Education Reform and the Concept of Good Teaching Derek Gottlieb, 2014-08-27 In an effort to address the problems confronting the American education system the Obama administration has issued structural and systematic reforms such as Race to the Top These initiatives introduce new statistics and accountability systems to gauge what constitutes good teaching both from an

administrative standpoint and the perspective of teacher training programs This volume offers a direct critique of this approach concluding that it does not respond adequately to the issues of education reform but rather raises new problems and actively stymies progress The author argues that at the heart of the confusion lies a misguided and rationalistic view of teaching and learning He draws on the philosophical strategies of Ludwig Wittgenstein to break down the guiding assumptions of Race to the Top allowing both the positive and the negative aspects of the policies to be heard The author then proposes a different view of teaching and learning which considers how to effectively address the problems Race to the Top seeks to confront

Good Teaching Richard A. Watson, 1997 From junior college to Ivy League university the level of teaching ranges from great to awful according to Richard A. Watson who explains not only how to survive but how to profit from and enjoy your college experience To help students make important personal choices What school What major What classes Watson discusses such broad areas as administrative structure institutional goals and faculty aspirations Charging the student with the ultimate responsibility for learning Watson presents certain academic facts of life teaching is not the primary concern of either faculty or administration in most institutions few professors on the university level have had any training in teaching and even fewer started out with teaching as their goal senior professors do not teach much the higher the rank and salary the less time in the classroom and those seeking tenure must emphasize research to survive and almost certainly the bad teacher who is a good researcher will get paid more than the good teacher who does not publish This is a book about good teaching and how to find it Rejecting the conventional wisdom that a professor devoted to research will not be good in the classroom Watson advises that you take classes from that old bear you are afraid of from the professor you may have been cautioned to avoid

Sustaining Quality Teaching and Learning to Instil Good Discipline and Academic Performance

Afungmeyu Jane-Francis Abongdia, Vuyisile Mathew Ngoqo, 2018-12-19 This book presents an engaging as well as inspiring array of issues and insights drawn from the perspective of dialogic imagination aimed at quality teaching and learning experiences The authors passionately uphold their belief that the prevalence of good discipline and good academic performance are mutually interrelated and if these two prevail in the ecosphere of any classroom these can significantly enrich and enhance the quality of learning in any school settings Based on this South Africa has made huge strides towards improving the quality of education and people's lives However discipline and academic performance still lag behind due to the lack of quality teaching which also prevents the Department of Education from accomplishing its objectives Ironically this takes place at a time when the government has resolved to prioritise education among other important developmental issues To this effect this book explores how quality teaching and learning can ensure that discipline and academic performance prevail It shows that quality teaching and learning have the potential to determine discipline and academic performance particularly now that other disciplinary measures have been seen to be ineffective It is framed theoretically by the school improvement theory supported by Radical Constructivism and Critical Realism and uses case studies to highlight its findings The book shows that quality teaching and learning can free human potential and ensure that it is developed in line with democratic ideals and identifies the environment as playing an important role in ascertaining whether or not quality teaching and learning can determine discipline and academic performance in schools
