From Columbus To Conagra The Globalization Of Agriculture And Food:

From Columbus to ConAgra Alessandro Bonanno, 1994 This examination of the role of agriculture and food in the new international division of labor argues that the globalized economy creates new winners and losers *The Sustainability of Rural Systems* I.R. Bowler, C.R. Bryant, C. Cocklin, 2013-06-29 Economy society and environment comprise the three main dimensions of sustainable development but too often they are considered separately This book by comparison examines the interaction of the three dimensions in the context of rural systems embracing a wide range of topics including globalisation and reregulation in sustainable food production conservation and sustainability the development of sustainable rural communities and sustainable rural urban interaction An international team of geographers drawn from the International Geographical Union's Commission on The Sustainability of Rural Systems summarises the basis of unsustainable rural development in these topics the remedial policies being pursued and their own evaluations of the policies Rather than deal just with generalisations their analyses are illustrated by detailed case studies drawn from a variety of rural systems in both developed and developing countries The Revival of Civil Society Michael G. Schechter, 2016-07-27 What is meant by the concept of civil society Why do some equate it with liberal democracy while others think it simply a guise for a market economy Who benefits from globalization and who loses out Can civil society prosper in an era of globalization Can global civil society restrain some of the negative consequences of economic globalization Through a series of unique case studies and theoretical inquiries this volume provides a set of concrete answers to questions such as these **Seafood Supply Chains** Miriam Greenwood, 2019-01-16 This book provides a historical and analytical account of changes in the seafood supply chain in Britain from the mid twentieth century to the present looking at the impact of various types of governance The governance of marine fisheries has been a contested issue for decades with increasing anxieties about overfishing In tandem the rise of aquaculture fish and shellfish farming has driven another set of environmental concerns In the food system there have been scandals about safety failures and about fraud At the same time governments issue advice urging people to eat fish for its health benefits In the context of these problems and contradictions how have governments the food industry and ordinary consumers responded The author shows how different types of governance and regulation have been used to seek seafood sustainability and food safety and to communicate nutritional messages to the public and with what effects The book also presents a new model for understanding food chains which combines governance and power approaches with an emphasis on understanding the interests served and the resulting balance of public and private benefits This shows that the role of state regulation should have greater emphasis in governance and agri food analysis and that theories about supply chain functioning including the part played by major retailers and civil society should be modified by a more nuanced understanding of the role of standards and certification systems Although much of the focus is on the UK and Europe this book provides key lessons internationally for the governance of seafood and other agri food supply chains The

book will be of interest to students of food policy and those working in the seafood industry or studying for connected qualifications and more widely to readers with an interest in seafood issues and problems

Privatization of Information and Agricultural Industrialization Steven A. Wolf, 1997-09-18 The respective roles of public and private sector institutions engaged in development and dissemination of agricultural information are currently undergoing dramatic change Enhanced incentives new technologies and changes in industrial organization are spurring private investment Simultaneously political and economic conditions are constraining public agencies participation in the current information boom Privatization of Information and Agricultural Industrialization identifies the basis and implications of the ongoing shift from public to private sector control of agricultural information Privatization of information raises meaningful social economic and environmental concerns deserving of immediate attention by analysts advocates policy makers and those with a direct economic stake in agriculture The objectives of the book are to

World Hunger Liz Young, 2002-01-04 World Hunger explores the nature and extent of contemporary world hunger explaining why hunger still persists while agricultural production increases and genetic engineering revolutionises food production and distribution Numerous case studies drawn from the North and South illustrate the diversity of diets in the world and the connections between the global and local Globalisation and access to food in the global supermarket is examined Explaining the essential political character of hunger the author exposes popular myths and identifies positive changes where prevailing inequalities and ideologies are challenged and it becomes possible to envisage a world where hunger is history

Fast Food/Slow Food Richard Wilk, 2006-08-25 Wilk and his colleagues draw upon their own international field experience to examine how food systems are changing around the globe The authors offer a cultural perspective that is missing in other economic and developmental studies and provide rich ethnographic data on markets industrial production and food economies This new book will appeal to professionals in economic and environmental anthropology economic development agricultural economics consumer behavior nutritional sciences environmental sustainability and globalization studies

