Economic Challenges In Higher Education:

Economic Challenges in Higher Education Charles T. Clotfelter, Ronald G. Ehrenberg, Malcolm Getz, John J. Siegfried, 2008-04-15 The last two decades have been a turbulent period for American higher education with profound demographic shifts gyrating salaries and marked changes in the economy While enrollments rose about 50% in that period sharp increases in tuition and fees at colleges and universities provoke accusations of inefficiency even outright institutional greed and irresponsibility As the 1990s progress surpluses in the academic labor supply may give way to shortages in many fields but will there be enough new Ph D s to go around Drawing on the authors experience as economists and educators this book offers an accessible analysis of three crucial economic issues the growth and composition of undergraduate enrollments the supply of faculty in the academic labor market and the cost of operating colleges and universities The study provides valuable insights for administrators and scholars of education *American Higher Education in the Twenty-first Century*

Philip G. Altbach, Robert O. Berdahl, Robert Oliver Berdahl, Patricia J. Gumport, 2005 This new edition explores current issues of central importance to the academy leadership accountability access finance technology academic freedom the canon governance and race Chapters also deal with key constituencies students and faculty in the context of a changing academic environment

Higher Education Under Fire Michael Berube, Jubilee Professor of Liberal Arts and Sciences Cary Nelson, 1995 Discusses the political and economic challenges for American colleges and universities and coping with changing demographics on campus Higher Education, Economic Development, and the West Center for Economic Competitiveness, 1988

Handbook of Research on Ethical Challenges in Higher Education Leadership and Administration Wang, Viktor, 2020-04-03 Higher education institutions

are more so than other organizations deeply complex and they present a unique challenge to their leaders and administrators. The unique complexities of higher education call for governance founded on thoughtful consideration of leadership practices, theory and styles that reflect the values of the institution and its mission. Embedded in a rapidly changing society, the future of higher education leadership and administration is necessarily dynamic and demands a strong ethical core to guide research, knowledge production and organizational behavior. *The Handbook of Research on Ethical Challenges in Higher Education Leadership and Administration* is a cutting edge research publication that examines leadership ethics that higher education institutions must employ to be proactive, visionary and ethically sound. The publication covers the importance of leadership ethics in higher education as well as the foundation for developing frameworks in which to ground the presence of leadership ethics in higher education. Featuring a wide range of topics such as distance education, free speech and leadership, this book is ideal for librarians, academicians, administrators, researchers, education professionals, policymakers and students.

Economics of Higher Education Robert K. Toutkoushian, Michael B. Paulsen, 2016-03-18. This book examines the many ways in which economic concepts, theories and models can be used to examine issues in higher education. The topics explored in the book include how students make college-going decisions, the payoffs to students and society from going to college, markets for higher education services, demand and supply in markets for higher education, why and how state and federal governments intervene in higher education markets, college and university revenues and expenditures, how institutions use net pricing strategies and non-price product differentiation strategies to pursue their goals and to compete in higher education markets, as well as issues related to faculty labor markets. The book is written for both economists and non-economists who study higher education issues and provides readers with background information and thorough explanations and illustrations of key economic concepts. In addition to reviewing the contributions economists have made to the study of higher education, it also examines recent research in each of the major topical areas. The book is policy focused and each chapter analyses how contemporary higher education policies affect the behaviour of students, faculty and/or institutions of higher education. Toutkoushian and Paulsen attempted a daunting task to write a book on the economics of higher education for non-economists that is also useful to economists. A book that could be used for reference and as a textbook for higher education classes in economics, finance and policy. They accomplish this tough balancing act with stunning success in a large volume that will serve as the go-to place for anyone interested in the history and current thinking on the economics of higher education. William E. Becker Jr, Professor Emeritus of Economics, Indiana University.

