A History of England: From Castlereagh to Gladstone, 1815-1885 Christopher Nugent Lawrence Brooke, Denis Mack Smith, **A History of England** Derek Beales, 1969

From Castlereagh to Gladstone Derek Edward Dawson Beales, 1971 **The Historiography of Gladstone and Disraeli** Ian St John, 2016-08-03 This book traces the often sharply differing perspectives historians have formed with regard to the key incidents in the careers of the two foremost politicians of the Victorian age Gladstone and Disraeli Following the parallel careers of both men it focuses upon a series of contentious questions ranging from why Disraeli opposed Corn Law repeal in 1846 and Gladstone abandoned his High Tory politics for Peelism to whether Disraeli was ever an Imperialist and why Gladstone took up the cause of Irish Home Rule By juxtaposing the contrasting interpretations advocated by historians it brings home to students how history is a continually evolving subject in which every generation poses new questions or reformulates answers to old ones encouraging those studying the subject to realise that history is an ongoing dialogue to which they are called upon to contribute

The Later Middle Ages, 1272-1485 George Holmes, 1966 Professor Holmes also examines the politics of these years the relations of the kings of England with neighboring rules and with their own subjects This period includes the successful conquest of Scotland the series of wars with France known as the Hundred Years War and the War of the Roses which brought Henry VII the first Tudor to the throne in 1485 Here also is an exploration of the heretical movement initiated by Wycliffe in the thirteen seventies which began a tendency toward loosening the power of the Church and a study of the beginnings of parliamentary government in the later fourteenth century its collapse in the following century and the emergence of a strong self sufficient monarchy English life in the thirteenth century was

characterized by a single Christian Church owing allegiance to Rome and living on the revenues of its estates kingship with difficulty kept intact in the face of scheming magnates jealous of their privileges a countryside divided into thousands of small estates tilled by peasants some of them serfs and owned by lords with considerable power over their tenants armies of knights fighting on horseback Gothic cathedrals monasteries castles town guilds Professor Holmes describes this medieval society and its evolution after the Black Death into a somewhat different kind of society in the late fifteenth century He argues that the population decrease as a result of the plague beginning in 1349 brought about fundamental transformations village life changed serfdom disappeared the great estates became less important industry grew and the commodities and directions of trade changed

The Mid-Victorian Generation K. Theodore Hoppen, 2000-06-30 This the third volume to appear in the New Oxford History of England covers the period from the repeal of the Corn Laws to the dramatic failure of Gladstone's first Home Rule Bill In his magisterial study of the mid Victorian generation Theo Hoppen identifies three defining themes The first he calls established industrialism the growing acceptance that factory life and manufacturing had come to stay It was during these four decades that the balance of employment shifted irrevocably For the first time in history more people were employed in industry than worked on the land The second concerns the multiple national identities of the constituent parts of the United Kingdom Dr Hoppen's study of the histories of Ireland Scotland Wales and the Empire reveals the existence of a variety of particular and overlapping national traditions flourishing alongside the increasingly influential structure of the unitary state The third defining theme is that of interlocking spheres which the author uses to illuminate the formation of public culture in the period This he argues was generated not by a series of influences operating independently from each other but by a variety of intermeshed political economic scientific literary and artistic developments This original and authoritative book will define these pivotal forty years in British history for the next generation

Romanticism, Rhetoric and the Search for the Sublime, 2nd Edition Craig R. Smith, 2023-01-23 Relying on the author's established expertise in rhetoric and political communication this book re contextualizes Romantic rhetorical theory from the late 18th and early 19th centuries to provide a foundation for a Neo Romantic rhetorical theory for our own time In the process it uses a unique methodology to correct misconceptions about the rhetorical theories of many writers Using a dialectical approach the early chapters trace Romanticism through its opposition to the industrial revolution and the Enlightenment back through Humanism and its opposition to Scholasticism to its roots in St Augustine's writing These chapters include a revisionist analysis of the church's treatment of Galileo in the course of showing how difficult it was for scientific study to be accepted in Scholastic circles The study goes on to argue that Jean Jacques Rousseau David Hume and Edmund Burke were bridge figures to the Romantic Era This move throws new light on exemplary painters composers writers and orators of the Romantic Era who are examined in chapters eight and nine Chapter ten focuses on Percy Bysshe Shelley and his development of the rhetorical poem and thereby provides a new genre in the Romantic catalogue Chapter Eleven turns to the

Romantic rhetorical theories of Hugh Blair and Thomas De Quincey to empower those seeking to save the environment The concluding chapter then synthesizes their theories with relevant contemporary rhetorical theories thereby constructing a Neo Romantic theory for our own time In the process the book links the Romantics love of nature to the current environmental crisis

The American and British Debate Over Equality, 1776-1920 James L. Huston, 2017-10-16

