

The Ecology of Crime, Fear, and Delinquency

Social Disorganization Versus Social Efficacy

Ralph B. Taylor
Temple University

Some Background

The Eighteenth Century

Napoleon was a pretty big guy, even though virtually challenged. He knew how to get things done. He ran into a few problems outside Moscow and had a really bad day at Waterloo, but when he wasn't busy trying to take places over, he was initiating reforms at home. In France, he centralized local governments; rewrote civil, commercial, and criminal law codes; and even cut across the budget, among other things. As a result of his efforts, in the years that followed, central officials and local arms of government agencies started collecting data about how the country was running. And as cities, happens with data, when researchers are hanging around, someone starts looking at them. Even back then, some people didn't get out enough.

Officials were particularly interested in seeing the effects of their new criminal laws. How many people were being arrested, imprisoned, flogged, or hung in different parts of the country? (Mazbinowder 1966). Using a lot of ink and addition, researchers like Guerry and Quetelet in France found spatial variation in the rate at which people were being arrested for crime in different parts of the country (Brantingham and Brantingham 1993).

The specifics of the patterns they observed still hold true for researchers looking at spatial differences in crime rates today:

(1) There were 86 "departments" in France; a few had very high rates, a few had very low rates, and many places were in between. (2) These differences between regions appeared relatively stable over time. (3) The rates varied widely; for example, the rate of people accused of crimes against persons for the period 1826-1830 ranged from 1/2,199 in Corse to 1/37,014 in Creuse. (4) Patterns for violent and property crimes differed. Violent crimes were highest in southern rural areas; property rates were highest in industrialized, northern, urbanized departments. Each of these features of local crime rates has proven true in modern sociological research over the past 150 years.

Researchers in Britain found the same very broad composite patterns when they examined data at the county level and below: marked spatial variation in the crime rates (e.g., Glynn 1855). But the differences were not always what they expected. In the mid-1850s in Suffolk County, England, the highest crime rates were in the rural part of the county.

Complementing these statistical efforts were investigations by nineteenth-century British social workers going into some of these "bad" areas (Miles 1957). They saw deplorable conditions right out of a Charles Dickens novel. Their reports led to some widespread slum-clearing efforts. Nonetheless, some of these same locations, populated largely by "thieves and pickpockets and prostitutes," remained high crime areas in the late 1880s, at the turn of the century and through to the 1960s (Brantingham and Brantingham 1991, 11).

By the end of the nineteenth century, early criminal criminologists had discovered the following fundamental features about spatial and temporal distributions of crime:

- There is spatial variation in rates of reported crime. This variation shows up no matter the level of resolution. It is higher in those places than in others, regardless of whether one is looking at large-scale units, such as countries, or areas within countries, like different towns or different cities or different sections of a city.

- The spatial areas that are higher or lower high for a decade regardless of made in the 18

Ecology Crime And Delinquency:

Ecology, Crime, and Delinquency Harwin L. Voss, David M. Petersen, 1971 **Social, Ecological and Environmental Theories of Crime** Jeffery T. Walker, 2017-07-05 One of the oldest and most extensive forms of criminology falls within what is referred to among other names as social ecology Beginning with the work of Guerry and Quetelet this theory became the dominate paradigm in explaining crime with the work of the Chicago School in the early 1900s social disorganization theory and neighborhood research attempting to deal with crime in deteriorating cities Social ecology is also the basis for the research being conducted in environmental criminology This volume offers a selection of the most influential works in social ecology and environmental criminology It begins with research from human ecology and the Chicago School extending through some of the research in social disorganization theory It encompasses some of the major journal articles from the 1980s and 1990s in neighborhoods and crime and then addresses some of the quintessential works in environmental criminology It ends with groundbreaking work in this area that may indicate the future direction of the field This valuable collection includes an excellent introduction by Jeff Walker **Ecology, crime, and delinquency, ed** Harwin L. Voss, David M. Peterson, **International Bibliography on Crime and Delinquency**, 1963 *Social, Ecological and Environmental Theories of Crime* Jeffery T. Walker, 2017-07-05 One of the oldest and most extensive forms of criminology falls within what is referred to among other names as social ecology Beginning with the work of Guerry and Quetelet this theory became the dominate paradigm in explaining crime with the work of the Chicago School in the early 1900s social disorganization theory and neighborhood research attempting to deal with crime in deteriorating cities Social ecology is also the basis for the research being conducted in environmental criminology This volume offers a selection of the most influential works in social ecology and environmental criminology It begins with research from human ecology and the Chicago School extending through some of the research in social disorganization theory It encompasses some of the major journal articles from the 1980s and 1990s in neighborhoods and crime and then addresses some of the quintessential works in environmental criminology It ends with groundbreaking work in this area that may indicate the future direction of the field This valuable collection includes an excellent introduction by Jeff Walker The Social Ecology of Crime James Byrne, Robert J. Sampson, 1986-10-10 The papers in this volume examine the underlying social causes of criminal behaviour The authors are concerned with both social structural e g age sex race and family composition and ecological e g crowding etc characteristics as important units of analysis of neighborhoods cities and crime Environmental Crime and Criminality Sally M. Edwards, Terry D. Edwards, Charles B. Fields, 2013-08-01 First published in 1996 One of the primary goals of this series has been to explore new areas of criminology and criminal justice topics that constitute the frontiers of the field This work edited by Sally Edwards Terry Edwards and Charles Fields exemplifies that purpose in its coverage of environmental crime While corporate and political crime developed slowly into mainstream criminology over the last half century environmental crime as

