His Tomb Is Empty! James Dove, 2001-10 It will simplify expedite your search for God The author is a relatively new Christian who has spent time acquiring life changing information about Christianity A new Christian usually takes the time to research that which they doubted for most of their lives to verify it They have a show me attitude and do not take my word for it from anyone Thus they accept only researched information backed up with documented facts and established evidence Knowledge gained from contemporary Christian scholars the Bible and really revealing common sense have been used to at the least evoke emotions and a desire to learn more and at the most for the reader to gain salvation using information that can be researched by looking for it in just about any history book this book or from the Bible itself This book has no agenda nor desire to offend anyone's beliefs but rather verifying our belief through research This was done to verify for the author his family and anyone else that is searching for God God is one not a combination of many religions that contradict each other God is not associated with contradictions or deceit and there is just one religion with a living founder thus one religion is true while frankly the rest aren t This should bother no one that is after finding the real God and it should not matter which of the religions He truly resides in Just that He resides Mankind should simply be concerned with who God is not being the person who has the right religion The right religion is where God resides not where we want Him to reside This book will show that the evidence for the location and identity of God are extremely simple and easy to find Simple Theology: Theology for the Rest of Us Clay A. team of support professionals and advocates Once you begin working with your team you ll start the recovery process by acquiring a set of skills and techniques to help you weather the storm and begin healing Grieve mourn and let go Recovery will take you on a journey of grieving mourning and letting go which will transport you to a new sense of calm and acceptance I ll break down this journey into the stages you ll travel through to get to the other side Maintain your recovery Finally I ll share helpful ways to maintain your recovery manage setbacks with compassion and track your progress so you can proactively navigate the inevitably choppy waters as you continue your healthy and productive recovery Adapt and adjust to the impacts of the COVID 19 Pandemic The COVID 19 global Pandemic has left a lasting impact on all our lives This section will review the Pandemic's mental health physical health and social implications with helpful tools and techniques to help you manage the trauma and stress the Pandemic brings In addition gems of wisdom and learnings within the research literature will help you navigate the Pandemic and Post Pandemic worlds effectively Learn interactively with workbook exercises Workbook exercises will help you digest the content reflect on your situation learn from that reflection and incrementally create a personalized recovery plan Each exercise in the workbook walks you through a process of self reflection and self discovery to help you understand and make sense of your situation First Responder Careers Expose Individuals to Higher Risks of Developing Trauma Some careers include a higher likelihood of experiencing traumatic events that can lead to the development of PTSD Serving in the military is a high risk factor for developing PTSD However combat veterans develop PTSD at different rates depending on the severity and length of exposure to traumatic experiences There are also high incidences of reported sexual harassment and sexual abuse in the military As a result the rates of PTSD are relatively high compared to the overall prevalence in the general population Not only can law enforcement officers experience direct threats and stressful conditions but they also regularly witness the devastating effects of assaults robberies kidnappings and violent events However individuals in this profession have lower than expected rates of PTSD surprisingly An estimated 20 percent overall may result from having access to counseling and rigorous pre employment screenings EMTs and paramedics are routinely exposed to life threatening incidents and have more health problems than individuals in other occupations PTSD rates in this group are as high as 20 percent PTSD prevalence in this profession is comparable to law enforcement Firefighters conduct paramedic activities and are the first responders to natural disasters Firefighting is a dangerous profession that exposes workers to stressful conditions and traumatic events ranging from threats to their safety and experiencing the devastating effects of catastrophes As a result the prevalence of PTSD in this group can be as high as 20 percent Volunteer firefighters may have even higher rates because they don't have access to the same level of support as career firefighters Healthcare workers especially those working in emergency rooms and intensive care units are also at higher risk For example nurses working in critical care units are more likely to develop PTSD than nurses in other groups In addition while senior level nurses report fewer PTSD symptoms than junior ones they report higher rates of burnout Finally

healthcare workers exposed to patients that have experienced violence such as an assault victim are more likely to develop PTSD than surgeons who treat assault victims Rescue workers medical workers and volunteers who act as first responders during disasters witness the aftermath of horrific events and can even become involved in severe traumatic events The prevalence of PTSD in these individuals has been estimated to be between 15 and 30 percent Journalists who work as war correspondents are at higher risk of being injured killed or kidnapped Their lifetime prevalence of PTSD which can be as high as 30 percent reflects their lack of access to support and PTSD treatment options Transit and train operators are frequently exposed to physical threats and witness suicide incidents such as person under train events Exposure to these traumatic and threatening circumstances can be a daily or weekly occurrence Bus drivers are more prone to PTSD because they have more direct contact with the general public than train drivers locked in secure train cabs In these high risk professions the incidence of trauma declines when policies are in place to debrief victims give victims immediate access to counseling and screen for individuals at high risk of having adverse reactions to traumatic conditions A Girl's Guide to Missiles Karen Piper, 2019-08-13 A poignant surreal and fearlessly honest look at growing up on one of the most secretive weapons installations on earth by a young woman who came of age with missiles The China Lake missile range is located in a huge stretch of the Mojave Desert about the size of the state of Delaware It was created during the Second World War and has always been shrouded in secrecy But people who make missiles and other weapons are regular working people with domestic routines and everyday dilemmas and four of them were Karen Piper's parents her sister and when she needed summer jobs herself Her dad designed the Sidewinder which was ultimately used catastrophically in Vietnam When her mom got tired of being a stay at home mom she went to work on the Tomahawk Once when a missile nose needed to be taken offsite for final testing her mother loaded it into the trunk of the family car and set off down a Los Angeles freeway Traffic was heavy and so she stopped off at the mall leaving the missile in the parking lot Piper sketches in the belief systems from Amway s get rich schemes to propaganda in The Rocketeer to evangelism along with fears of a Lemurian takeover and Charles Manson that governed their lives Her memoir is also a search for the truth of the past and what really brought her parents to China Lake with two young daughters a story that reaches back to her father's World War II flights with contraband across Europe Finally A Girl s Guide to Missiles recounts the crossroads moment in a young woman s life when she finally found a way out of a culture of secrets and fear and out of the desert Becoming a Professional Life Coach: The Art and Science of a Whole-Person Approach (Third) Patrick Williams, Diane S.
