Food Packaging Technology Debra K. Heynon, 1991 *Food Packaging Technology*, 1991 **Food Packaging Materials** Preeti Singh, Ali Abas Wani, Horst-Christian Langowski, 2017-06-26 This book is arguably the first one focusing on packaging material testing and quality assurance Food Packaging Materials Testing of mechanical and other physical properties and of the thickness of main components and coating layers This book has been designed to shed light on food packaging material testing in view of packaging integrity shelf life of products and conformity with current regulations This comprehensive book written by a team of specialists in the specific areas of food packaging package testing and food contact regulations deals with the problems in a series of well defined chapters It covers the relations between packaging properties and shelf life of products and describes testing methods for plastics metal glass and paper including the areas of vibration permeation and migration tests It will be of benefit for students scientists and professionals in the area of food packaging

Food and Beverage Packaging Technology Richard Coles, Mark J. Kirwan, 2011-04-25 Now in a fully revised and updated second edition this volume provides a contemporary overview of food processing packaging technologies It acquaints the reader with food preservation processes shelf life and logistical considerations as well as packaging materials machines and processes necessary for a wide range of packaging presentations The new edition addresses environmental and sustainability concerns and also examines applications of emerging technologies such as RFID and nanotechnology It is directed at packaging technologists those involved in the design and development of packaging users of packaging in food companies and those who specify or purchase packaging Key Features An up to date and comprehensive handbook on the most important sector of packaging technology Links methods of food preservation to the packaging requirements of the common types of food and the available food packages Covers all the key packaging materials glass plastics and paperboard Fully revised second edition now covers sustainability nanotechnology and RFID **Food Packaging Technology** Richard Coles, Derek McDowell, Mark J. Kirwan, 2003-08-15 The protection and preservation of a product the launch of new products or re launch of existing products perception of added value to products or services and cost reduction in the supply chain are all objectives of food packaging Taking into consideration the requirements specific to different products how can one package successfully meet all of these goals Food Packaging Technology provides a contemporary overview of food processing and packaging technologies Covering the wide range of issues you face when developing innovative food packaging the book includes Food packaging strategy design and development Food biodeterioration and methods of preservation Packaged product quality and shelf life Logistical packaging for food marketing systems Packaging materials and processes The battle rages over which type of container should be used for which application It is therefore necessary to consider which materials or combination of materials and processes will best serve the market and enhance brand value Food Packaging Technology gives you the tools to determine which form of packaging will meet your business goals without

compromising the safety of your product **Food Packaging Science and Technology** Dong Sun Lee,Kit L. Yam,Luciano Piergiovanni,2008-04-01 With a wealth of illustrations examples discussion questions and case studies the Food Packaging Science and Technology covers basic principles and technologies as well as advanced topics such as active intelligent and sustainable packaging with unparalleled depth and breadth of scope Emphasizing the application of relevant scientific

Food Packaging Technology, 2 Volume Set G. Bureau,J.-L. Multon,1996-12-17 Food Packaging Technology covers the development of packages and packaging systems examining all aspects that are relevant to the processing preservation distribution and marketing of virtually all types of food The two volume set provides an overview of the areas of science and technology that influence the packaging process and in depth treatment of the properties and forms of available packaging materials emphasizing properties that can affect food quality The work contains details all aspects of food packaging covering not only the technical areas but also the marketing economic legislative and regulatory areas Food Packaging Gordon L. Robertson,1998-01-15 Presents a comprehensive background on the development of packages and packaging systems for foods examining the aspects of packaging technology that are relevant to the processing preservation distribution and marketing of a particular food and the areas of food science and technology that influence the packaging process This book is designed to be of interest to food scientists and technologists packaging engineers designers and technologists quality assurance personnel and upper level undergraduate and graduate students in these disciplines

Current Technologies in Flexible Packaging Michael L. Troedel,1986 Food Packaging Gordon L. Robertson,2005-09-22 A comprehensive and accessible textbook Food Packaging Principles and Practice Second Edition presents an integrated approach to understanding the principles underlying food packaging and their applications Integrating concepts from chemistry microbiology and engineering it continues in the fine tradition of its bestselling predecessor and has been completely updated to include new updated and expanded content The author divides the book s subject matter into five parts for ease of use The first part addresses the manufacture properties and forms of packaging materials placing emphasis on those properties that influence the quality and shelf life of food The second part then details the various types of deteriorative reactions that foods undergo examines the extrinsic factors controlling their reaction rates and discusses specific factors influencing shelf life and the methodology used to estimate that shelf life Chapters on the aseptic packaging of foods active and intelligent packaging modified atmosphere packaging and microwavable food packaging are explored in the third part while the fourth part describes packaging requirements of the major food groups The final section examines the safety and legislative aspects of food packaging The book also includes over 300 industry abbreviations acronyms and symbols and an expansive index What s New in the Second Edition Includes five new chapters and diagrams that explain recent developments in packaging materials and processes Provides the latest information on new and active packaging technologies Presents new updated and expanded references Adhering to the highly organized format

that made the first edition so straightforward and informative this latest edition of Food Packaging Principles and Practice presents students with the most essential and cutting edge information available The author maintains a website with more information

Food Packaging and Preservation M. Mathlouthi, 2013-12-14 This book is an updating of Food Packaging and Preservation Theory and Practice published in 1986 by Elsevier Applied Science Since that date many things have changed in the world Hence the name given to the first IFTEC meeting held at the Hague NL November 15 18 1992 Food Technology for a Changing World Is the world changing for better or worse and what can food technology improve The keynote lecture of the IFTEC meeting dealt with hunger and the challenge it represents to food science and technology In the preface to the 1986 book it was suggested that food packaging could solve some of the problems of crop preservation in countries where starvation is prevalent However such thoughts did not solve any problems The famine is still spreading in Africa The unbalanced north south situation evoked in the 1986 preface has not improved The international market of foods and agricultural products is constantly changing and food packaging scientists can only explore new ways to help cope with this Some of these ideas are approached in this book particularly in chapters 9 10 and 12
