book is distinctive in also bringing the work of scholars from regions such as South and East Asia and the Pacific to the attention of an international audience *Africa Today*, 2002 **Women, Law and Human Rights** Fareda Banda, 2005-10-04 Africa with its mix of statute custom and religion is at the centre of the debate about law and its impact on gender relations This is because of the centrality of the gender question and its impact on the cultural relativism debate within human rights It is therefore important to examine critically the role of law broadly constructed in African societies The book focuses on women s experiences in the family This is because the lives of women continue to be lived out largely in the private domain where the right to privacy is used to conceal unequal treatment of women which is justified by invoking custom and tradition The book shows how law and its interpretation is used to disenfranchise women resulting in their being deprived of land and other property which they may have helped to accumulate It also considers issues of violence within the home reproductive rights and examines the issue of female genital cutting The role of women in development is explored as is their participation in politics and the NGO sector A major theme of the book is a consideration of the linkages of constitutional and international human rights norms with local values This is done using feminist tools of analysis The book considers the provisions of the Protocol to the African Charter on Human and People s Rights on the Rights of Women which was adopted by the African Union in July 2003 **The Limits of Law and Development** Sam Adelman, Abdul Paliwala, 2020-08-13 The book examines the well established field of law and development and asks whether the concept of development and discourses on law and development have outlived their usefulness The contributors ask whether instead of these amorphous and contested concepts we should focus upon social injustices such as patriarchy impoverishment human rights violations the exploitation of indigenous peoples and global heating If we abandoned the idea of development would we end up adopting another equally problematic term to replace a concept which for all its flaws serves as a commonly understood shorthand The contributors analyse the links between conventional academic approaches to law and development neoliberal governance and activism through historical and contemporary case studies The book will be of interest to students and scholars of development international law international economic law governance and politics and international relations

UN Millennium Development Library: Who's Got the Power UN Millennium Project, 2013-06-17 The Millennium Development Goals adopted at the UN Millennium Summit in 2000 are the world s targets for dramatically reducing extreme poverty in its many dimensions by 2015 income poverty hunger disease exclusion lack of infrastructure and shelter while promoting gender equality education health and environmental sustainability These bold goals can be met in all parts of the world if nations follow through on their commitments to work together to meet them Achieving the Millennium Development Goals offers the prospect of a more secure just and prosperous world for all The UN Millennium Project was commissioned by United Nations Secretary General Kofi Annan to develop a practical plan of action to meet the Millennium Development Goals As an independent advisory body directed by Professor Jeffrey D Sachs the UN Millennium Project submitted its

recommendations to the UN Secretary General in January 2005. The core of the UN Millennium Project's work has been carried out by 10 thematic Task Forces comprising more than 250 experts from around the world including scientists, development practitioners, parliamentarians, policymakers and representatives from civil society, UN agencies, the World Bank, the IMF and the private sector. This report lays out the recommendations of the UN Millennium Project Task Force on Child and Maternal Health. The Task Force recommends the rapid and equitable scale up of interventions like the Integrated Management of Childhood Illness, the universal provision of emergency obstetric care and sexual and reproductive health services and rights be provided through strengthened health systems. This will require that health systems be seen as social institutions to which all members of society have a fundamental right. This bold yet practical approach will enable every country to reduce the under-five mortality rate by two thirds and the maternal mortality rate by three quarters by 2015.
