Food Policies:

Food Policy in the United States Parke Wilde, 2013 This book offers a broad introduction to food policies in the United States Real world controversies and debates motivate the book s attention to economic principles policy analysis nutrition science and contemporary data sources It assumes that the reader s concern is not just the economic interests of farmers but also includes nutrition sustainable agriculture the environment and food security The book s goal is to make US food policy more comprehensible to those inside and outside the agri food sector whose interests and aspirations have been ignored The chapters cover US agriculture food production and the environment international agricultural trade food and beverage manufacturing food retail and restaurants food safety dietary guidance food labeling advertising and federal food assistance programs for the poor The author is an agricultural economist with many years of experience in the non profit advocacy sector the US Department of Agriculture and as a professor at Tufts University The author's well known blog on US food policy provides a forum for discussion and debate of the issues set out in the book Food policies and their implications on overweight and obesity trends in selected countries in the Near East and North Africa region International Food Policy Research Institute, Food and Agriculture Organization of the United Nations, 2020-12-16 Regional and global trends in body weight show that the Near East and North Africa NENA region countries especially the Gulf Cooperation Council GCC member countries have the highest average body mass index and highest rates of overweight and obesity in the world There exist several explanations that expound the high rates of overweight and obesity in most NENA countries including the nutrition transition urbanization changes in lifestyle and consequent reduction of physical activities This study examines the implication of food policies mainly trade and government food subsidies on evolving nutritional transitions and associated body weight outcomes We examine the evolution of trade food policies food systems and body weight outcomes across selected countries in the NENA region Egypt Jordan and Iraq In particular we investigate the implications of important trade food policies in shaping diets and food systems as well as their implications on public health outcomes mainly the rising levels of overweight and obesity in the NENA region We provide a simple conceptual framework through which trade policies tariff rates and domestic government food policies subsidies may affect food systems and nutritional outcomes An important and innovative feature of this study is that it compiles several macro and micro level datasets that allow both macro and micro level analyses of the evolution of trade food policies and associated obesity trends This approach helps to at least partly overcome the data scarcity that complicates rigorous policy research in the NENA region Overweight and obesity rates have almost doubled between 1975 and 2016 with varying rates and trends across regions For instance whereas body weight in the NENA region was comparable with that found in high income countries in the early years after the 1990s regional overweight and obesity rates became much higher than those in high income countries Specifically while most high income countries are experiencing a relative slowing of increases in overweight rates the trend for the NENA region continues to

increase at higher rates The evolution of overweight rates for the GCC countries are even more concerning These trends are likely to contribute to the already high burden of non communicable diseases in the NENA region **Policies and Globalization** Stephen K. Wegren, 2005-01-01 The post Soviet period has witnessed Russia's increasing interdependence with other nations in its food trade as in the economy as a whole President Putin has repeatedly identified international integration as an economic necessity if Russia is to share in the benefits of globalization In Russia s Food Policies and Globalization author Stephen K Wegren analyzes the primary questions affecting Russia and globalization How do Russia s domestic and external food policies affect its efforts at international integration How prepared is Russia for global economic integration for instance entrance into the World Trade Organization What are the structural economic and political obstacles that exist in Russia s food policies which in turn hinder closer integration In short will Russia integrate or fall behind and what is the role of food policy in deciding this crucial issue Through an analysis of Russia's contemporary food policies and strategies Wegren places Russia s economic development in a new international context Political scientists economists policymakers and scholars of the Soviet and post Soviet period as well as those interested in rural studies must Developing Sustainable Food Systems, Policies, and Securities Obayelu, Abiodun Elijah, Obayelu, read this book Oluwakemi Adeola, 2020-04-17 A food system is sustainable if it delivers food and nutrition security for all without compromising the economic social and environmental bases to generate food security and nutrition for future generations Sustainable food systems are vital in ensuring global health and ending malnutrition in all its forms Assessing important dimensions of the food system such as nutrition sustainable agriculture food loss and waste can provide stakeholders with necessary information to evaluate the strength of their country s food systems and determine where more support is needed Developing Sustainable Food Systems Policies and Securities is a pivotal reference source that explores the nature extent and causes of nutrition problems across the world as well as the role that agricultural policy plays in these issues The book supports the development of sustainable food systems policy options and securities by various countries in order to successfully maintain sustainable food production systems Featuring research topics such as food security carbon emissions and nutrition the book is ideally designed for economists environmentalists food producers policymakers researchers academicians and students seeking coverage on agricultural and sustainability issues OECD Agriculture and Food Policy Reviews Policies for the Future of Farming and Food in the European Union OECD, 2023-10-09 Policies for the Future of Farming and Food in the European Union applies the OECD Productivity Sustainability and Resilience PSR analytical framework along with the latest data from the OECD Agri Environmental Indicators to benchmark the sustainable productivity performance of the EU s agricultural sector and to identify the main challenges ahead Food policies and nutrition transition in Sri Lanka: Historical trends, political regimes, and options for interventions Weerahewa, Jeevika, Wijetunga, Chatura Sewwandi, Babu, Suresh Chandra, Atapattu, Nihal, In this paper we look at Sri Lanka's food and

