Economic Development in Provincial China Eduard B. Vermeer, 1988-10-27 This book is a detailed study of the economic developments on the Central Shaanxi province

Historical Disasters in Context Andrea JANKU, Gerrit Schenk, Franz Mauelshagen, 2011-12-21 Growing concerns about climate change and the increasing occurrence of ever more devastating natural disasters in some parts of the world and their consequences for human life not only in the immediately affected regions but for all of us have increased our desire to learn more about disaster experiences in the past How did disaster experiences impact on the development of modern sciences in the early modern era Why did religion continue to play such an important role in the encounter with disasters despite the strong trend towards secularization in the modern world What was the political role of disasters Historical Disasters in Context illustrates how past societies coped with a threatening environment how societies changed in response to disaster experiences and how disaster experiences were processed and communicated both locally and globally Particular emphasis is put on the realms of science religion and politics International case studies demonstrate that while there are huge differences across cultures in the way people and societies responded to disasters there are also many commonalities and interactions between different cultures that have the potential to alter the ways people prepare for and react to disasters in future To explain these relationships and highlight their significance is the purpose of this volume

The Cambridge Handbook of Contemporary China Colin Mackerras, Amanda Yorke, 1991-05-02 The paradox of contemporary China its openness to Western technology yet its rejection of Western democratic ideals serves to make China appear remote and inaccessible to those outside The country's vast area and population only accentuate these difficulties The Cambridge Handbook of Contemporary China presents topical information on all aspects of Chinese life since 1949 with particular emphasis on the 1980s its major strength is its contemporary focus and easy to use format Useful maps and tabled statistics accompany the text which is divided into clearly defined categories Designed for students specialists educationalists journalists and those in business and government as well as the general reader the Handbook provides easy access to information on all areas of Chinese life and is a good starting point for research

The Political Economy of China's Provinces Hans Hendrichske, 2013-01-11 Traditionally political scientists and economists have seen China as a single entity and business people have seen China as a single market This book challenges the notion of a centralised and unified China and outlines how provinces are taking on new economic and political roles forced upon them by decentralisation It is the most thorough data on contemporary Chinese provinces available and will be of great interest to researchers and graduate students of politics economics and business as well as Asian studies

E Bolton Williams College US This amazingly surprising book takes the popular topic of social capital and provocatively examines the contemporary rural development issue New social capital driven thinking and insights are applied globally from a conceptual frame and locally with examples The way forward for both urban and rural development is achieved when the variables that define social capital are simultaneously balanced around focused development objectives Examples show how a multidimensional view of social capital enables meaningful rural development Roger R Stough George Mason University US Social capital is often considered a key factor for local development This book analyzes the role of social capital for rural areas survival and development in the current age of metropolitan growth an era in which urban is the norm and where rural areas must adapt to this new situation and build innovative urban rural relations The traditional division between rural and urban is no longer valid in the knowledge society Instead of being a homogeneous unit based on primary sector production the countryside in the developed world increasingly consists of areas with very different development paths With examples from Europe Asia and America the book discusses building and renewal of rural social capital from both bottom up and top down perspectives and from the standpoint of business and both the public and private sectors Being the first book to treat social capital and rural development in the age of megacities and the knowledge economy it will be of great benefit to academics interested in social capital research and rural development **Annual Review of Sociology** W. Chinese National Health Care Reform Alex Jingwei He, Qingyue Meng, 2017-10-02 Five years have elapsed since the Chinese government announced its ambitious health care reform programme The fact that both the United States and China unfolded their gigantic national health care reforms almost simultaneously is reflective of the daunting health policy challenges that most national governments are grappling with While Obamacare has barely survived the obstruction from Congress and remains controversial its Chinese counterpart has concluded its first phase at a fairly smooth pace Having had three trillion RMB invested into it within five years this landmark reform stands out as one of the biggest health policy interventions in modern history in terms of both scale and scope A critical juncture in the reform process has been reached and it is time to assess its performance to date This book provides an interim evaluation of China's ongoing national health care reform from interdisciplinary perspective Insights generated are not only valuable to inform next phase of the reform but also relevant to health policy reformers in other developing and transitional countries This book was published as a special issue of the *Journal of Asian Public Policy* **Assessing the Balance of Power in Central-Local Relations in China** John Donaldson, 2016-07-01 How do we understand the evolution of central local relations in China during the reform period This book addresses this question by focusing on eight separate issues in which the central local relationship has been especially salient government finance investment control regional development administrative zoning implementation culture social welfare and international relations Each chapter introduces a sector and the way the center and various local governments have shared or divided power over the different periods of China's reform era The balance of power is gauged dynamically