Historians have long contested the degree to which the central tenet of the Declaration of Independence that all men are created equal has manifested itself in American society and national policy According to James L Huston many historians have focused too intently on class differences slavery and inequalities arising from ethnicity sexuality and gender while overlooking important areas where notions of equality flourished during the century and a half after the Declaration s signing In *The American and British Debate Over Equality 1776 1920* Huston examines the egalitarian communities in rural northern America particularly those enclaves that differed from the openly aristocratic cities and towns of the British Isles In the aftermath of the American Revolution British and American writers alike recognized that a growing philosophical rift divided the two nations whereas Great Britain continued to embrace the inequality of its hierarchical class system the United States professed allegiance to democratic ideals of equality limited though these were by racial and gender norms of the day Huston argues that the two countries engaged in an intellectual debate during the next century and a half over which ideal equality or inequality worked best in promoting social stability political hegemony and economic success Exploring the effects of equality and inequality on many aspects of American life he examines civil behavior social customs treatment of others politics education religion economic opportunity and general public optimism Drawing from decades of publications by American and British writers Huston reveals the rhetorical strategies contemporary observers employed in defending or rejecting the organization of a society around broader notions of human equality *The American and British Debate Over Equality 1776 1920* informs the modern debate over equality and inequality not by theorizing and philosophizing but by offering a glimpse into the practical applications of a functioning egalitarian society as compared to one that extolled monarchy and institutionalized inequality

Disraeli David Cesarani, 2016-04-26 Lauded as a great Jew excoriated by antisemites and one of Britain s most renowned prime ministers Benjamin Disraeli has been widely celebrated for his role in Jewish history But is the perception of him as a Jewish hero accurate In what ways did he contribute to Jewish causes In this groundbreaking lucid investigation of Disraeli s life and accomplishments David Cesarani draws a new portrait of one of Europe s leading nineteenth century statesmen a complicated driven opportunistic man While acknowledging that Disraeli never denied his Jewish lineage boasted of Jewish achievements and argued for Jewish civil rights while serving as MP Cesarani challenges the assumption that Disraeli truly cared about Jewish issues Instead his driving personal ambition

required him to confront his Jewishness at the same time as he acted opportunistically By creating a myth of aristocratic Jewish origins for himself and by arguing that Jews were a superior race Disraeli boosted his own career but also contributed to the consolidation of some of the most fundamental stereotypes of modern antisemitism **Money and Politics** Luca Einaudi,2001 This is a detailed study of a little known attempt to create monetary union throughout the whole of Europe in the late nineteenth century It explores political diplomatic and economic aspects of the Latin Monetary Union between 1865 and 1873 Areas such as the debate between economists and the public and the daily operations conflicts of interest and power struggles between national banks and governments in the age of Gladstone Napoleon III and Bismarck are examined

Late Victorian Holocausts Mike Davis,2002-06-17 This global environmental and political history will redefine the way we think about the European colonial project Observer sets the triumph of the late 19th century Western imperialism in the context of catastrophic El Niño weather patterns at that time groundbreaking mind stretching The Independent Examining a series of El Niño induced droughts and the famines that they spawned around the globe in the last third of the 19th century Mike Davis discloses the intimate baleful relationship between imperial arrogance and natural incident that combined to produce some of the worst tragedies in human history Late Victorian Holocausts focuses on three zones of drought and subsequent famine India Northern China and Northeastern Brazil All were affected by the same global climatic factors that caused massive crop failures and all experienced brutal famines that decimated local populations But the effects of drought were magnified in each case because of singularly destructive policies promulgated by different ruling elites Davis argues that the seeds of underdevelopment in what later became known as the Third World were sown in this era of High Imperialism as the price for capitalist modernization was paid in the currency of millions of peasants lives **Doctrine and Reform in the British Cavalry 1880-1918** Stephen Badsey,2016-12-05 A prevalent view among historians is that both horsed cavalry and the cavalry charge became obviously obsolete in the second half of the nineteenth century in the face of increased infantry and artillery firepower and that officers of the cavalry clung to both for reasons of prestige and stupidity It

is this view commonly held but rarely supported by sustained research that this book challenges It shows that the achievements of British and Empire cavalry in the First World War although controversial are sufficient to contradict the argument that belief in the cavalry was evidence of military incompetence It offers a case study of how in reality a practical military doctrine for the cavalry was developed and modified over several decades influenced by wider defence plans and spending by the experience of combat by Army politics and by the rivalries of senior officers Debate as to how the cavalry was to adjust its tactics in the face of increased infantry and artillery firepower began in the mid nineteenth century when the increasing size of armies meant a greater need for mobile troops The cavalry problem was how to deal with a gap in the evolution of warfare between the mass armies of the later nineteenth century and the motorised firepower of the mid twentieth century an issue that is closely connected with the origins of the deadlock on the Western Front Tracing this debate this book shows how despite serious attempts to learn from history both European style wars and colonial wars produced ambiguous or disputed evidence as to the future of cavalry and doctrine was largely a matter of what appeared practical at the time

Urban Workers in the Early Industrial Revolution Robert Glen,2019-08-13 This title first published in 1984 focuses primarily on the early Industrial Revolution c 1780 1820 in the Stockport district As the Industrial Revolution in England was the first instance of successful industrialisation it can still provide many social and economic lessons and also furnish essential evidence for continuing debate over ideology and theory Therefore this title will be of interest to students of both history and economics

Men In The Public Eye Jeff Hearn,2006-05-11 Men in the Public Eye reveals why men s domination in and of the public sphere is a vital feature of gender relations in patriarchy It also shows how public domains dominate private domains contributing to the intensification of public patriarchies Jeff Hearn explores these important issues by focusing on the period 1870 1920 when there was massive growth and transformation in the power of the public domains He demonstrates that these historical debates and dilemmas are still relevant today as men search for new postmodern forms of masculinities