nutrition policies from a historical perspective to identify the intervention options for addressing the country's current food security and nutrition challenges U.S. Food Policy Lisa Markowitz, John Brett, 2013-09-13 Inequity of control over food systems is a particularly insidious form of injustice Collectively the contributors to this volume posit that this inequity is rooted in power asymmetries in the U S food system and codified through U S food policies This process puts the public at risk in the U S and via trade and foreign aid policies in the Global South Inequities are manifest in the allocation of food and food producing resources in favor of the wealthy exploitation of the natural environment for short term gain of private interests over long term public ones the framing of public discussion on food and food deprivation and finally the deflection of moral challenges posed by human rights to food The contributors draw on long term anthropological field research to examine these tensions and their on the ground outcomes in diverse cultural and national contexts The authors insightful analyses span a wide variety of topics including dietary change food insecurity livestock production and organic farming in the light of U S trade food labor and agricultural policies and food assistance programs The collection highlights the obstacles to and the dilemmas and inconsistencies in shaping policy in the public interest This book was originally published as a special issue of Food Foodways Food Trade and Foreign Policy Robert L. Paarlberg, 2019-06-30 When U S Secretary of Agriculture Earl L Butz announced in 1974 that food is a weapon he voiced a growing national belief in the political power of food resources President Carter's 1980 decision to embargo grain sales to the Soviet Union appeared at first to confirm this popular notion But can exporting nations such as the United States really use food as a powerful instrument of foreign policy If so are they using that weapon more frequently Are importing nations taking steps to reduce their vulnerability Challenging the view that food has emerged as a political weapon Robert Paarlberg undertakes the first systematic inquiry into the relation between food resources and international power Paarlberg maintains that food trade is seldom manipulated for reasons of foreign policy due to the greater priority assigned by most nations to domestic food and farm policy objectives To support his argument he reviews the recent grain trade experience of three significant and divergent nations India the Soviet Union and the United States He then examines in detail two exceptional instances in which the coercive power of the U S food weapon was put to the test Lyndon Johnson's manipulation of food aid to India in 1965 1967 and the Carter embargo on grain sales to the Soviet Union in 1980 1981 He concludes that the difficulties experienced in each instance only reinforced the larger trend against linking grain trade policy to foreign policy a trend that can be applauded by those concerned with world food security and trade efficiency Robert Paarlberg's challenge of the food power concept provides a valuable comparative insight into the conduct of national as well as international food policies 2013 Global food policy report: Overview Andrew Marble, Heidi Fritschel, 2014-09-16 This 2013 Global Food Policy Report is the third in an annual series that provides an in depth look at major food policy developments and events Initiated in response to resurgent interest in food and nutrition security the series offers a yearly overview of the food policy developments that have