an area of emphasis is still in its infancy It is unusual to have many varied and informative perspectives early in a subject's development This volume however demonstrates that many people are already examining environmental crime perhaps as an extension of both the greater environmental movement and the broadening of the popular parameters of crime Theories of Delinquency Donald J. Shoemaker, 2010 Surveys the major theoretical approaches to understanding delinquent behavior both biological and psychological It features careful explanations of the major theories and analyzes each theory's underlying assumptions the important concepts behind it and finally the critical evaluations of the research associated with each theory presented *Challenging Criminological Theory* Francis T. Cullen, Pamela Wilcox, Robert J. Sampson, Brendan D.

Dooley, 2017-07-12 This volume is divided into five sections that when taken together offer an informative account of the impact of Ruth Rosner Kornhauser's *Social Sources of Delinquency* on the development of American criminological thought This classic book was her major contribution to the field Section I tells the story of Kornhauser's brief but influential academic career Section II probes deeply into the specific ways in which she challenged criminological theory and the subsequent responses that were forthcoming Section III then presents commentary on specific lines of inquiry inspired by Kornhauser's book and orientation to criminological theory Section IV explores recent efforts to move beyond Kornhauser's insights on communities and crime Section V concludes with three critical essays contending that *Social Sources of Delinquency* paid insufficient attention to criminal motivation the role of opportunity in offending and gangs and girls This volume authored by prominent scholars shows that Kornhauser's way of thinking about crime continues to be a starting point for much criminological theory today **Crime and Delinquency Abstracts**, 1963 Eco-global Crimes Ragnhild

Sollund, 2016-04-29 Building on knowledge within the fields of green and eco global criminology this book uses empirical and theoretical arguments to discuss the multi dimensional character of eco global crime It provides an overview of eco global crimes and discusses them from a justice perspective The persistence of animal abuse and speciesism are also examined together with policies aimed at controlling the natural world and plant species Pollution by large corporations rights of indigenous peoples and the damage caused by the mineral extraction are also considered Providing new ideas and insights which will be relevant on a global scale this book is an interesting and useful study of the exploitation of nature and other species It will be invaluable for students and scholars globally working within or connected to the field of green and eco global criminology The book will also be important for the participants of various social movements especially the environmental and animal advocacy movements **Environmental Criminology and Crime Analysis** Richard

Wortley, Lorraine Mazerolle, 2013-05-13 Environmental criminology is a generic label that covers a range of overlapping perspectives At the core the various strands of environmental criminology are bound by a common focus on the role that the immediate environment plays in the performance of crime and a conviction that careful analyses of these environmental influences are the key to the effective investigation control and prevention of crime *Environmental Crime and Crime Analysis*

brings together for the first time the key contributions to environmental criminology to comprehensively define the field and synthesize the concepts and ideas surrounding environmental criminology The chapters are written by leading theorists and practitioners in the field Each chapter will analyze one of the twelve major elements of environmental criminology and crime analysis This book will be essential reading for both practitioners and undergraduate and postgraduate students taking courses in this subject

Inequality, Crime and Public Policy (Routledge Revivals) John Braithwaite, 2013-09-13 First published in 1979 Inequality Crime and Public Policy integrates and interprets the vast corpus of existing research on social class slums and crime and presents its own findings on these matters It explores two major questions First do policies designed to redistribute wealth and power within capitalist societies have effects upon crime Second do policies created to overcome the residential segregation of social classes have effects on crime The book provides a brilliantly comprehensive and systematic review of the empirical evidence to support or refute the classic theories of Engles Bonger Merton Cloward and Ohlin Cohen Miller Shaw and McKay amongst many others Braithwaite confronts these theories with evidence of the extent and nature of white collar crime and a consideration of the way law enhancement and law enforcement might serve class interest

