Rise of Judicial Management in the U.S. District Court, Southern District of Texas, 1955-2000 Steven Harmon Wilson, 2010-07-01 This is the first book length study of a federal district court to analyze the revolutionary changes in its mission structure policies and procedures over the past four decades As Steven Harmon Wilson chronicles the court s attempts to keep pace with an expanding diversifying caseload he situates those efforts within the social cultural and political expectations that have prompted the increase in judicial seats from four in 1955 to the current nineteen Federal judges have progressed from being simply referees of legal disputes to managers of expanding courts dockets and staffs says Wilson The Southern District of Texas offers an especially instructive model by which to study this transformation Not only does it contain a varied population of Hispanics African Americans and whites but its jurisdiction includes an international border and some of the busiest seaports in the United States Wilson identifies three areas of judicial management in which the shift has most clearly manifested itself Through docket and case management judges have attempted to rationalize the flow of work through the litigation process Lastly and most controversially judges have sought to bring constitutionally flawed institutions into compliance through structural reform rulings in areas such as housing education employment and voting Wilson draws on sources ranging from judicial biography and oral history interviews to case files published opinions and administrative memoranda Blending legal history with social science this important new study ponders the changing meaning of federal judgeship as it shows how judicial management has both helped and hindered the resolution of legal conflicts and the protection of civil rights
