From Alliance To Coalitions:

European Coalitions, Alliances and Ententes Since 1792 Fossey John Cobb Hearnshaw, Great Britain. Foreign Office. Historical Section, 1920

Coalition Defection Avi Kober, 2002-11-30 Since the creation of Israel during both wartime and peacetime many Arab coalitions have formed Every one of these anti Israel coalitions has failed to achieve its goals due to the defection of one or more major parties Kober explores the forces behind the dissemination of these alliances to determine why Arab states chose defection whether or not a distinction can be made between defection patterns in times of war and patterns related to peace processes and possible explanations for different behavior patterns The multi polar structure of the Arab subsystem the decisions of pivotal members and the negative reputations earned by such coalitions have always made defection an easy alternative The choice to defect was Kober contends nurtured by a sense of military weakness and by the priority that coalition members attached to their particular interests over general Arab concerns Kober finds that defection in time of war has arisen mainly through evasion passive avoidance of coalition obligations with the hope of escaping or minimizing expected losses Defection from military coalitions often deprived the defector of maximizing gains all the while weakening the remaining coalition members However defection during the peace process served not only to optimize the defector's utilities but eventually proved beneficial for the parties left behind Kober determines that the peace process mainly due to superpower involvement transformed the scenario from a zero sum to a non zero sum game by rewarding the parties for signing treaties with Israel Also the first defectors such as Egypt established pay off precedents creating the foundation for future negotiations between the Arab players and Israel

How and Why States Defect from Contemporary Military Coalitions Kathleen J. McInnis, 2019-06-19 This book identifies contemporary military coalition defections builds a theoretical framework for understanding why coalition defection occurs and assesses its utility for both the scholarly and policy practitioner communities Drawing upon the author's own experiences managing the Afghanistan coalition for the Pentagon the volume builds a relevant policy and practical understanding of some of the key aspects of contemporary coalition warfare Ultimately it concludes that coalition defection is prompted by heightened perceptions of political and military risk Yet the choice of how to defect whether to completely withdraw forces or instead find another less risky way to participate is largely a function of international and alliance pressures to remain engaged

The Politics of Military Coalitions Scott Wolford, 2015-09-03 Military coalitions are ubiquitous The United States builds them regularly yet they are associated with the largest most destructive and consequential wars in history When do states build them and what partners do they choose Are coalitions a recipe for war or can they facilitate peace Finally when do coalitions affect the expansion of conflict beyond its original participants The Politics of Military Coalitions introduces newly collected data designed to answer these very questions showing that coalitions expensive to build but attractive from a military standpoint are very often more if sometimes less than the sum of their parts at times encouraging war while discouraging it at others at times touching off wider wars while at others keeping their targets isolated The combination of new data new formal theories and new quantitative analysis will be of interest to scholars students and policymakers alike

Blue-Green Coalitions Brian Mayer, 2011-02-23 What do unions and environmental groups have to gain by working together and how do they overcome their differences In Blue Green Coalitions Brian Mayer answers these questions by focusing on the role that health related issues have played in creating a common ground between the two groups By recognizing that the same toxics that cause workplace hazards escape into surrounding communities and the environment workers and environmentalists are able to collaborate for the protection of all Mayer examines three contemporary cases of successful labor environmental alliances to demonstrate how health and safety issues are used to create durable and politically influential social movement coalitions

- o Alliance for a Healthy Tomorrow a coalition of environmental labor community and public health organizations in Massachusetts that has developed a successful prevention based approach to safe workplaces and a clean environment
- o The Work Environment Council in New Jersey which succeeded in passing the first statewide right to know law and concentrates on protecting citizens from the dangerous toxics generated by the state's chemical industries
- o The Silicon Valley Toxics Coalition an organization that began in the 1980s fighting hazardous high tech practices that were affecting the Valley residents and the high tech industry's largely immigrant workforce

In Mayer's ethnographic accounts of the challenging work of bringing these blue green coalitions together it becomes clear that stereotypes about environmentalists and workers are largely irrelevant when thinking about who is at risk of exposure to dangerous toxic substances Both movements share a common concern for protecting their members' health from toxic

Waging War Patricia A. Weitsman, 2013-12-18 Military alliances provide constraints and opportunities for states seeking to advance their interests around the globe War from the Western perspective is not a solitary endeavor Partnerships of all types serve as a foundation for the projection of power and the employment of force These relationships among states provide the foundation upon which hegemony is built *Waging War* argues that these institutions of interstate violence not just the technology capability and level of professionalism and training of armed forces serve as ready mechanisms to employ force However these institutions are not always well designed and do not always augment fighting effectiveness as they could They sometimes serve as drags on state capacity At the same time the net benefit of having this web of partnerships agreements and alliances is remarkable It makes rapid response to crisis possible and facilitates countering threats wherever they emerge This book lays out which institutional arrangements lubricate states

abilities to advance their agendas and prevail in wartime and which components of institutional arrangements undermine effectiveness and cohesion and increase costs to states Patricia Weitsman outlines what she calls a realist institutionalist agenda one that understands institutions as conduits of capability She demonstrates and tests the argument in five empirical chapters examining the cases of the first Gulf War Kosovo Afghanistan Iraq and Libya Each case has distinct lessons as well as important generalizations for contemporary multilateral warfighting Social Perspectives in Lesbian and Gay Studies
