Multinational Agribusinesses provides managers with answers to the questions they consider every day, including: Why do some multinational agribusinesses grow faster than others? Is product or geographic diversification conducive to good performance? Are Japanese food multinationals a challenge to my business? What industrial and geographical strategies are my competitors using? Government officials in countries hosting multinationals can find answers to their questions, including: Is my food multinational taking its research and development facilities abroad? Will foreign direct investment outflows reduce my country's export of food? Are multinational agribusinesses from new source countries viable? And Multinational Agribusinesses will supply academics with responses to theoretical inquiries such as: Is the standard theory of the multinational enterprises applicable to food multinationals? What are the specificities of food multinationals compared to other multinationals? Multinational Agribusinesses is a unique resource for international business managers, officials from government or international organizations and academics working in international business studies and agricultural economics. **Reading**

Retail Neil Wrigley, Michelle Lowe, 2014-04-04. Reading Retail captures contemporary debates on the geography of retailing and consumption spaces. It is constructed around a series of readings from key works and is designed to encourage readers to develop a sense of engagement with the rapidly evolving debates in this field. More than 60 edited readings are integrated into the text, providing a guided route map through the literature and into the study of the geographies of retailing and consumption. The volume also introduces readers to the exciting and interdisciplinary developments unfolding in the new retail geography, drawing on up to the minute research material from areas ranging from anthropology to business studies and tackling issues as diverse as retail internationalization and e-commerce. Reading Retail is unique in bringing together a huge range of perspectives on retailing and consumption spaces and will provide a key source text for students in this field.

Cuisine and Empire Rachel Laudan, 2015-04-03. Rachel Laudan tells the remarkable story of the rise and fall of the world's great cuisines from the mastery of grain cooking some twenty thousand years ago to the present in this superbly researched book. Probing beneath the apparent confusion of dozens of cuisines to reveal the underlying simplicity of the culinary family tree, she shows how periodic seismic shifts in culinary philosophy, beliefs about health, the economy, politics, society and the gods prompted the construction of new cuisines, a handful of which chosen as the cuisines of empires came to dominate the globe. *Cuisine and Empire* shows how merchants, missionaries and the military took cuisines over mountains, oceans, deserts and across political frontiers. Laudan's innovative narrative treats cuisine like language, clothing or architecture as something constructed by humans. By emphasizing how cooking turns farm products into food and by taking the globe rather than the nation as the stage, she challenges the agrarian, romantic and nationalistic myths that underlie the

contemporary food movement Food Justice Robert Gottlieb, Anupama Joshi, 2013-01-25 The story of how the emerging food justice movement is seeking to transform the American food system from seed to table In today's food system farm workers face difficult and hazardous conditions low income neighborhoods lack supermarkets but abound in fast food restaurants and liquor stores food products emphasize convenience rather than wholesomeness and the international reach of American fast food franchises has been a major contributor to an epidemic of globesity To combat these inequities and excesses a movement for food justice has emerged in recent years seeking to transform the food system from seed to table In Food Justice Robert Gottlieb and Anupama Joshi tell the story of this emerging movement A food justice framework ensures that the benefits and risks of how food is grown and processed transported distributed and consumed are shared equitably Gottlieb and Joshi recount the history of food injustices and describe current efforts to change the system including community gardens and farmer training in Holyoke Massachusetts youth empowerment through the Rethinkers in New Orleans farm to school programs across the country and the Los Angeles school system's elimination of sugary soft drinks from its cafeterias And they tell how food activism has succeeded at the highest level advocates waged a grassroots campaign that convinced the Obama White House to plant a vegetable garden The first comprehensive inquiry into this emerging movement Food Justice addresses the increasing disconnect between food and culture that has resulted from our highly industrialized food system *Paradox of Plenty* Harvey Levenstein, 2003-05-30 This book is intended for those interested in US food habits and diets during the 20th century American history American social life and customs
