**Fools and Jesters in Literature, Art, and History** Vicki K. Janik, 1998-05-21 Jesters and fools have existed as important and consistent figures in nearly all cultures Sometimes referred to as clowns they are typological characters who have conventional roles in the arts often using nonsense to subvert existing order But fools are also a part of social and religious history and they frequently play key roles in the rituals that support and shape a society's system of beliefs This reference book includes alphabetically arranged entries for approximately 60 fools and jesters from a wide range of cultures Included are entries for performers from American popular culture such as Woody Allen Mae West Charlie Chaplin and the Marx Brothers literary characters such as Shakespeare's Falstaff Rabelais Gargantua and Pantagruel and Singer's Gimpel and cultural and mythological figures such as India's Birbal the American circus clown the Native American Coyote Taishu Engeki of Japan Hephaestus Loki the Norse fool schlimiels and schlimazels and the drag queen The entries written by expert contributors are critical as well as informative Each begins with a biographical artistic religious or historical background section which places the subject within a larger cultural and historical context A description and analysis follow This section may include a discussion of the fool's appearance gender role ethical and moral roles social function and relationship to such themes as nature time and mortality The entry then discusses the critical reception of the subject and concludes with an extensive bibliography of general works

Comics and Conquest Rhiannon Koehler, 2023-11-21 The untold story of Navajo and Hopi resistance and solidarity in the face of forced removal by the US government as documented by tribal editorial cartoons For generations US politicians and energy companies attempted to gain access to the coal and uranium in the Four Corners region where Arizona New Mexico Colorado and Utah meet The land on which they found billions of tons of high grade coal in 1909 however was reserved for the Navajo Din and Hopi peoples and not accessible to extractive enterprise Despite Din and Hopi protests US officials gained access to the coal rich land on Black Mesa in Arizona by purposely fabricating and fueling conflict between the Din and the Hopi In *Comics and Conquest*

historian Rhiannon Koehler documents the story of this conflict through an engaging analysis of historical Navajo and Hopi editorial cartoons. Despite the false narrative that the conflict was driven by inter-tribal animosity and that the subsequent forced removals of thousands of Indigenous peoples were part of a plan to keep the peace, the cartoons that Koehler shares reveal a rich history of artistic activism and Hopi-Diné solidarity against this land grab. The content and claims featured in political cartoons published in the tribal newspapers *Qua Toqti* and the *Navajo Times* in the late 1960s and early 1970s were some of the most critical tools for both coping with the threats of industry and exposing the history of exploitation as it carries on into the present. The conflict, popularly known as the Navajo-Hopi Land Dispute, was presented in mainstream media as an egregious threat to US interests. Acutely aware of their land's value and the minerals and other resources on it, Diné and Hopi political cartoonists used their medium to assert their protest and agency, identify the true instigators of the dispute, and expose and counter the myth that the conflict had intertribal origins. Koehler shows how tribal activism and media ultimately resulted in international recognition of the harms perpetrated by the federal government on Diné and Hopi soil.

*Sounding American* Jennifer Fleege, 2014-05-01 *Sounding American* Hollywood Opera and Jazz tells the story of the interaction between musical form, film technology, and ideas about race, ethnicity, and the nation during the American cinema's conversion to sound. Contrary to most accepted narratives about the conversion, which tend to explain the competition between the Hollywood studios' film sound technologies in qualitative and economic terms, this book argues that the battle between disc and film sound was waged primarily in an aesthetic realm. Opera and jazz, in particular, though long neglected in studies of the film score, were extremely important in defining the scope of the American soundtrack, not only during the conversion but also once sound had been standardized. Examining studio advertisements, screenplays, scores, and the films themselves, author Jennifer Fleege concentrates on the interactions between musical form and film technology, arguing that each of the major studios appropriated opera and jazz in a unique way in order to construct its own version of an ideal American voice. Traditional histories of Hollywood film music have tended to concentrate on the unity of the score, a model that assumes a passive spectator. *Sounding American* claims that the classical Hollywood film is essentially an illustrated jazz opera with a musical structure that encourages an active form of listening and viewing in order to make sense of what is ultimately a fragmentary text.

**Re/Structuring Science Education** Wolff-Michael Roth, 2009-12-24 Since its beginnings, science education has been under the influence of psychological theories of knowing

and learning while in more recent years social constructivist and sociological frameworks have also begun to emerge With little work being done on showing how the perspectives of these separate approaches might be integrated this work aims to plug the gap The book helps lay the groundwork for reuniting sociological and psychological perspectives on the knowing learning and teaching of science Featuring a range of integrative efforts beginning with simple conversation the chapters here include not only articles but also commentaries that engage with other papers as well as a useful running narrative that from the introduction to the epilogue contextualizes the book and its sections Specific attention is given to cultural historical activity theory which already offers an integration of psychological and cultural historical sociological perspectives on collectively motivated human activities A number of chapters as well as the contextualizing narrative explicitly use this theory as a framework for rethinking science education to achieve the reunification that is the goal of this work All the contributors to this volume have produced texts that contribute to the effort of overcoming the extant divide between sociological and psychological approaches to science education research and practice From very different positions gender culture race they provide valuable insights to reuniting approaches in both theory and method in the field As an ensemble the contributions constitute a rich menu of ideas from which new forms of science education can emerge
