

...times the need to study and design intelligent control models to operate and control the power system. The power system is a complex system that includes many components, such as power sources to consumers in an efficient manner. A smart control model includes several models, where one of the important models is a forecasting power load model. This study aims to provide a brief description of power load forecasting systems.

Figure 1. Power Load Balance. The balancing between the generated and consumed power, this is one of the main tasks of the distribution power system for producing power with good quality.