Sustainable Food Systems Terry Marsden, Adrian Morley, 2014-01-21 In response to the challenges of a growing population and food security there is an urgent need to construct a new agri food sustainability paradigm This book brings together an integrated range of key social science insights exploring the contributions and interventions necessary to build this framework Building on over ten years of ESRC funded theoretical and empirical research centered at BRASS it focuses upon the key social economic and political drivers for creating a more sustainable food system Themes include regulation and governance sustainable supply chains public procurement sustainable spatial strategies associated with rural restructuring and re calibrated urbanised food systems minimising bio security risk and animal welfare burdens The book critically explores the linkages between social science

research and the evolving food security problems facing the world at a critical juncture in the debates associated with not only food quality but also its provenance vulnerability and the inherent unsustainability of current systems of production and consumption Each chapter examines how the links between research practice and policy can begin to contribute to more sustainable resilient and justly distributive food systems which would be better equipped to feed the world by 2050

Encyclopedia of Agriculture and Food Systems Neal K. Van Alfen, 2014-07-29 *Encyclopedia of Agriculture and Food Systems* Second Edition Five Volume Set addresses important issues by examining topics of global agriculture and food systems that are key to understanding the challenges we face Questions it addresses include Will we be able to produce enough food to meet the increasing dietary needs and wants of the additional two billion people expected to inhabit our planet by 2050 Will we be able to meet the need for so much more food while simultaneously reducing adverse environmental effects of today's agriculture practices Will we be able to produce the additional food using less land and water than we use now These are among the most important challenges that face our planet in the coming decades The broad themes of food systems and people agriculture and the environment the science of agriculture agricultural products and agricultural production systems are covered in more than 200 separate chapters of this work The book provides information that serves as the foundation for discussion of the food and environment challenges of the world An international group of highly respected authors addresses these issues from a global perspective and provides the background references and linkages for further exploration of each of topics of this comprehensive work Addresses important challenges of sustainability and efficiency from a global perspective Takes a detailed look at the important issues affecting the agricultural and food industries today Full colour throughout **Health and Sustainability in the Canadian Food System** Rod

MacRae, Elisabeth Abergel, 2012-07-18 Civil society organizations are among the most vociferous critics of the modern food system Yet even after decades of campaigns governments have failed to address health and sustainability issues in a systematic way New approaches are in order and this volume showcases the research of experts from various disciplines who argue that solutions lie not just in lobbying elected officials but rather in initiatives at the subparliamentary level Case studies on a range of topics from breastfeeding and sustainable pest management promotion to programs such as Canada's Action Plan on Food Security tell a story of misguided campaigns and missed opportunities Real change this inspiring volume suggests is possible It will come when advocacy groups develop innovative strategies of influencing decision makers more resistant to public pressure business lobbies well connected to government agencies middle managers and ministries unused to collaborating across departmental mandates Farmers' Markets, **Resistance to the Neoliberal Agri-Food Regime** Alessandro Bonanno, Steven A. Wolf, 2017-10-19 This volume explores the contents forms and actors that characterize current opposition to the corporate neoliberal agri food regime Designed to generate a coherent informed and updated analysis of resistance in agri food empirical and theoretical contributions analyze the relationship between

expressions of the neoliberal corporate system and various projects of opposition Contributions included in the volume probe established forms and rationales of resistance including civic agriculture consumer and community based initiatives labor cooperative and gender based protest struggles in opposition to land grabbing and mobilization of environmental science and ecological resistance The core contribution of the volume is to theorize and to empirically assess the limits and contradictions that characterize these forms of resistance In particular the hegemonic role of the neoliberal ideology and the ways in which it has captured processes of resistance are illustrated Through the exploration of the tension between legitimate calls for emancipation and the dominant power of Neoliberalism the book contributes to the ongoing debate on the strengths and limits of Neoliberalism in agri food It also engages critically with the outputs and potential outcomes of established and emerging resistance movements practices and concepts

