From Instinct to Identity Louis Breger, 2009 *From Instinct to Identity* begins an account of personality development by tracing the legacy of the human species from its primate heritage to its present form. Findings from ethology, primate studies, linguistics, and other sources are used to construct an account of the unique features of man. The evolution of early cultures is shown through use of anthropological work. The ideas of Sigmund Freud, particularly as modified by Erik Erikson, are presented together with the theories and findings of Jean Piaget and his collaborators in a series of chapters that follow the person from infancy to adolescence. Other chapters examine play, dreams, and fantasy, anxiety and its effects on the development of self, moral development, and identity. The emphasis throughout is on the growth of self and its impact on social norms. The author blends together theories and findings from psychoanalysis, psychology, ethology, humanistic psychology, and child development to develop a model of human motivation in which the basic emotional systems of love, anxiety, aggression, curiosity, and intelligence are traced from their primate background through the human life cycle. He brings together classic ideas on guilt and conscience with research on moral reasoning and ego development and clarifies difficult ideas in a clear, direct prose style. This classic volume, now available in paperback with a new introduction by the author, will find a new audience among anthropologists as well as psychologists interested in the evolution of human behavior. Louis Breger is professor of psychoanalytic studies emeritus at the California Institute of Technology in Pasadena. He is a practicing psychotherapist and psychoanalyst and is the founding president of the Institute of Contemporary Psychoanalysis, Los Angeles. He has written other books and a number of scholarly articles on psychoanalytic topics, including the acclaimed biography *Freud: Darkness in the Midst of Vision* and *Dostoevsky: The Author as Psychoanalyst*.

The Human Quest for Meaning Paul T. P. Wong, 2013-06-19 The first edition of *The Human Quest for Meaning* was a major publication on the empirical research of meaning in life and its vital role in well-being, resilience, and psychotherapy. This new edition continues that quest and seeks to answer the questions: what is the meaning of life? How do we explain what constitutes meaningful relationships, work, and living? The answers, as the eminent scholars and practitioners who contributed to this text find, are neither simple nor straightforward. While seeking to clarify subjective vs. objective meaning in 21 new and 7 revised chapters, the authors also address the differences in cultural contexts and identify 8 different sources of meaning as well as at least 6 different stages in the process of the search for meaning. They also address different perspectives, including positive psychology, self-determination, integrative narrative, and relational perspectives, to ensure that readers obtain the most thorough information possible. Mental health practitioners will find the numerous meaning-centered interventions such

as the PURE and ABCDE methods highly useful in their own work with facilitating healing and personal growth in their clients The Human Quest for Meaning represents a bold new vision for the future of meaning oriented research and applications No one seeking to truly understand the human condition should be without it *Self and Identity* Richard D. Ashmore, Lee Jussim, 1997-05-15 Self and identity have been important yet volatile notions in psychology since its formative years as a scientific discipline Recently psychologists and other social scientists have begun to develop and refine the conceptual and empirical tools for studying the complex nature of self This volume presents a critical analysis of fundamental issues in the scientific study of self and identity These chapters go much farther than merely taking stock of recent scientific progress World class social scientists from psychology sociology and anthropology present new and contrasting perspectives on these fundamental issues Topics include the personal versus social nature of self and identity multiplicity of selves versus unity of identity and the societal cultural and historical formation and expression of selves These creative contributions provide new insights into the major issues involved in understanding self and identity As the first volume in the Rutgers Series on Self and Social Identity the book sets the stage for a productive second century of scientific analysis and heightened understanding of self and identity Scholars and advanced students in the social sciences will find this highly informative and provocative reading Dr Richard D Ashmore is a professor and Dr Lee Jussim is an associate professor in the Department of Psychology at Rutgers University New Brunswick New Jersey *The Redemptive Self* Dan P. McAdams, 2013-02-14 In this revised and expanded edition of *The Redemptive Self* McAdams shows how redemptive stories promote psychological health and civic engagement among contemporary American adults *The Psychobiology of Consciousness* Richard Davidson, 2012-12-06 CONSCIOUSNESS AND THE BRAIN SELF REGULATION PARADOX The relationship of consciousness to biology has intrigued mankind throughout recorded history However little progress has been made not only in understanding these issues but also in raising fundamental questions central to the problem As Davidson and Davidson note in their introduction William James suggested almost a century ago in his *Principles of Psychology* that the brain was the organ of mind and behavior James went so far as to suggest that the remainder of the *Principles* was but a footnote to this central thesis This volume brings together diverse biobehavioral scientists who are addressing the various aspects of the mind/body/behavior issue Although some of the authors have previously published together in other volumes by and large the particular combination of authors and topics selected by the editors makes this volume unique and timely Unlike the *Consciousness and Self Regulation* series Schwartz Shapiro 1976 1978 also published by Plenum this volume is devoted entirely to a psychobiological approach to consciousness Although readers will differ in their interest in specific chapters the well rounded investigator who is concerned with the psychobiology of consciousness will want to become intimately acquainted with all the views presented in this volume As noted by the individual contributors the topic of this volume stimulates fundamental questions which on the surface may appear trivial yet on further reflection

