Rupasinghe, 2016-03-11 A boy who was longing to discover the imaginary world that conquered his mind when his father was narrating free time stories reaches the final destination after three decades breaking frontiers overcoming diverse hurdles and thus making the journey an unique and colourful experience *Footprints in Obscurity* is an impressive effort by the author in taking the reader on a real time journey across twenty nine African countries Its a story of endurance perseverance and transformation meshed with contemporary African realities encapsulated in twenty chapters dedicated to carefully selected themes based on the author s first hand experiences during half a decade of travels An unconventional revelation and a true story about Africa the book also provides a profound psychological insight on how childhood dreams often shape one s adult life **Footprint Berlin** Neil Taylor, Nina Hamilton, 2003 Berlin has grown up fast Capital of a reunited Germany only since 1999 it has already earned its international spurs and no longer has to settle for being simply German Visitors can leave Berlin without having experienced Germany American musicals Babylonian mosaics French bakeries and Norman Foster creations are comfortably integrated into the buildings of Schinkel and the operas of Wagner The city that needed a long period in rehab for some serious occupation therapy is now confident enough to woo British architects Italian designers and Polish restorers to join the burgeoning multinational community But though reunified Berlin has undergone a level of transformation rivalled only by post Mao Tse Tung Shanghai it has stuck to its principles The capital of counter culture and inspiration for the likes of David Bowie and Iggy Pop has lost none of its radical cutting edge reputation Eastern wastelands are now Ossi cool where thousands of disused buildings have become squats for underground parties and art galleries Planners are bringing back to life the wastelands that once scarred this capital of divided alliances Not only is Berlin attempting to build a mini Manhattan in its business zones a gentrified NYC TriBeCa in residential Mitte and a London with its new government buildings in Mitte and Tiergarten but it is bravely facing up to its past by commemorating holocaust

victims on land that had visually marked its urban and political dichotomy It is also celebrating its past The former Parliament is back in action and though the royal family is not their statues are back and their palaces are now open to all Trams once ridiculed in the West as a noisy legacy of communism are quietly extending their routes all over the city Only the Nazi era is buried and covered with the rubble that marked its final days The height and size of Berlin's new buildings as well as the pedigree of their architects show the city has no doubt about its long term future Much of the 20th century will in due course be remembered by historians as a grim aberration New generations will hopefully continue Berlin's pioneering spirit at the speed dictated by those in power in the 1990s Berlin is the greenest of cities visually and politically The Grunewald Green Wood is an enormous park to the southwest of the city propping it up like the neck stem of the country's brain The Green Party is in the ruling coalition protecting the proud statistic that Berlin has more trees than shops if not yet more bicycles than cars Its buildings have more glass than concrete and solar energy powers them Berliners are avid recyclers with drinkers returning bottles to shops and train users sorting rubbish into bins on platforms But recycling is just one of many trends that starts as radical spreads elsewhere and then almost becomes conservative Gays came out in the 1920s and so did cyclists and nudists By the time art causes a stir in London or New York it is conventional in Berlin Take a look at the future here and see if you think it works *Encyclopedia of World Geography* R.
