investigating its material and symbolic meanings Curried Cultures challenges disciplinary boundaries in considering South Asian gastronomy by assuming a proximity to dishes and diets that is often missing when food is a lens to investigate other topics The book s established scholarly contributors examine food to comment on a range of cultural activities as they argue that the practice of cooking and eating matter as an important way of knowing the world and acting on it The Persuasion Industries Steven McKevitt,2018-08-09 At the end of the twentieth century Britain was a consumer society Commerce intoxicating and addictive had almost entirely colonized modern life People were immersed in and ultimately defined by promotional culture The things they consumed had overtaken class religion geography or occupation as the primary form of self identity and self expression For much of the twentieth century all forms of brand communication from political campaigning to product advertising were based on the theory of rational appeals to rational consumers There was only one problem with this theory it was wrong The Persuasion Industries The Making of Modern Britain examines develops in marketing advertising public relations and branding It explores the role they played in the emergence of the consumer society New ideas from fields of behavioural psychology and economics together with internal developments such as planning positioning and corporate branding allowed persuasion to become the driving force within many commercial enterprises Together these changes led to the emergence of an alternative emotional model of brand communication A simple idea that proved so compelling it changed the world we live in **Waterloo Sunrise** John Davis,2024-03-26 This is an urban history of London during the pivotal years of the 1960s and 1970s when the metropolis was transformed from an industrial city that the Victorians might have recognised to an embryonic modern world city Previous work on London in these years has tended to focus upon the 1960s in particular the Swinging London phenomenon Mary Quant Carnaby Street and the King s Road Chelsea all appear in these pages but it is argued that the swinging moment of the mid sixties was a passing symptom of a much broader transformation from an industrial to a service based city and it is that transformation which this book examines London is too complex and diverse a city to be comprehended in a simple linear narrative this book adopts instead an innovative approach to urban history by which London life and London s transformation are examined through a number of case studies looking at specific themes and areas of the city Consumerism and the experience economy home ownership and gentrification deindustrialisation and deprivation racial tension and unemployment the attrition of public services and the steady loss of confidence in public agencies national and local emerge as overarching themes from the individual case studies in this book Their combined effect it is argued was to prepare the ground for the Britain that Margaret Thatcher is usually held to have created after 1979 without Thatcher herself having anything to do it Who's who in Australia ,2007
