Food Packaging And Preservation Theory And Practice:

Food Packaging and Preservation M. Mathlouthi, 2013-12-14 This book is an updating of Food Packaging and Preservation Theory and Practice published in 1986 by Elsevier Applied Science Since that date many things have changed in the world Hence the name given to the first IFTEC meeting held at the Hague NL November 15 18 1992 Food Technology for a Changing World Is the world changing for better or worse and what can food technology improve The keynote lecture of the IFTEC meeting dealt with hunger and the challenge it represents to food science and technology In the preface to the 1986 book it was suggested that food packaging could solve some of the problems of crop preservation in countries where starvation is prevalent However such thoughts did not solve any problems The famine is still spreading in Africa The unbalanced north south situation evoked in the 1986 preface has not improved The international market of foods and agricultural products is constantly changing and food packaging scientists can only explore new ways to help cope with this Some of these ideas are approached in this book particularly in chapters 9 10 and 12 Food Packaging and Preservation

of the Institute of Food Technologists the ten most significant innovations in food science developed during the past 50 years were named Food Technology September 1989 Among the Top 10 innovations controlled atmosphere packaging CAP for fruits and vegetables was listed 5th in order of importance Of course CAP is a forerunner of MAP modified atmosphere packaging in which a variety of food products are packaged under selective mixtures of atmospheric gases but without the on going maintenance control of the gas mixture Development of packaging systems and films that are selectively permeable to specific gases has been the key element in the commercialization of controlled and modified atmosphere packaging of foods It may not be far from the truth to say that since then there has been an explosion of activities around MAP CAP especially in research and development into various aspects of this technology The application of MAP to some bakery products fresh fruits and salads and fresh meats and meat products has reached a significant level both in Europe and North America The increasing consumer demand for fresh or near fresh products and convenient microwavable foods has added impetus to the growth of MAP CAP technology It is therefore timely that a comprehensive book that provides scientific background and practical applications of the technology should be written

Handbook of Biopolymers and Biodegradable Plastics

Sina Ebnesajjad, 2012-12-31 Biopolymers and Biodegradable Plastics are a hot issue across the Plastics industry and for many of the industry sectors that use plastic from packaging to medical devices and from the construction industry to the automotive sector This book brings together a number of key biopolymer and biodegradable plastics topics in one place for a broad audience of engineers and scientists especially those designing with biopolymers and biodegradable plastics or evaluating the options for switching from traditional plastics to biopolymers Topics covered include preparation fabrication applications and recycling including biodegradability and compostability Applications in key areas such as films coatings controlled release and tissue engineering are discussed Dr Ebnesajjad provides readers with an in depth reference for the plastics industry material suppliers and processors bio polymer producers bio polymer processors and fabricators and for industry sectors utilizing biopolymers automotive packaging construction wind turbine manufacturers film manufacturers adhesive and coating industries medical device manufacturers biomedical engineers and the recycling industry Essential information and practical guidance for engineers and scientists working with bioplastics or evaluating a migration to bioplastics Includes key published material on biopolymers updated specifically for this Handbook and new material including coverage of PLA and Tissue Engineering Scaffolds Coverage of materials and applications together in one handbook enables engineers and scientists to make informed design decisions

Natural Antimicrobials in Food Safety and Quality Mahendra Rai, 2011-02-01 The demands of producing high quality safe pathogen free food rely increasingly on natural sources of antimicrobials to inhibit food spoilage organisms and foodborne pathogens and toxins Discovery and development of new antimicrobials from natural sources for a wide range of application requires that knowledge of traditional sources for food antimicrobials is combined with the latest technologies in identification characterization and

application This book explores some novel natural sources of antimicrobials as well as the latest developments in using well known antimicrobials in food Innovations in Food Packaging Jung H. Han, 2005-07-20 Innovations in Food Packaging addresses selective topics of functions of food packaging to modify the traditional notion of this process This book is organized into five parts Part I focuses on the fundamental theories covering physical chemistry background and quality preservation of foods Parts II and III discuss active packaging research and development and modified atmosphere packaging of fresh produce meats and ready to eat products respectively Part IV talks about edible and biodegradable coatings and films whereas Part V discusses commercialization aspects of packaging technologies Each part is divided into chapters of subject review and detailed technical information This text will benefit those who are interested in innovative technology of food packaging in general and experienced field packaging specialists and graduate level food scientists in particular This book will be useful as a textbook not only for extension programs of food packaging development in food industry but also for advanced graduate level food packaging courses Covers four major food packaging topics Theories in food packaging Active packaging Modified atmosphere packaging Edible films and coatings **Environmental Health Perspectives**, 1990
