Wine Markets Michael T. Hannan, Giacomo Negro, 2022-02-01

The world of wine encompasses endless variety Consumers want to understand what makes one bottle of wine different from another vintners need to know how to communicate what makes their product distinctive Drawing on a decade of fieldwork in Italy and France as well as interviews with critics and analysis of market data Giacomo Negro Michael T Hannan and Susan Olzak provide an unprecedented sociological account of the dynamics of wine markets They demonstrate how the concepts of genre and collective identity illuminate producers' choices whether they are selling traditional or nonconventional wines Winemakers face a fundamental choice produce an existing style and develop an identity as a proponent of tradition or embrace foreign new or emerging categories and be seen as an innovator To explain this dilemma Negro Hannan and Olzak develop the notion of wine genres or shared understandings among producers and the public Genres emerge through the social structure of production including factors such as group solidarity social cohesion and collective action and become key reference points for critics and consumers *Wine Markets* features case studies of the creation of a modern wine genre and a countermovement against modernism in Piedmont the failure of producers of Brunello di Montalcino in Tuscany to define a clear collective identity and the emergence of the biodynamic wine movement in Alsace This book not only offers keen sociological insight into the wine world but also sheds new light on the logic of markets and organizations more broadly

what is computational design constructible trimble inc - Oct 05 2023

web apr 21 2022 computational design is positioned to make a similar shift in the way we design by replacing codebooks with algorithms and human analysis with artificial intelligence computational design is an emerging design method set to change the landscape of our industry as we know it

computational design cmu school of architecture - Jul 02 2023

web the computational design cd program investigates creative opportunities and critical issues at the nexus of design and computation fundamentally interdisciplinary it mobilizes carnegie mellon university s computational strengths critically towards design architecture and other creative disciplines

computational design generative design primer - Jan 28 2023

web computational design computational design is not any one algorithm or off the shelf process you can utilize rather we describe it as an approach whereby a designer defines a series of instructions rules and relationships that precisely identify the steps necessary to achieve a proposed design and its resulting data or geometry crucially

computational design arts design architecture unsw sydney - Apr 30 2023

web computational design uses digital technologies to enhance and optimise design processes through algorithms and cutting edge technologies computational designers develop creative technical and aesthetic solutions to solve challenges of the 21st century why study computational design at unsw

computational design the future of how we make things is - Jun 01 2023

web sep 4 2018 while designers traditionally rely on intuition and experience to solve design problems computational design is a new design methodology that can literally produce hundreds or thousands of design permutations to find the absolute best solution to a problem the shifting roles of humans and computers

computational design in architecture defining parametric - Dec 27 2022

web jun 1 2020 this paper discusses computational design cd and proposes an improved and sound taxonomy for a set of key cd terms namely parametric generative and algorithmic design based on an extensive literature review from which different definitions by various authors were collected analyzed and compared previousarticlein issue

introduction to computational design subsets challenges in - Feb 26 2023

web dec 3 2021 computational design cd is not just automating existing traditional processes or tedious tasks it is about shifting the way we think and design cd systems can be grouped into three main categories
