organisations with a focus on food systems      *The Oxford Handbook of Food, Politics, and Society* Ronald J. Herring, 2014-12-31 Food has for most of our species history been intensely political who gets to eat what how often and through what means The scale of polity in question has shifted over time from very local institutions dividing up grain piles to an international community imagined in the Millennium Development Goals of the United Nations Simultaneously the numbers and interests of people asserting political stakes in food and agriculture have likewise shifted up and out Global networks advocate social justice in distal agrarian systems promotion of some farming techniques and prohibition of others food sovereignty or efficiencies of markets and trade Political consumerism allows the well endowed to vote with their dollars for changes in food systems far from home but depends on certification and labeling from unseen institutions As an object of governmentality food has never been so prominent The thirty five handbook chapters confront four major themes in the politics of food property technology justice and knowledge Ronald Herring s editorial introduction asks how food is political highlighting contention around the role of market state and information in societal decisions The first section of the handbook then examines technology science and knowledge in food production What is known and disputed about malnutrition poverty and food security The second section addresses ethics rights and distributive justice agrarian reform gender inequality entitlements and subsidies and the social vision of the alternative food movement The third section looks to intersections of agriculture and nature wild foods livestock agro ecological approaches to sustainability and climate change and genetic engineering The fourth section addresses food values and culture political consumerism labeling and certification the science and cultural politics of food safety values driving regulation of genetically modified foods and potential coexistence of GMOs and organic and conventional crops The fifth and final section looks at frontiers of global contentions rival transnational advocacy networks social movements for organic farming the who and why of international land grabbing junctures of cosmopolitan and local food narratives the supermarket revolution and the international agrifood industry in low income countries and politics of knowledge in agricultural futures      Society, Environment and Human Security in the Arctic Barents Region Kamrul Hossain, Dorothée Cambou, 2018-05-20 The Arctic Barents Region is facing numerous pressures from a variety of sources including the effect of environmental changes and extractive industrial developments The threats arising out of these pressures result in human security challenges This book analyses the formation and promotion of societal security within the context of the Arctic Barents Region It applies the human security framework which has increasingly gained currency at the UN level since 1994 UNDP as a tool to provide answers to many questions that face the Barents population today The study explores human security dimensions such as environmental security economic security health food water energy communities political security and digital security in order to assess the current challenges that the Barents population experiences today or may encounter in the future In doing so the book develops a comprehensive analysis of vulnerabilities challenges and needs in the Barents Region and provides

recommendations for new strategies to tackle insecurity and improve the wellbeing of both indigenous and local communities This book will be a valuable tool for academics policy makers and students interested in environmental and human security sustainable development environmental studies and the Arctic and Barents Region in particular **Feeding Cities**

Christopher Bosso,2016-11-10 There is enormous current interest in urban food systems with a wide array of policies and initiatives intended to increase food security decrease ecological impacts and improve public health This volume is a cross disciplinary and applied approach to urban food system sustainability health and equity The contributions are from researchers working on social economic political and ethical issues associated with food systems The book s focus is on the analysis of and lessons obtained from specific experiences relevant to local food systems such as tapping urban farmers markets to address issues of food access and public health and use of zoning to restrict the density of fast food restaurants with the aim of reducing obesity rates Other topics considered include building a local food business to address the twin problems of economic and nutritional distress developing ways to reduce food waste and improve food access in poor urban neighborhoods and asking whether the many and diverse hopes for urban agriculture are justified The chapters show that it is critical to conduct research on existing efforts to determine what works and to develop best practices in pursuit of sustainable and socially just urban food systems The main examples discussed are from the United States but the issues are applicable internationally Routledge International Handbook of Social and Environmental Change Stewart Lockie,David A. Sonnenfeld,Dana R. Fisher,2013-10-30 Today the risks associated with global environmental change and the dangers of extreme climatic and geological events remind us of humanity s dependence on favourable environmental conditions Our relationships with the landscapes and ecologies that we are a part of the plants and animals that we share them with and the natural resources that we extract lie at the heart of contemporary social and political debates It is no longer possible to understand key social scientific concerns without at the same time also understanding contemporary patterns of ecosystem change The Routledge International Handbook of Social and Environmental Change reviews the major ways in which social scientists are conceptualizing more integrated perspectives on society and nature from the global to local levels The chapters in this volume by international experts from a variety of disciplines explore the challenges contradictions and consequences of social ecological change along with the uncertainties and governance dilemmas they create The contributions are based around the themes of Climate change energy and adaptation Urban environmental change and governance Risk uncertainty and social learning Re assembling social ecological systems With case studies from sectors across both developed and developing worlds the Handbook illustrates the inter connectedness of ecosystem health natural resource condition livelihood security social justice and development It will be of interest for students and scholars across the social sciences and natural sciences as well as to those interested and engaged in environmental policy at all levels World Directory of Environmental Organizations Thaddeus C.
