Aspects of Independent Romania's Economic History with Particular Reference to Transition for EU Accession

David Turnock, 2016-04-15 After fifteen years of transition in the former communist states of Central and Eastern Europe it has become clear that for a substantial number the objective of reform and restructuring process is a market system in line with membership of the EU In this study the long term economic transformation of Romania is studied offering a detailed narrative and thematic account of events from the nineteenth to the twenty first centuries From the first steps towards large scale industrialisation begun prior to the First World War through the accelerated pace set by the communist regime after 1945 and the uncertainty following its subsequent collapse in 1989 the book addresses a wide range of pertinent issues that have shaped Romania's economic development The study also offers an interpretation of a distinctive phase in the modernisation of post communist Romania supported by economic historical surveys of the preceding century as a context for recent restructuring on the eve of EU accession This is linked with trends in the region as a whole so that a broad perspective is maintained throughout the book By highlighting Romania's position as one of more backward accession states and considering in what ways its experience during transition differs from the more developed states of the region this study offers a valuable insight into both the history of Romania and its future prospects Furthermore it provides a valuable case study that can be compared and contrasted with other countries who are likewise still grappling with the legacy of a centralised economy and in the process of adopting a more market orientated approach in order to gain EU membership As such this study will be of interest not only to historians and economists but anyone with an interest in the expansion of the European Union Overseas Business Reports , 1971 **Romania**

States. Congress. Joint Economic Committee,1974 Industrial Cooperation between East and West Friedrich Levčik,Jan Stankovsky,2017-09-08 This title was first published in 1979 A number of valuable and interesting publications have appeared in the last few years on East West cooperation These studies which by means of interviews and direct contacts with the firms concerned have shed some light on a subject that in the past had remained little known also provided us with extremely valuable incentives Most of these studies dealt only with individual aspects of cooperation particularly the legal and microeconomic aspects The quantitative data used however did not easily lend themselves to comparison Eastern European studies more often contained the views of the respective governments than the experiences of enterprises involved in cooperative undertakings In this book the authors have attempted to provide a unified picture of the most important problems of East West cooperation The motivations and goals of those concerned in all their microeconomic macroeconomic commercial and political aspects are brought together with the pertinent legal and institutional factors and are analyzed
