Abstract A methodological critique of the Chicago School of legal economic analysis, in particular Posner's approach, is illustrated by an example characterizing Chicago-type 'analysis of law'. Although the discussion of the example referred to may be interesting in its own right, its purpose here is to suggest a more general framework of criticism in order to allow for generalizable conclusions. The suggestion of an alternative interpretation and solution to a particular legal problem serves to point out some limits of the methodology Posner has adopted. This applies more generally to the delineation of the limits of the rôle economics can play in actual litigation in helping judges and juries to arrive at fair as well as socially efficient solutions.

Lawyer's Economics vs. economic analysis of law Jürgen Backhaus,1978 *Law and Economics* Nicholas Mercuro,2012-12-06 The character of economic life in a society is dependent upon among 2 other things its political legal economic institutional setting Within that institutional structure the individuals who comprise that society attempt to cooperate with one another to their mutual advantage so as to accommodate their joint utility maximizing endeavors In addition these same individuals call upon certain societal institutions to adjust the conflicting claims of different individuals and groups In this regard a society is perceived as both a cooperative venture for mutual advantage where there are an identity of interests and as well an arena of conflict where there exists a mutual interdependence of conflicting claims or interests The manner in which a society structures its political legal economic institutions 1 to enhance the scope of its cooperative endeavors and 2 to channel internal political legal economic conflicts toward resolution shapes the character of economic life in that society In contemplating the structure of its institutions intended to promote cooperation and channel conflict a society confronts several issues At the most general level an enduring issue is how a society both perceives and then ideologically transmits perhaps teaches or rationalizes internally and or externally its perceptions of so called cooperative endeavors and arenas of conflict There can be no doubt that the resultant structure of a society s institutions will reflect that society s perception as to what cooperation entails and what conflict constitutes **Economic Methods for Lawyers** Emanuel V.