The Economic Institutions of Higher Education J. Patrick Raines, Charles G. Leathers, 2003-01-01. Working within the context of the evolutionary institutional transformation of higher education, the authors trace the development of an economic model by which the behavioral tendencies of modern universities can be evaluated. That model is expanded to provide insights to the following questions: Why do universities compete and how do they develop and implement their competitive strategies? How do

universities make critical institutional decisions about operational missions academic policies and internal resource allocation Do universities efficiently and effectively pursue the special social functions assigned to them Patrick Raines and Charles Leathers present an integrated coherent theory to explain the behavior of universities and provide a realistic economic model that predicts how universities allocate their scarce educational resources This alternative view is contrasted with the mainstream explanations of university behavior based on the maximization of student welfare or faculty influences The authors extend the existing literature on the operation of universities by presenting a history of the evolution of the modern entrepreneurial universities as well as an explanation of academic capitalism This absorbing volume will appeal to anyone interested in the history of economic thought or the history of education Scholars of Veblen Smith and Malthus will be fascinated by their individual and comparative theories of the purpose and failures of higher education

Meeting Economic and Social Challenges Western Interstate Commission for Higher Education,1992 The project has been an examination of the broad relationship between higher education and the economy and the ways in which higher education in the WICHE states must change in order to be more responsive to the needs of the region in the 1990s and beyond

Higher Education: Handbook of Theory and Research J.C. Smart,2012-12-06 To recapitulate Greeks differ from Independents and from the academy s value priorities but for the most part these differences derive from antecedent characteristics Moreover there are some grounds for speculating that these antecedent differences reflect fundamental temperamental differences extraversion and gregariousness mediated by social interaction as opposed to interaction through ideas Only to a limited degree does the Greek system appear to adversely affect the acquisition and assimilation of the academy s value priorities i e students as a whole Greek and Independent alike appear to become more independent liberal socially concerned and culturally sophisticated by graduation However the Greek system s effect on the behavior of Greeks is more troubling an effect largely mediated by the use and abuse of alcohol and the relative absence of direct institutional supervision Assuming the retention of the Greek system then the promotion of the academy s agenda appears dependent on an understanding and accommodation of the personal characteristics of Greeks using appropriate pedagogical methods to advance the academy s educational objectives and both educational and administrative regulatory efforts to control the use and abuse of alcohol With or without the Greek system the advancement of the academy s agenda involves these considerations since the characteristics of students as a whole encompass the characteristics emphasized among Greeks

Global Issues in Higher Education Pamela B. Richards, 2007 In most developed countries a high proportion of the population up to 50 percent now enter higher education at some time in their lives Higher education is therefore very important to national economies both as a significant industry in its own right and as a source of trained and educated personnel for the rest of the economy It follows that there are enormous stakes involved for a particular country even though the payoff of serious reforms may take decades and thus be counterproductive to the political forces responsible for designing and implementing such reforms since their horizons tend to be very short This new book tackles important issues in this dynamic field

Higher Education in the Asia-Pacific Simon Marginson, Sarjit Kaur, Erlenawati Sawir, 2011-08-21 This survey provides unprecedented scope and detail of analysis on higher education in the Asia Pacific region In this era of global integration convergence and comparison the balance of power in worldwide higher education is shifting In less than two decades the Asia Pacific region has come to possess the largest and fastest growing higher education sector on Earth The countries of East and Southeast Asia and the Western Pacific together enrol 50 million tertiary students compared to 14 million in 1991 and will soon conduct a third of all research and development In China Hong Kong Taiwan Korea and Singapore world class universities are emerging at breakneck pace fostered by modernizing governments that see knowledge and skills as key to a future shaped equally by East and West and supported by families deeply committed to education But not all Asia Pacific countries are on this path not all reforms are effective and there are marked differences between nations in levels of resources educational participation research state controls and academic freedom Higher Education in the Asia Pacific Strategic responses to globalization provides an authoritative survey of tertiary education in this diverse and dynamic region Its 23 chapters written by authors from a dozen different countries focus successively on the Asia Pacific as a whole the strategies of individual universities and national policies and strategies in response to the global challenge