over time to measure the extent to which one level of government dominates influences or shares power in making decisions in each of these particular domains as well as what is likely to occur in the foreseeable future The authors assess the winners and losers of these changes among key actors in China's society The result provides a dynamic view of China's changing power relations

Tibet and Nationalist China's Frontier Hsiao-ting Lin, 2011-01-01 In this ground breaking study Hsiao Ting Lin demonstrates that the Chinese frontier was the subject neither of concerted aggression on the part of a centralized and indoctrinated Chinese government nor of an ideologically driven nationalist ethnopolitics Instead Nationalist sovereignty over Tibet and other border regions was the result of rhetorical grandstanding by Chiang Kai shek and his regime Tibet and Nationalist China's Frontier is invaluable for an understanding of past and present China Tibet relations Tibet and Nationalist China's Frontier makes a crucial contribution to the understanding of past and present China Tibet relations A counterpoint to erroneous historical assumptions this book will change the way Tibetologists and modern Chinese historians frame future studies of the region

Small Works John A. Donaldson, 2011-08-15 How can policymakers effectively reduce poverty Most mainstream economists advocate promoting economic growth on the grounds that it generally reduces poverty while bringing other economic benefits However this dominant hypothesis offers few alternatives for economies that are unable to grow or in places where economic growth fails to reduce or actually exacerbates poverty In Small Works John A Donaldson draws on his extensive fieldwork in two Chinese

provinces Yunnan and Guizhou that are exceptions to the purported relationship between economic growth and poverty reduction In Yunnan an outward oriented developmental state one that focuses on large scale urban development has largely failed to reduce poverty even though it succeeded in stimulating economic growth Provincial policy shaped roads tourism and mining in ways that often precluded participation by poor people By contrast Guizhou is a micro oriented state one that promotes small scale low skill economic opportunities and so reduces poverty despite slow economic growth It is no coincidence that this Guizhou approach parallels the ideas encapsulated in the scientific development view of China s current president Hu Jintao After all Hu when Guizhou s leader helped establish the micro oriented state in the province Donaldson s conclusions have implications for our understanding of development and poverty reduction economic change in China and the thinking behind China s policy decisions

China's Urban Champions Kyle A. Jaros, 2019-07-23 An exploration of how key provinces in China shape urban and regional development The rise of major metropolises across China since the 1990s has been a double edged sword although big cities function as economic powerhouses concentrated urban growth can worsen regional inequalities governance challenges and social tensions Wary of these dangers China s national leaders have tried to forestall top heavy urbanization However urban and regional development policies at the subnational level have not always followed suit China s Urban Champions explores the development paths of different provinces and asks why policymakers in many cases favor big cities in a way that reinforces spatial inequalities rather than reducing them Kyle Jaros combines in depth case studies of Hunan Jiangxi Shaanxi and Jiangsu provinces with quantitative analysis to shed light on the political drivers of uneven development Drawing on numerous Chinese language written sources including government documents and media reports as well as a wealth of field interviews with officials policy experts urban planners academics and businesspeople Jaros shows how provincial development strategies are shaped by both the horizontal relations of competition among different provinces and the vertical relations among different tiers of government Metropolitan oriented development strategies advance when lagging economic performance leads provincial leaders to fixate on boosting regional competitiveness and when provincial governments have the political strength to impose their policy priorities over the objections of other actors Rethinking the politics of spatial policy in an era of booming growth China s Urban Champions highlights the key role of provincial units in determining the nation s metropolitan and regional development trajectory
