reactionary representations of women Christian right radio to Batman television characters of color to graphic novels and literary fiction The collected essays treat our busted culture as a seismograph that registers the traumas of collapse and locate their pop artifacts along a spectrum of ideological fantasies social erasures and profound fears inspired by the Great Recession What they discover from these unlikely indicators of the recession is a mix of regressive progressive and bemused texts in need of critical translation **Economics**

as Rhetoric Anne Isla,2024-07-26 Bernard Maris was killed in Paris on January 7 2015 during the terrorist attack against the satirical magazine Charlie Hebdo He remains one of the most original intellectuals of contemporary France but despite being a uniquely original heterodox thinker his international reputation has been compromised by the fact that his writings are inaccessible to non French speakers This book remedies that By providing an overview of Bernard Maris life and intellectual trajectory as well as an English translation of an anthology of his most relevant writings this volume provides the international audience for the first time ever the chance to know and understand the contribution of this major heterodox economist An outstanding and atypical figure in economic thought and a virulent critic of mainstream dominant economics

he was also an all round actor and thinker of his time Through rigorous reasoning he questioned the notion of well being which he argued is too often conflated with having more Enslavement by work or the endless destructive accumulation of natural wealth is also inherent to the capitalist system Probably his most original contribution is his epistemological reflection on the very nature of economics and his appraisal of this discipline as a form of rhetoric This book will be of great interest to readers in heterodox economics economic methodology epistemology and French literature and culture more broadly
