Economic Scarcity And Healthcare Quality Tradeoffs In Delineations And Dilemmas:

Economic Scarcity and Healthcare Quality Les Seplaki,1997 Applies insights from the past literature on product and service quality to the healthcare industry and synthesizes discussions concerning the quality of healthcare in various provider settings based on the proposition that resources for it are limited Looks at generic notions of product and quality broad issues and empirical evidence in measuring healthcare quality the individual provider relationships between cost and quality the legal environment and other dimensions Distributed in the US by Ashgate Annotation copyrighted by Book News Inc Portland OR **Forthcoming Books** Rose Arny,1997-04 The British National Bibliography Arthur James Wells,1998

Bibliographie der Wirtschaftswissenschaften ,1997 **Medical and Health Care Books and Serials in Print** ,1997 **Books In Print 2004-2005** Ed Bowker Staff,Staff Bowker, Ed,2004 **Bibliographie der Staats-und Wirtschaftswissenschaften** ,1997 *Oxford Textbook of Global Public Health* Roger Detels,Martin Gulliford,Quarraisha Abdool Karim,Chorh Chuan Tan,2017 Sixth edition of the hugely successful internationally recognised textbook on global public health and epidemiology comprehensively covering the scope methods and practice of the discipline **Distributing Health Care** Paul Dolan,Jan Abel Olsen,2002 This is a new health economics textbook with a difference It is based firmly in the discipline of economics and as such it fills a gap in the health economics market But unlike other texts in the area it is very explicit about the distributive implications of economic models and it provides clear rationale for public involvement in the market for health care It separates the efficiency reasons for public involvement based on notions of market failure from the equity reasons based on the views of society that health care should be distributed according to the notion of health needs rather than according to ability to pay The book illustrates the distributional aspects of money flows in the financing and provision of health care and discusses who are the gainers and who are the losers under different financing arrangements A central part of the book contains a discussion of those techniques that are increasingly being used to aid decisions about how to distribute health care Beyond the parameters included in economic evaluation techniques such as cost benefit analysis and cost effectiveness analysis the book discusses some key ethical issues that are relevant for decision makers when setting health care priorities **Distributional Cost-Effectiveness Analysis** Richard Cookson,Susan Griffin,Ole F. Norheim,Anthony J. Culyer,2020-09-30 Distributional cost effectiveness analysis aims to help health care and public health organisations make fairer decisions with better outcomes Whereas standard cost effectiveness analysis provides information about total costs and effects distributional cost effectiveness analysis provides additional information about fairness in the distribution of costs and effects who gains who loses and by how much It can also provide information about the trade offs that sometimes occur between efficiency objectives such as improving total health and equity objectives such as reducing unfair inequality in health This is a practical guide to a flexible suite of economic methods for quantifying the equity consequences of health programmes in high middle and low income countries The methods can be tailored and

combined in various ways to provide useful information to different decision makers in different countries with different distributional equity concerns The handbook is primarily aimed at postgraduate students and analysts specialising in cost effectiveness analysis but is also accessible to a broader audience of health sector academics practitioners managers policymakers and stakeholders As well as offering an overview for research commissioners users and producers the book includes systematic technical guidance on how to simulate and evaluate distributions with accompanying hands on spreadsheet training exercises and discussions about how to handle uncertainty about facts and disagreement about values and the future challenges facing this young and rapidly evolving field of study
