New Limits on European Agriculture François Duchêne, Edward Szczepanik, Wilfrid Legg, 2023-07-26 Until about 1970 Western Europe was regarded as the great food importing region of the world Over the next 15 years it also became a major food exporter This study originally published in 1985 analyses the expansionary policies of individual nations as well as those of the Community itself which have helped produce this momentous reversal of Western Europe's traditional role The phenomenon in the international food market is reviewed within the context of the economic and political forces responsible for changes in Western European agriculture during the late 20th Century

The Political Economy of the Common Agricultural Policy Fernando Collantes, 2020-03-19 What is the balance of the European Union's Common Agricultural Policy more than half a century after its birth Does it illustrate the virtues of the European model of coordinated capitalism as opposed to US style liberal capitalism Or is it an incoherent set of instruments that exert diverse negative impacts and like Frankenstein's monster seems to have escaped the control of its designers The Political Economy of the Common Agricultural Policy does not criticize the CAP from the liberal standpoint that views most public interventions in the economy as bad for efficiency and welfare The CAP has been costly to Europeans both as consumers and as taxpayers and has also generated a number of negative impacts upon third countries but these costs and impacts have been more moderate than is suggested This book proposes that the issue with the CAP is not a generic problem of coordinating capitalism but instead a more specific problem of low quality coordination The text argues that profound reform of the European Union's institutions and policies is required to counter the rapid rise of a more Eurosceptical state of mind but in the case of agricultural policy history casts serious doubts on the capacity of the European network of agriculture related politicians to lead such a reform This key work is essential reading for researchers graduate students and master's level docents of the Common Agricultural Policy and more broadly European Union policy and reform
