Complex Analysis and Geometry Pierre Dolbeault, A. Iordan, G. Henkin, H. Skoda, J.-M. Trepreau, 2012-12-06 This meeting has been motivated by two events the 85th birthday of Pierre Lelong and the end of the third year of the European network Complex analysis and analytic geometry from the programme Human Capital and Mobility For the first event Mathematicians from Poland Sweden United States and France whose work is particularly related to the one of P Lelong have accepted to participate for the second the different teams of the Network sent lecturers to report on their most recent works These teams are from Grenoble Wuppertal Berlin Pisa and Paris VI in fact most of their results are also related to Lelong's work and a posteriori it is difficult to decide whether a talk is motivated by the first or by the second event We chose only plenary lectures usually of one hour except a small number given by young mathematicians which have been shorter A two hours problem session has been organized The Proceedings gather papers which are exact texts of the talks or are closely related to them The members from the Network and five other lecturers sent us papers the other lecturers published the content of their talks in mathematical Journals All the presented texts have been submitted to referees independent of the organizing committee the texts of the problems have been approved by their authors French Bibliographical Digest, 1953

Asymptotic Wave Theory Maurice Roseau, 2012-12-02 Asymptotic Wave Theory investigates the asymptotic behavior of wave representations and presents some typical results borrowed from hydrodynamics and elasticity theory It describes techniques such as Fourier Laplace transforms operational calculus special functions and asymptotic methods It also discusses applications to the wave equation the elements of scattering matrix theory problems related to the wave equation and diffraction Organized into eight chapters this volume begins with an overview of the Fourier Laplace integral the Mellin transform and special functions such as the gamma function and the Bessel functions It then considers wave propagation with emphasis on representations of plane cylindrical or spherical waves It methodically introduces the reader to the reflexion and refraction of a plane wave at the interface between two homogeneous media the asymptotic expansion of Hankel's functions in the neighborhood of the point at infinity and the asymptotic behavior of the Laplace transform The book also examines the method of steepest descent the asymptotic representation of Hankel's function of large order and the

scattering matrix theory The remaining chapters focus on problems of flow in open channels the propagation of elastic waves within a layered spherical body and some problems in water wave theory This book is a valuable resource for mechanics and students of applied mathematics and mechanics *Special Functions and Orthogonal Polynomials* Richard Beals, Roderick Wong, 2016-05-17

A comprehensive graduate level introduction to classical and contemporary aspects of special functions
Heat Transfer Sam Stuart, 2013-10-22 Heat Transfer Current Applications of Air Conditioning deals with problems and applications of air conditioning The discussions are organized around non stationary heat transfer through walls study of confined rooms or enclosures calculation of cooling loads heat transfer with two phase refrigerants measurement of thermal conductivity and water vapour permeability of insulating materials and tests on air handling equipment room air conditioners induction or fan coil air conditioners This book is comprised of 60 chapters and begins with an assessment of the unit system controversy in the United States and the quest for an ultimate resolution The following chapters explore the resolution of conductive heat transfer problems using the finite element method thermal behavior of composite walls under transient conditions thermal and electrical models for solving problems of non stationary heat transfer through walls and use of a radiometer to measure the average temperature of a wall Experimental results for mixed air convection along a vertical surface are also presented This monograph will be a valuable resource for electronics engineers *Dynamics of Satellites / Dynamique des Satellites* Maurice Roy, 2013-04-17 Depuis le lancement de SPOUTNIK I par l'Union Sovietique le 4 Octobre 1957 des experiences humaines de Mecanique celeste de cette sorte ont ete repetees et de nombreuses reprises en U R S S et aux U S A En 1961 sur ma proposition l'Union Internationale de Mecanique theorique et appliquee retint l'idee de consacrer en 1962 un Symposium special et la confrontation des resultats des experiences sovietiques et americaines en vue de tirer le maximum d'enseignements sur la question fondamentale suivante concernant la laque Dynamique des satellites artificiels de la Terre quelles sont la nature et les lois des forces reelles qui agissent sur ces mobiles au voisinage de notre planete et qui determinent par consequent leur mouvement En d'autres termes il s'agissait de faire le point de nos connaissances sur le probleme du mouvement des Astres magistralement resolu par NEWTON il y a plus de trois siecles pour des astres quasi ponctuels et assez eloignes Les moyens d'observation utilises pour connaitre avec la meilleure precision possible le mouvement des satellites artificiels lances depuis 1957 et le fait de la proximite relative de ces satellites par rapport a la Terre sont par eux memes de nature a reveler soit des alterations de la loi classique de l'attraction newtonienne dont la signification serait a rechercher soit l'intervention de forces perturbatrices dont l'origine et l'expression seraient a preciser

Geoid and its Geophysical Interpretations Petr Vanicek, Nikolaos T. Christou, 2020-09-23 Geoid and its Geophysical Interpretations explains how an accurate geoid can be constructed and used for a variety of applied and theoretical geophysical purposes The book discusses existing techniques for geoid computation recently developed mathematical and computational tools designed for applications and various interpretations Principles and results are well illustrated This book
