Economics A Critical Approach A Critical Approach:

Economics: a Critical Approach Marcel Alfons Gilbert van Meerhaeghe, 1971 **Critical Approaches to Security** Laura J. Shepherd, 2013 Focusing on critical approaches to security this new textbook offers readers both an overview of the key theoretical perspectives and a variety of methodological techniques With a careful explication of core concepts in each chapter and an introduction that traces the development of critical approaches to security this textbook will encourage all those who engage with it to develop a curiosity about the study and practices of security politics Challenging the assumptions of conventional theories and approaches unsettling that which was previously taken for granted these are among the ways in which such a curiosity works Through its attention to the fact that and the ways in which security matters in global politics this work will both pioneer new ways of studying security and acknowledge the noteworthy scholarship without which it could not have been thought This textbook will be essential reading to advanced undergraduate and postgraduate students of critical security studies and highly recommended to students of traditional security studies International Relations and Politics **Critical Theory and Economics** Robin Maialeh, 2023-03-23 This book expands upon a range of economic insights within the overall context of critical theory particularly with respect to the question of socioeconomic inequalities and presents an explanation of how critical theory provides a number of interesting perspectives for economists Economic agents deliberately imprisoned in their instrumental rationality as a means to survive under competitive relationships are microscopic constituents of systemic forces which exist beyond their will Despite the subjective rationality of such agents in terms of formally logical transitivity and consistency aggregate market distributional mechanisms also display non rational patterns The crucial aspect of the dynamics of this system consists of the paralysing effect of the high level of socioeconomic inequality which is driven by a permanent struggle for self preservation under competitive rules it is a reminiscence of natural uncivilised relationships that constituted the reproduction process of the whole These reified agents thus become instruments of their socially constructed powers on the one hand and objects of their existential conditionality on the other Hence the dialectical approach adopted by the author aims to uncover the way in which structurally genetic market forces govern individual behaviour as well as how individual behaviour shapes these structurally genetic forces which together form the transcending principles of unequal distribution This book will be of particular interest to scholars of the political economy philosophy and the methodology of the social sciences especially those concerned with inequality issues This book includes a preface written by Professor Martin Jay Principles and Pluralist Approaches in Teaching Economics Samuel Decker, Wolfram Elsner, Svenja Flechtner, 2019-06-28 This volume is a state of the art compilation of diverse and innovative perspectives principles and a number of practiced approaches of fields courses and methods of pluralist economics teaching It fosters constructive controversy aiming to incite authors and commentators to engage in fruitful debate The complex economic problems of the 21st century require a pluralist real world oriented and innovative discipline of economics capable

of addressing and teaching those complex issues to students from diverse perspectives This volume addresses a number of key questions Which models could be taught outside the equilibrium and optimality paradigm Which methods could help to improve our understanding of the complex globalized economy How can qualitative and quantitative methods be combined in a fruitful way to analyze complex economic problems How can the academic isolation of mainstream economics that has developed over many decades be overcome despite its attempted transdisciplinary imperialism What role should knowledge from other disciplines play in teaching economics and what is the relevance of transdisciplinarity Through examining these issues the editors and authors have created a pluralist but cohesive book on teaching economics in the contemporary classroom drawing from ideas and examples from around the world Principles and Pluralist Approaches in Teaching Economics is a unique collection of diverse perspectives on the methodology and applications of pluralist economics teaching It will be a great resource for those teaching economics at various levels as well as researchers and intermediate and advanced students searching for pluralism in economics

A Socially Critical View Of The Self-Managing School John Smyth, 2005-09-21 The shift from the model of central government educational control to school based management has been widely adopted and acclaimed and has created the general impression of increased democracy and participation The international contributors to this book tackle this important policy issue and look behind the scenes of the moves towards school self management They investigate the phenomenon of the self managing school Why It Is Happening Now What Is The Truth Behind This Notion And The problems which lie behind devolution and self management The self managing school it is claimed is not about grassroots democracy or parent participation but absolutely the reverse and this contradiction is best understood in terms of the ideology of the New Right Enlightened and informed perspectives of the reality behind school self management suggest that the devolution of power is only superficial Hierarchies continue to exist as unequally funded schools which perpetuate class gender and ethnic divisions The mechanism involved promotes the Survival Of The Fittest Through Notions Of Choice