Delinquent-Prone Communities Don Weatherburn, Bronwyn Lind, 2000-12-28 Despite a century of effort criminologists do not yet fully understand the relationship between disadvantage and crime The balance of evidence suggests that economic and social stress increase the risk of involvement in crime by increasing the motivation to offend But there are a number of empirical anomalies that cannot easily be reconciled with this interpretation of the evidence Weatherburn and Lind argue that the transmission mechanism linking economic and social stress to crime is not offender motivation but disruption to the parenting process They put forward an epidemic model of the genesis of delinquent prone communities and show how this model resolves the empirical anomalies facing conventional interpretations of the disadvantage crime relationship This book offers compelling evidence which will stimulate debate in this area of criminology and will also interest academics policy makers and practitioners in the field

The City Alan S. Berger, 1978 **Environmental Crime** Yingyi Situ, David Emmons, 2000 After defining environmental crime and discussing the extent of the environmental crisis this book explores the causes investigation prosecution and prevention of all types of environmental crime

Environmental Crime and its Victims Toine Spapens, Rob White, Marieke Kluin, 2016-05-06 Environmental crime is one of the most profitable and fastest growing areas of international criminal activity These types of crime however do not always produce an immediate consequence and the harm may be diffused As such the complexity of victimization in terms of time space impact and who or what is victimized is one of the reasons why governments and the enforcement community have trouble in finding suitable and effective responses This book provides a diverse and provocative array of arguments critiques and recommendations from leading researchers and scholars in the field of green criminology The chapters are divided into three main sections the first part deals with specific characteristics of some of the major types of environmental crime and its

perpetrators the second focuses explicitly on the problem of victimization in cases of environmental crime and the third addresses the question of how to tackle this problem. Discussing these topics from the point of view of green criminological theory, sociology, law, enforcement, community wellbeing, environmental activism and victimology, this book will be of great interest to all those concerned about crime and the environment. Environmental Crime in Transnational Context Toine Spapens, Rob White, Wim Huisman, 2016-06-10. Environmental crime is one of the most profitable and fastest growing areas of international criminal activity. The increasing cross border scope of environmental crimes and harms is one of the reasons why governments and the enforcement community have trouble in finding the proper responses. Law enforcement cooperation between western industrialized states is often time consuming and problematic and the problems increase exponentially when environmental criminals take advantage of situations where government and law enforcement are weak. This book provides an overview of the developments and problems in the field of transnational environmental crimes and harms, addressing these issues from perspectives such as enforcement, deterrence, compliance and emission trading schemes. Divided into four parts, the authors consider global issues in green criminology, responses to transnational environmental crimes and harms, alternative methods to combat environmental crime and specific types of crimes and criminological research. Discussing these topics from the view of green criminology, sociology and governance, this book will be of great interest to all those concerned about the transnational dimensions of crime and the environment. *Reflections on the Extreme Right in Western Europe, 1990–2008* Christopher Husk, 2020-05-26. During the last three decades or so there has been a significant growth of extreme right voter support in Europe and elsewhere in the world. The chapters in this book look at an earlier period before most of this increase. Comprising eight previously published articles or book chapters and two hitherto unpublished studies, this book gives extended accounts of the major extreme right political parties or movements in a number of west European countries, looking both at their antecedents and also at their support and significance in the 1980s and early 1990s. The countries covered in detail are France, the Federal Republic of Germany, and the Netherlands, Belgium, Switzerland and Austria. During the last three decades, some earlier parties of the extreme right in these west European countries have disappeared into oblivion to be superseded by replacements; others have survived and flourished. Given the date when most of these chapters were written, they are now to be regarded as contributions to a modern history about the status and relevance of the respective parties or movements. The book also includes an introductory essay that discusses issues arising from the disputed labelling terminology used to describe such parties and identifies themes that feature in the more recent literature about the subsequent and current state of the extreme right in Europe. The book will be of particular interest to researchers on the contemporary politics of the extreme right in Europe as well as being a valuable resource for those teaching courses on this topic or on general political sociology. The Oxford Handbook of Criminological Theory Francis T. Cullen, Pamela Wilcox, 2015-12. This handbook presents a series of essays that captures not

the past of criminology but where theoretical explanation is headed The volume is replete with ideas discussions of substantive topics with salient theoretical implications and reviews of literatures that illuminate avenues along which theory and research evolve