turn out to have deep significance **Power, Intimacy, and the Life Story** Dan P. McAdams, 1988-01-01 Who am I And how do I fit into the world These are the questions individuals ask themselves to make sense of their lives Power Intimacy and the Life Story addresses the human quest for identity The author reinterprets some of the classic writings in psychology as he shows how each of us constructs a life story in order to meet the identity challenge and create a sense of unity and purpose in our lives Written for the social scientist practicing clinician educated layperson and student this compelling study describes how we construct stories that are organized by the two general life themes of power and intimacy Using the results of questionnaires and interviews with both college students and older adults the author illustrates an innovative way of understanding human lives in literary terms *The Self and Memory* Denise R. Beike, James M. Lampinen, Douglas A. Behrend, 2004-11-01 Noted scholars from a broad range of sub disciplines in psychology discuss the ways in which the memories of our lives come to influence who we are our personalities and our emotional functioning Other topics covered include how our personalities and self concepts influence what we remember from our lives and the notion of memory and the self as interdependent psychological phenomena **Handbook of Social Development** Vincent B. Van Hasselt, Michel Hersen, 2013-11-11 Social development over one's lifetime is a complex area that has received considerable attention in the psychological social psychological and sociological literature over the years Surprisingly however since 1969 when Rand McNally published Goslin's Handbook of Socialization no comprehensive statement of the field has appeared in book form Given the impressive data in this area that have been adduced over the last two decades we trust that our handbook will serve to fill that gap In this volume we have followed a lifespan perspective starting with the social interactions that transpire in the earliest development stages and progressing through childhood adolescence adulthood and finally one's senior years In so doing we cover a variety of issues in depth The book contains 21 chapters and is divided into five parts I Theoretical Perspectives II Infants and Toddlers III Children and Adolescents IV Adults and V The Elderly Each of the parts begins with introductory material that reviews the overall issues to be considered Many individuals have contributed to the final production of this handbook Foremost are our eminent contributors who graciously agreed to share with us their expertise We also thank our administrative and technical staff for their assistance in carrying out the day to day tasks necessary to complete such a project Finally we thank Eliot Werner Executive Editor at Plenum for his willingness to publish and for his tolerance for the delays inevitable in the development of a large handbook **Self and Identity : Fundamental Issues** Richard D. Ashmore Professor of Psychology Rutgers University, Lee Jussim Associate Professor of Psychology Rutgers University, 1997-04-17 Self and identity have been important yet volatile notions in psychology since its formative years as a scientific discipline Recently psychologists and other social scientists have begun to develop and refine the conceptual and empirical tools for studying the complex nature of self This volume presents a critical analysis of fundamental issues in the scientific study of self and identity These chapters go much farther than merely taking stock of recent scientific progress

World class social scientists from psychology sociology and anthropology present new and contrasting perspectives on these fundamental issues Topics include the personal versus social nature of self and identity multiplicity of selves versus unity of identity and the societal cultural and historical formation and expression of selves These creative contributions provide new insights into the major issues involved in understanding self and identity As the first volume in the Rutgers Series on Self and Social Identity the book sets the stage for a productive second century of scientific analysis and heightened understanding of self and identity Scholars and advanced students in the social sciences will find this highly informative and provocative reading Dr Richard D Ashmore is a professor and Dr Lee Jussim is an associate professor in the Department of Psychology at Rutgers University New Brunswick New Jersey
