    Object-oriented Programming - ECOOP'96 ,1996   **Object-Oriented Programming A Unified Foundation** Giuseppe Castagna,2012-12-06 by Luea Cardelli Ever since Strachey s work in the 1960 s polymorphism has been classified into the parametric and overloading varieties Parametric polymorphism has been the subject of extensive study for over two decades Overloading on the other hand has often been considered too ad hoc to deserve much attention even though it has been in some form an ingredient of virtually every programming lan guage much more so than parametric polymorphism With the introduction of object oriented languages and in particular with multiple dispatch object oriented languages overloading has become less of a programming convenience and more of a fundamental feature in need of proper explanation This book provides a compelling framework for the study of run time over loading and of its interactions with subtyping and with parametric polymorphism The book also describes applications to object oriented programming This new framework is motivated by the relatively recent spread of programming languages that are entirely based on run time overloading this fact probably explains why this subject was not investigated earlier Once properly understood overloading reveals itself relevant also to the study of older and more conventional single dispatch object oriented languages clarifying delicate issues of covariance and contravariance of method types and of run time type analysis In the final chapters a synthesis is made between parametric and overloading polymorphism   <u>Euro-Par '96 - Parallel Processing</u> Luc Bouge,1996-08-14 Content Description Includes bibliographical references and index   **ECOOP '96 Workshop on Prototype Based Object Oriented Programming** Johannes Kepler University of Linz. Institute of Computer Science,1996   **Metalevel Architectures and Separation of Crosscutting Concerns** Akinori Yonezawa,Satoshi Matsuoka,2003-06-30 This volume constitutes the proceedings of REFLECTION 2001 the Third Int national Conference on Metalevel Architectures and Separation of Crosscutting Concerns which was held in Kyoto September 25 28 2001 Metalevel architectures and re ection have drawn the attention of researchers and practitioners throughout computer science Re ective and metalevel te niques

are being used to address real world problems in such areas as progr ming languages operating systems databases distributed computing expert systems and web computing Separation of concerns has been a guiding principle of software engineering for nearly 30 years but its known bene ts are seldom fully achieved in practice This is primarily because traditional mechanisms are not powerful enough to handle many kinds of concerns that occur in practice Over the last 10 years to overcome the limitations of traditional frameworks many researchers including several from the re ection community have proposed new approaches For the rst time papers on advanced approaches to separation of concerns were explicitly solicited Following the success of previous conferences such as IMSA 92 in Tokyo Re ection 96 in San Francisco and Re ection 99 in Saint Malo we hope that the conference provided an excellent forum for researchers with a broad range of interests in metalevel architectures re ective techniques and separation of concerns in general *Object-Oriented Information Systems* Zohra Bellahsene,Dilip Patel,Colette Rolland,2003-08-02 This book constitutes the refereed proceedings of the 8th International Conference on Object Oriented Information Systems OOIS 2002 held in Montpellier France in September 2002 The 34 revised full papers and 17 short papers presented were carefully reviewed and selected from 116 submissions The papers are organized in topical sections on developing web services object databases XML and web component and ontology UML modeling object modeling and information systems adaptation e business models and workflow performance and method evaluation programming and tests software engineering metries web based information systems architecture and Corba and roles and evolvable objects *Mobile Agents* Peter Braun,Wilhelm R. Kirby,Alan Dearle,Dag I.K. Sjoberg,2003-06-30 The Ninth International Workshop on Persistent Object Systems POS 9 took place at the SAS Radisson Hotel in Lillehammer Norway from 6th to 8th September 2000 Previous workshops in the series have been held in Scotland 1 and 2 Australia 3 the USA 4 Italy 5 France 6 and the USA 7 and 8 In keeping with those workshops POS 9 was short but intensive fitting 28 papers and panel sessions a boat 1 excursion and some memorable meals into two and a half days The participants concentration was no doubt helped by the Northern European weather that prevailed for most of the workshop Continuing a trend experienced over the previous few workshops POS 9 had difficulty attracting a high number of papers Of course it is hard to tell whether this is a problem with the field of persistent systems itself or merely a consequence of the increasing number of

workshops conferences and journals competing for submissions In his Epilogue to the proceedings Ron Morrison makes some interesting suggestions for possible improvements to future POS workshops Out of a total of 26 submitted papers 19 were accepted for presentation at the 2 workshop Breaking down by region 6 1 2 came from the USA 1 from Africa 3 1 2 from Australia and 8 from Europe In a new development for POS an equal number of papers came from England and from Scotland **Conceptual Modeling - ER '97** David W.
