in a long broken black line that stood out in bold relief against the extreme whiteness of their surroundings About the centre of the line as dark and uninviting as the rest with its wide chimney of scrap limestone turning clouds of dense smoke into the air stood a cabin There was nothing in its appearance to distinguish it from the other huts clustered about About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Folks from Dixie Paul Laurence Dunbar, 1898 The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

Dixie's Forgotten People, New Edition Wayne Flynt, 2009-08-20 The best sort of introductory study packed with enlightening information The Times Literary Supplement

Poor whites have been isolated from mainstream white Southern culture and have been in turn stereotyped as rednecks and Holy Rollers discriminated against and misunderstood. In their isolation they have developed a unique subculture and defended it with a tenacity and pride that puzzles and confuses the larger society. Written 25 years ago, this book was one scholar's attempt to understand these people and their culture. For this new edition, Wayne Flynt has provided a new retrospective introduction and an up-to-date bibliography.

Paul Laurence Dunbar Gene Andrew Jarrett, 2022-06-07 On the 150th anniversary of his birth, a definitive new biography of a pivotal figure in American literary history. A major poet, Paul Laurence Dunbar (1872-1906) was one of the first African American writers to garner international recognition in the wake of emancipation. In this definitive biography, the first full-scale life of Dunbar in half a century, Gene Andrew Jarrett offers a revelatory account of a writer whose Gilded Age celebrity as the poet laureate of his race hid the private struggles of a man who, in the words of his famous poem, felt like a caged bird that sings. Jarrett tells the fascinating story of how Dunbar, born during Reconstruction to formerly enslaved parents, excelled against all odds to become an accomplished and versatile artist. A prolific and successful poet, novelist, essayist, playwright, and Broadway librettist, he was also a friend of such luminaries as Frederick Douglass and Orville and Wilbur Wright. But while audiences across the United States and Europe flocked to enjoy his literary readings, Dunbar privately bemoaned shouldering the burden of race and catering to minstrel stereotypes to earn fame and money. Inspired by his parents' survival of slavery but also agitated by a turbulent public marriage, beholden to influential benefactors and helpless against his widely reported bouts of tuberculosis and alcoholism, he came to regard his racial notoriety as a curse as well as a blessing. Before dying at the age of only thirty-three, Dunbar wrote beautifully, meticulously researched, and generously illustrated. This biography presents the richest, most detailed, and most nuanced portrait yet of Dunbar and his work, transforming how we understand the astonishing life and times of a central figure in American literary history.
