Gnostic Fools Agnes Horvath, 2025-11-11 This book offers a political anthropological discussion of our contemporary situation regarding sceptical attitudes towards scientific expertise and authority and the increasing role of power and politics It does so through an exploration of the fool or Gnostic fool as a type drawing on ideas about the modality of the anthropological trickster figure and the mentalities that this type disseminates Arguing that a recent dissolution of stable identities has made orderly action and connections impossible the author shows that we are now entering into a confused understanding of ourselves no longer linked to history or society nor to our sexes or personality In this period the growing interest in magical and occult traditions reflects increasing feelings of powerlessness against the whims of politics power and authority where rational thinking disappoints and fails a new Gnostic universe is born The relationship between standard uses of the fool and the Gnostic fool is addressed using political and social theory sociology and anthropology religious studies and the history of ideas The book thus combines a study of familiar traditional texts with unusual phenomena from both recent and distant history elucidating their surprising prevalence in surrounding contemporary power structures Addressing a crucial aspect of contemporary reality characterising and interrogating the self production of fools and the Gnostic intellectual type it details a serious and puzzling blind spot in academic scholarship As such it will be of central relevance to scholars researchers and postgraduate students working in anthropology ethnography sociology historical sociology religious studies and philosophy worldwide

Studies in No-Self Physicalism Feng Ye,2022-12-12 This book demonstrates how a radical version of physicalism No Self Physicalism can offer an internally coherent and comprehensive philosophical worldview It first argues that a coherent physicalist should explicitly treat a cognitive subject merely as a physical thing and should not vaguely assume an amorphous or even soul-like subject or self This approach forces the physicalist to re-examine traditional core philosophical notions such as truth analyticity modality apriority because our traditional understandings of them appear to be predicated on a cognitive subject that is not literally just a physical thing In turn working on the assumption that a cognitive subject is itself completely physical namely a neural network based robot programmed by evolution hence the term No Self the book proposes physicalistic theories on conceptual representation truth analyticity modality the nature of mathematics epistemic justification knowledge apriority and intuition as well as a physicalistic ontology These are meant to show that this No Self Physicalism perhaps the most minimalistic and radical version of physicalism proposed to date can accommodate many aspects that have traditionally interested philosophers Given its refreshingly radical approach and painstakingly developed content the book is of interest to anyone who is seeking a coherent philosophical worldview in this age of science The Motley Fool Investment Workbook David Gardner,Tom Gardner,2003-05-05 Drawing on lessons learned in the past few