For Those Involved in school management and education generally this book should provide a useful insight into the struggle surrounding the control of schooling

Ricca Peter Coogan Leonard Rifas Jennifer K Stuller Ana Merino Mel Gibson Jeffrey A Brown Brian Swafford A Critical History of the Economy Ryan Walter, 2013-03-01 Drawing on recent debates in critical International Political Economy this book mobilizes the idea that the economy does not exist separately from society and politics to develop a detailed intellectual history of how the economy came to be seen as an independent domain In contrast to typical approaches to writing the history of economic thought which assume the reality of the economy the author describes the forms of intellectual argument that made it possible to conceive of the national and international economies as objects of intellectual inquiry At the centre of this process was the analytical separation of power and wealth Walter thus offers a broad historical perspective on the emergence of current IPE theory while linking the field with contextualist intellectual history This important and innovative volume will be of strong interest to students and scholars of International Political Economy International Relations Economics History and Political Theory **Studies in Economic History** George Unwin, 1927 List of published works of George Unwin pages 465 471 Imprint covered by label A M Kelley New York **Understanding Development Economics** Adam Fforde, 2014-01-03 Important parts of development practice especially in key institutions such as the World Bank are dominated by economists In contrast Development Studies is largely based upon multidisciplinary work in which anthropologists human geographers sociologists and others play important roles Hence a tension has arisen between the claims made by Development Economics to be a scientific measurable discipline prone to wide usage of mathematical modelling and the more discursive practice based approach favoured by Development Studies The aim of this book is to show how the two disciplines have interacted as well as how they differ This is crucial in forming an understanding of development work and to thinking about why policy recommendations can often lead to severe and continuing problems in developing countries This book introduces Development Economics to those coming from two different but linked perspectives economists and students of development who are not economists In both explaining and critiquing Development Economics the book is able to suggest the implications of these findings for Development Studies and more broadly for development policy and its outcomes *New Directions in Economic Methodology* Roger Backhouse, 1994 In recent years there has been a flowering of work on economic methodology However there is no longer any consensus about which direction this should take or indeed even what the role and content of economic methodology should be This book reflects this diversity Its contributors are responsible for the major developments in this field and together they give an account of all the major positions which currently prevail in economic methodology These include attempts to rehabilitate the falsification of Kuhn Lakatos and Popper sociology of knowledge approaches different forms of realism contributions from the rhetoric project and other perspectives which view the economy as a text Narrating Heritage Veysel Apaydin, 2023-11-02 Narrating Heritage critically examines the links among heritage rights and social justice This book brings important original ethnographic research and unique case studies together in a coherent and cohesive way to examine patterns and differences of approaches

to heritage It exposes discourses of the uses and abuses of heritage and provides narratives of persistence demonstrating the importance of heritage in securing human rights and social justice Drawing on over ten years of research and ethnographic fieldwork based on six complex case studies from Turkey and comparing them with case studies from across the world the book explores a variety of social political cultural and economic heritage discourses making explicit the relationship between cultural and natural heritage This book expands on these discourses by examining the role of violence in heritage expanding on the concepts of both direct and slow violence It situates heritage discourse within the sphere of human rights and lays out redistribution recognition and representation as dimensions of social justice in a heritage context The case studies in this volume explore multiple themes from the links between cultural performance and the construction of collective identity and sense of belonging to the roles of education learning about other cultures and nationalist use of education They also discuss the relationship between construction of heritage space and access and exclusion as well as the impact of authoritarianism and heavy neoliberal policies on heritage making
