Food, People and Society Lynn J. Frewer, Einar Risvik, Hendrik Schifferstein, 2013-03-09 Food consumption is vital to human survival Nevertheless the exact determinants of food perception liking and food choice are still not fully understood Food People and Society tries to fill some of the gaps in our knowledge by studying these processes from multiple perspectives each with their own emphasis Some approaches focus mainly on the characteristics of food products eaten some focus on the person who eats a particular food whereas other approaches emphasize the psychological economic or social context in which food consumption takes place By bringing together these different approaches in one book we open the opportunity to integrate different perspectives and to facilitate comprehension of the complex processes that drive food choice behaviour Food People and Society is written for a wide audience including students and academics interested in food perception and consumption policy makers health educators and nutritionists food manufacturers and food marketers A *Handbook of the People's Health* Walter Moore Coleman, 1913 **News** U.S. National Commission for UNESCO., 1950
