Economic Liberalization And Labor Markets:

Economic Liberalization and Labor Markets Parviz Dabir-Alai, Mehmet Odekon, 1998-04-23 Contains 11 essays which discuss the impact of economic liberalization on employment and unemployment Labor Market Issues in the Caribbean Ms. Magda E. Kandil, Mrs. Genevieve Lindow, Mr. Mario Mansilla, Mr. Joel Chiedu Okwuokei, Jochen M. Schmittmann, Qiaoe Chen, Xin Li, Marika Santoro, Solomon Stavis, 2014-07-01 The paper examines the determinants of employment growth drawing on data available across a sample of Caribbean countries To that end the paper analyzes estimates of the employment output elasticity and the response of employment growth to major sources of labor market determinants in the long and short run The main determinants of employment include government investment and private sector credit while the major determinants of external performance are real effective exchange rate the price of major exporting commodities the number of tourists and growth in major trading partners The paper concludes with a menu of policy recommendations and structural reforms towards sustaining high employment growth and higher living standards in the Caribbean **Labor Markets in Hard-Peg Accession Countries: The Baltics and Bulgaria** International Monetary Fund, 2001-07-12 In recent years the IMF has released a growing number of reports and other documents covering economic and financial developments and trends in member countries Each report prepared by a staff team after discussions with government officials is published at the option of the member country **Reforming the Labor Market in a Liberalized Economy** Gustavo Márquez, 1995 In addition countries must produce a transparent atmosphere that depoliticizes contract disputes and negotiations Finally they must reform and strengthen institutions responsible for labor policies **Monthly Labor Review**, 2001 Publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews **Labor Markets in Asia** Jesus Felipe, Rana Hasan, 2006-07-03 This volume argues that while labour market reforms may be necessary in some specific cases by no means are labour market policies the main explanation for the widespread increase in unemployment and underemployment across Asia and country specific studies undermine the case for across the board labour market reforms **Labor Markets in Latin America** Sebastian Edwards, Nora Claudia Lustig, 2001-06-29 Many of the rules that govern labor markets in Latin America and elsewhere raise labor costs create barriers to entry and introduce rigidities in the employment structure These include the exceedingly restrictive regulations on hiring and firing practices as well as burdensome social insurance schemes Such labor market regulations contribute to an over expansion of precarious forms of employment and to rural poverty and hinder countries from responding rapidly to new challenges from increased foreign competition At the same time other norms can reduce costs and raise productivity they should be kept in place and their enforcement improved For example some occupational health and safety standards lower medical costs and save lives One may also want to keep legislation aimed at providing a minimum social insurance for unemployment old age sickness and disabilities In practice the most common decision that governments confront is not

whether to intervene but to choose among different forms of intervention This volume provides analysts and policymakers with useful insights on this issue Part I addresses labor market institutions in a broader context such as collective bargaining arrangements minimum wages and poverty and optimal unemployment insurance schemes Part II analyzes labor market performance in Latin America the links between performance and labor market regulations and the status of labor market reform in the region These questions are addressed for the region as a whole and in great detail for Argentina Brazil Chile Mexico and Colombia The book provides a comprehensive description of the existing labor institutions in Latin America the problems they pose and the trends in labor market reforms as well as the difficulties encountered by the reform process in specific cases In addition to the editors the contributors are Edward Amadeo Jose Marcio Camargo Alejandra Cox Edwards Rene Cortazar Enriqu

Labor Market Reform and Job Creation J. Luis Guasch, 1999-01-01 Despite the resumption of economic growth in most Latin America and Caribbean LAC countries since the late 1980s improvements on the employment unemployment front have been sluggish at best with a few notable exceptions In many countries renewed growth in LAC in the 1990s has so far failed to generate adequate new jobs in place of those lost during the adjustment and to restore wages to precrisis levels After a number of years of relatively high economic growth the employment outlook in many countries remains worrisome In those countries where unemployment rates appear to be low often as a result of how they are measured the concern is the low quality and remuneration levels of available jobs

Governing Rapid Growth in China Ravi Kanbur, Xiaobo Zhang, 2009-04-15 After three decades of spectacular economic growth in China the problem is no longer how to achieve growth but how to manage its consequences and how to sustain it The most important consequence at least as far as Chinese policy makers are concerned is the rapidly growing inequality between persons between rural and urban areas and between inland and coastal regions At the same time the institutions that have brought rapid growth so far are now under stress and there is a need to reform and innovate on this front in order to sustain rapid growth and to have growth with equity The analytical literature has responded to the emerging policy problems by specifying and quantifying their magnitude understanding their nature and proposing policy approaches and solutions Policy makers have also been looking to analysts for interaction and assistance This volume brings together a collection of the best available analyses of China's problems in governing rapid growth focusing on equity and institutions Contributions include perspectives from leading policy makers who were intimately involved in the reform process and from leading academics in articles published in top peer reviewed journals