Food and Drink in American History Andrew F. Smith, 2013-10-28 This three volume encyclopedia on the history of American food and beverages serves as an ideal companion resource for social studies and American history courses covering topics ranging from early American Indian foods to mandatory nutrition information at fast food restaurants The expression you are what you eat certainly applies to Americans not just in terms of our physical health but also in the myriad ways that our taste preferences eating habits and food culture are intrinsically tied to our society and history This standout reference work comprises two volumes containing more than 600 alphabetically arranged historical entries on American foods and beverages as well as dozens of historical recipes for traditional American foods and a third volume of more than 120 primary source documents Never before has there been a reference work that coalesces this diverse range of information into a single set The entries in this set provide information that will transform any American history research project into an engaging learning experience Examples include explanations of how tuna fish became a staple food product for Americans how the canning industry emerged from the Civil War the difference between Americans and people of other countries in terms of what percentage of their income is spent on food and beverages and how taxation on beverages like tea rum and whisky set off important political rebellions in U S history

Handbook of Material Culture Chris

Tilley, Webb Keane, Susanne Kuechler, Mike Rowlands, Patricia Spyer, 2006-01-05 The study of material culture is concerned with the relationship between persons and things in the past and in the present in urban and industrialized and in small scale societies across the globe The Handbook of Material Culture provides a critical survey of the theories concepts intellectual debates substantive domains and traditions of study characterizing the analysis of things It is cutting edge rather than simply reviewing the field as it currently exists It also attempts to chart the future the manner in which material culture studies may be extended and developed The Handbook of Material Culture is divided into five sections Section I maps material culture studies as a theoretical and conceptual field Section II examines the relationship between material forms the human body and the senses Section III focuses on subject object relations Section IV considers things in terms of processes and transformations in terms of production exchange and consumption performance and the significance of things over the long term Section V considers the contemporary politics and poetics of displaying representing and conserving material and the manner in which this impacts on notions of heritage tradition and identity The Handbook charts an interdisciplinary field of studies that makes a unique and fundamental contribution to an understanding of what it means to be human It will be of interest to all who work in the social and historical sciences from anthropologists and archaeologists to human geographers to scholars working in heritage design and cultural studies

The Rural Richard Munton, 2017-05-15 The rural has long been regarded as an important site of geographical inquiry even if our understanding of it has not always been treated as conceptually different from the urban That said rural research has pursued a number of distinct empirical agendas ranging from the operation and impacts of agribusiness to local resistance to global food supply chains to differing representations of the rural In doing so rural geographers have critically examined the relevance and significance of ideas drawn from numerous traditions including political economy ecological modernization and cultural theory amending them as appropriate in their search to understand the nature and trajectory of rural areas Up until the 1980s attention remained largely focused upon agriculture as the primary land use but increasingly new forms of rural consumption housing recreation nature conservation have taken centre stage as the primacy of local agricultures has been undermined by reduced state protection and new rural populations which have migrated out from the city More recently research has been dominated by the cultural turn with particular emphases upon society nature relations interpretations of landscape marginalised others and analyses of the relations between representation and practice In the last decade a more holistic view of the rural bringing together different aspects of the two previous themes has emerged through more politically oriented studies of rural governance concerned with the functioning of interest groups participation protest and the allocation and management of resources The volume is thus structured into three sections concerned with agriculture and food the rural and rural governance The great majority of the selected papers combine both empirical material often highly informative case studies and important conceptual arguments about change in the rural condition that can be linked to ideas being employed elsewhere in

Geography and the Social Sciences more generally These critical reflections have been drawn very largely from research conducted in advanced economies which at least provide some commonality of experience allowing the transfer of ideas between what otherwise might be seen as very differing geographical contexts **Favored Flowers** Catherine Ziegler, 2007-07-10 Cultural history of the flower trade in New York City and the transformation of the cut flower industry into a global commodity system
