Performing Neurology Jonathan W. Marshall,2016-07-13 This text provides a study of Jean Martin Charcot a founding figure in the history of neurology as a discipline and a colleague of Sigmund Freud It argues that Charcot s diagnostic and pedagogic models explaining both how disease is recognized and described and how to teach the act of neurological diagnosis should be considered through a theatrical lens Considering the constitution of the living moving body in terms of performance Charcot created a situation whereby the line between deceptive acting and real pathology scientific accuracy and creative falsehood and indeed between health and unhealth becomes blurred The physician becomes a medical subject in his or her own display transforming medicine into a potentially destabilizing even grand guignolesque discourse Offering a unique insight into Charcot s work his concepts and his methods this text represents a unique and interdisciplinary analysis cutting across the fields of art and neurology

how works ranging from Moby Dick and Dracula to One Flew Over the Cuckoo's Nest Halloween and American Horror Story have all conversed with the asylum Drawing from fictional and real accounts movies personal interviews and tours of mental hospitals both active and defunct Rondinone uncovers a story at once familiar and bizarre where reality meets fantasy in the foggy landscape of celluloid and pulp
