Environment Pete Newell,2013-04-24 Globalization and the Environment critically explores the actors politics and processes

that govern the relationship between globalization and the environment Taking key aspects of globalisation in turn trade production and finance the book highlights the relations of power at work that determine whether globalization is managed in a sustainable way and on whose behalf Each chapter looks in turn at the political ecology of these central pillars of the global economy reviewing evidence of its impact on diverse ecologies and societies its governance the political structures institutions and policy making processes in place to manage this relationship and finally efforts to contest and challenge these prevailing approaches The book makes sense of the relationship between globalisation and the environment using a range of theoretical tools from different disciplines This helps to place the debate about the compatibility between globalisation and sustainability in an explicitly political and historical context in which it is possible to appreciate the nature of interests and power relations that privilege some ways of responding to environmental problems over others in a context of globalisation

antecedents to global processes *Economic Globalization and the Environment* Kevin P. Gallagher, 2014 As the world's economies become more integrated and the global economy subsequently grows there is increasing concern regarding how such trends will affect the environment In fact the relationship between globalization and the environment has become quite contentious in policy circles In part in response to these controversies a burgeoning amount of academic attention has emerged that examines the globalization environment nexus Although there have been advances in the thinking about these relationships significant challenges remain This article provides a critical taxonomy that will help scholars better understand the overwhelming literature on the subject and also outlines the key challenges that scholars and policy makers will face for a second wave of thinking on the subject **Environmental Impacts of Globalization and Trade** Corey L. Lofdahl, 2002 The relationship between trade and the environment has become an increasingly contentious issue between economists and environmentalists Economists maintain that trade helps the natural environment because rich countries can better afford to protect their unspoiled areas Environmentalists counter that the pursuit of national wealth drives global environmental degradation and that free trade accelerates the process Instead of arguing one side or the other this book uses new analytic methods including a systems dynamics model to seek an answer to the impasse Using lateral pressure theory to account for politics within and among nations it extends the theory's initial application which was to explain the onset of war to the environment by specifying additional connections between the natural and social spheres In making explicit the complex causal connections between world trade and environmental degradation the book finds that GNP increases in the rich developed countries are linked to deforestation in the poorer developing countries It also uses insights derived from this finding to critique current trade policy prescriptions Although researchers have made significant advances in understanding the determinants and consequences of innovation until recently they have paid little attention to how innovation functions as an economic process This book examines the nature and workings of markets for intermediate technological inputs It looks first at how industry structure the nature of knowledge and intellectual property rights facilitate the development of technology markets It then examines the impacts of these markets on firm boundaries the division of labor within the economy industry structure and economic growth Finally it examines the implications of this framework for public policy and corporate strategy Combining theoretical perspectives from economics and management with empirical analysis the book also draws on historical evidence and case studies to flesh out its research results *Economic Globalization, International Organizations and Crisis Management* Richard Tilly, Paul J.J. Welfens, 2011-06-28 Economic globalization has intensified on the basis of new international links especially in the field of foreign direct investment financial capital flows and telecommunications liberalization These and other developments have reinforced international interdependence and raise new issues for international organizations as well as for strategic behavior of major actors Based on historical perspectives of evolution of major organizations and the latest developments in the 1990s the analysis focus on financial market dynamics

monetary issues and labor market aspects Reform options for selected international organizations are discussed including aspects of trade foreign investment and international externalities Game theoretic concepts are also applied **Economic Globalisation and the Environment** OECD,1997-06-06 This book summarises the environmental implications of globalisation in terms of governance competitiveness foreign investments sectoral economic activities and corporate environmental strategies *Environmental Economics and Sustainability* Brian Chi-ang Lin,Siqi Zheng,2017-02-16 *Environmental Economics and Sustainability* presents a collection of peer reviewed research articles contributed by international experts that reveal the current state of our knowledge in the field of environmental economics Presents the latest research results on a plethora of issues relating to environmental economics and sustainability Features original contributions from top experts in the field from around the world Addresses several of the contemporary challenges of sustainability while infusing new energy into the field of environmental economics Covers myriad topics relating to environmental economics and sustainability including climate change air pollution CO2 emissions recycling and the international environmental agreement **Globalization and Environmental Reform** Arthur P.
